What Is Sea Salt Spray? Sea salt spray is a hair product that contains salt as well as additional nourishing compounds that delivers texture and volume. Sea salt sprays have become majorly popular because it works, like the ocean, to help you achieve the effect that salt water naturally has on your hair. When salt water dries in your hair, the salt is deposited on the strands and gives your hair a distinct texture. Creating waves is literally a breeze with sea salt spray at hand. Dampen hair or towel dry. Comb or brush hair. Mist spray into hair, from root to tip. Twist, scrunch and tousle your hair all over to activate product. If you have oily hair, then a sea salt spray may help your hair last longer between washes. It is recommended to use a conditioner before applying sea salt spray, as natural black hair can become dry. Pair it with other smoothing mists in your collection to combat frizz and humidity. Less is more when looking for the best sea salt spray for straight hair. Spritz on damp hair from scalp to ends for a subtle wave. For optimum waves, curl hair with a curling wand the next day and mist your sea salt spray throughout. Color-treated hair is often dried out and a bit rough from the chemicals, so a sea salt spray with nourishing ingredients like the ones listed above are ideal. Avoid sprays that contain alcohol. Good sea salt sprays absorb extra oils and may even act as a dry shampoo. You only need a few ingredients as well as our guide. Plastic spray bottle 1 tbsp of sea salt 1 cup lukewarm water 1 tbsp leave in conditioner 1 tbsp coconut oil Feel free to add essential oils like argan , jasmine, lavender, or aloe. How will you be styling your mermaid waves next?
