

Chapter 1 : Corn & Soybean Field Guide

Agronomy Guide for Field Crops - Publication This publication is a comprehensive guide to field crop production. The latest recommendations on all aspects of producing field crops are included.

Ordering details appear below. To join our mailing list to be notified about ordering custom covers of this and other guides, please contact Kevin Leigh Smith at kevlsmith@purdue.edu. Order by Friday, January 25, if you want your guides to ship in late March. The minimum order for custom covers is 100 copies. Larger orders receive discounts. Prices for the 2018 edition are: Orders may be subject to Indiana sales tax. These prices are per cover design. Groups that order multiple cover designs do not receive a cumulative discount. These prices include printer setup charges and basic shipping. Orders that need to be shipped to multiple locations may be subject to actual shipping charges. How Do I Order? To order custom guides, please email Kevin Leigh Smith with the following information: Your name and organization. Number of custom guides you want to order. If you want guides for the first or second printing. A billing address if different. A description of what you want on the cover and please attach any graphics files you want to include. Details about graphics files are provided below. If you belong to a larger organization, pooling all of your orders together can reduce your costs, avoid unnecessary duplication, and ensure you receive guides. Please consult with the appropriate individuals in your organization to consolidate your orders. What Is the Process? Once you let us know what you want on the cover, you will receive a rough PDF to make sure the elements are where you want them. After that, our graphic designer will finalize the design. We create several custom covers at once, so you will receive this final PDF proof some time after the ordering deadline in early November for the first printing, in early February for the second printing. After you receive this final proof, you will send us any corrections or changes. We will not print your cover until we receive your final approval. What Can I Put on the Cover? A PDF sample of the template is available here. All versions of the guide feature a photo on the front cover with a live area for your logo and information. There will be a larger live area on the back cover for more information. The live area on the front cover is 3. On the sample, the live area is the white box on the front. The live area on the back cover is 3. On the sample, this space is all of the back cover except the Purdue Extension disclaimer, branding, and EEO statement on the bottom of the page. The back covers have a 0. What Artwork Do I Need? Other formats TIF and JPG are acceptable, but please send high-resolution images at least 300 dpi at actual print size. Graphic files that have a lower resolution may look good on your computer screen, but will print poorly. Colors in the live area on the back cover you can specify any background color you like. For example, you can send us a specific PMS color, or we can match the background to one in your logo. If you do not specify a color, we will use white. Photos because we print these covers using a four-color process, you can also use photos or any other art as long as they are of publication quality and fit in the live space. Text and other information we can include any other information you want on the front or back covers phone numbers, email addresses, website URLs, taglines, and so on. If you have a particular font you would like to use, please specify the font and send a sample of the text. The only limitation, of course, is space. Shipping and Billing It is possible to ship your guides to more than one location. For details, please contact Kevin Smith at kevlsmith@purdue.edu. Multiple shipping locations may be subject to shipping charges. We also can issue separate billing statements, but Purdue University rules require a minimum billing statement for 100 copies. We cannot issue invoices for fewer than 100 copies. Typically, Purdue issues invoices in January or February for the first printing and April or May for the second printing. If you have any other questions about the guides or custom covers, please contact:

Chapter 2 : PGRO Publications | PGRO

The Penn State Agronomy Guide is designed as a quick reference for information on crop and soil management, including varieties, nutritional requirements, establishment, and harvesting; storing seed and grain; and farm management and budgeting.

Chapter 3 : Midwest Cover Crops Field Guide, second edition

*Dry edible beans (*Phaseolus vulgaris*) belong to a class of legumes (Fabaceae family). Production of dry edible beans occurs primarily in western Ontario, and the*

Chapter 4 : Agronomy Fact Sheets

"Field Crop News" is an archive of information dedicated to the production of over million acres of field crops in Ontario and a forum for which producers, researchers and industry personnel can share information and ideas.

Chapter 5 : Corn | Crop Production | Agronomy | Kansas State University

The newly revised Ohio Agronomy Guide (eHO) serves as the official compilation of adaptive results and recommendations from research and educational programs. Described in this manual is information on Ohio's climate and soil, soil and water management, soil fertility, and corn, small grain, and forage crop production and management.

Chapter 6 : Agronomy and horticulture, Scott County | University of Missouri Extension

Agronomy Guide West Lafayette, Indiana For the most accurate estimation of crop residue levels, actual field measurements are recommended.

Chapter 7 : Agronomy Guide for Field Crops - Publication

OMAFRA, Agronomy guide for field crops: Chapter 2, Soybeans. In: Chris Brown (Ed.), Agronomy guide for field crops, Publication , OMAFRA, Ontario Ministry of Agriculture and Food.
