

Chapter 1 : Al Schneider Magic by L&L Publishing - Book - Tricksupply

Al Schneider Magic secures his reputation as not only one of magic's great creators but also as one of its great theoreticians. There are tricks with coins, cards, cups and balls, napkins, bracelets, finger rings, and more.

The goal for this project is more repeatability, more shock, and more practicality. We believe these goals have been realized in the Vessels and Orbs Project. Several of these routines were specifically designed to do that. The others were created for more formal, full-feature Cups and Balls performances. LA Street Cups - The mandate here is to simply be able to pick up the cups and go. There are no loads from the body which means that this routine can be done in your birthday suit if you wish though not recommended! Then, you can repeat the routine immediately in tough, real-world environments This is the perfect routine for strolling magicians and street performers and remains one of the most talked-about routines from the Al Schneider Magic book. Classic Cups and Balls - This is a formal sit-down routine with a fairly traditional presentation of three cups, three balls, and three final loads. However, a lot of sophistication is thrown in. The small ball sequences are superb and the final loads are strong enough that the entire routine can be immediately performed again OMG - This is what people exclaim when they watch this! This one-cup routine was developed for the table hopper. Carry the cup in a bag and stand by the table to do this routine. Its two phases were designed to generate the OMG response. Crystal Connection - This experiment features a three-cup formal routine with as much flash as can be put into the finish of a Cups and Balls routine. At its conclusion, two cups are lifted to reveal they are full of crystal shards. Oriental Bowl Routine - This was developed as a very formal full-feature routine. The goal was to capture the feeling and atmosphere of Japanese tea ceremonies and contains wooden bowls, large sponge balls, silks, and much pomp and flair! This could easily be used as a full stage routine! The name of the game is rapid repetition featuring just about every effect possible with sponge balls. They disappear, reappear, penetrate up and down
