Alice Springs (June Newton): Portraits News, Photo Exhibitions 13 July 0 In June's Room, on the occasion of the 95th birthday of June Newton, who worked under the name Alice Springs, are around 30 portraits, some previously unseen, from the foundation's collection.

Share via Email Twice a year, on their birthdays, June and Helmut Newton used to throw parties in Berlin for a few dozen of their closest friends. Although Helmut died in , June still keeps up the tradition: June is now in her early 80s, though she could pass for 20 years younger. He may have taken centre stage but she was central to his work - and still is. When the "king of kink" was attacked for his sexualised portraits of women, June sprang to his defence. Why, she argues, would he spend a lifetime photographing people he loathed? It was the last exhibition he worked on. He fled Germany when he was 18 and ended up in Singapore, where he worked as a high-class gigolo before being shipped off to Australia and interned as an enemy alien. After a spell in the Australian army, he anglicised his surname and resumed his photographic career. He opened a studio in Melbourne, where he met a young Australian actress called June Browne. All the other girls were really only about fucking. With her there was another dimension. In Helmut came to London to work for British Vogue. June went with him, even though her acting career was flourishing in Australia. She found work with the BBC but Helmut had a rotten time. June, however, found the language barrier insurmountable. Instead she taught herself to paint, and in , when Helmut was ill with flu, she shot an assignment for him, an ad for Gitanes cigarettes. It was the start of her own photographic career, under the pseudonym of Alice Springs chosen blindfold, with a pin and a map of Australia. Hers is clothed yet more exposed. Hers is the woman behind the mask. The most significant addition in the exhibition was a photo of June embracing Helmut on his death bed. You will only see the eyes. But I was, and I tried to steal them. And in many cases I did. June also shot the definitive film of Helmut at work. Like her photographic career, it came about by accident. She wanted to give Helmut a video camera for Christmas, but he told her he was "a still photographer, not a movie-maker", and so she bought it for herself. The result was an enthralling documentary, Helmut by June. As with her still photography, intimacy and truthfulness are its greatest strengths. The shoot was set for Monday. Do we send the clients home? What do we do? There was no priest and no religious ritual; there were bells instead of an organ. For the Germans, it was an important homecoming. Not so many Jews have been willing to return to Berlin. There are still flowers on the grave, and June and her friends have brought plenty more. There is a photograph of Helmut on the gravestone, wearing a Mona Lisa smile.

Chapter 2 : Alice Springs: Portraits - National Portrait Gallery

Alice Springs -- in reality, June Newton -- emerges just fine from the shadow of her legendary husband Helmut. Springs' portraits are simple and straightforward, never romantic or conceptual. A nice change from the photos we usually see of the well known celebrities presented here.
