Chapter 2 : Time Table, Running Schedule for Indian Railway Trains - RailYatri

Indian Railway Time Table - Find Railways Timetable, IRCTC Train Timings and Trains Between Stations. Get full information on Train Schedule, Train routes, Railway stations, arrival time.

Our simple NDTV Rail Beeps search will bring right in front of your screen, the details of the number of trains running, operative days of the trains, train timings and a lot many more options. Find Trains Between Stations Quickly The process to find the trains between stations is, as mentioned before, very simple. Using NDTV Rail Beeps search makes the entire process of finding where to travel, how to travel and when to travel, very simple. Here is how to go about it in just three simple steps. There are two search boxes. The user has to simply type the names of the two stations in them. When you write the name of the station, a drop-down menu will provide you with one or more options of the station name and the station code. Simply select the station you want. On typing New Delhi, the drop-down menu will display the option: Search Results After you complete the above process, the following search results will appear: Number of trains running between the two selected stations 2. The train station of origin 5. Scheduled Departure time 6. Scheduled Arrival time 7. The Weekly Schedule of the trains Number of days the trains run in a week 8. AC, Chair Car, Sleeper, etc With the increasing demand of getting information at your fingertips, here is the amazing ability to see trains between stations at your command, whenever you need it. And the whole process to get the information you want is very simple and completely hassle-free. The Indian Railways is the fourth largest railway networks in the world with 1,15, kms of tracks over a 65, kms of distance and a revenue of around Rs 1. All of this because around 20 million passengers travel every day in the Indian railways! Not only this, but in , an average of 13, passenger trains ran daily. The 13, trains were estimated to have carried around an estimated 22 million passengers every single day. The Indian Railways also have over 70, passenger coaches with more than 11, locomotives. To cover so much ground, trains travel all across India between many stations. Because of the vast network of railways, there is a huge demand to travel. Especially a reliable database that has information on all the different trains between stations all across India and which is also easily accessible without any difficulties. Now, Information Enquiry For All National Trains Is Easy What is also important is to get to know the trains between all the stations in an easy, user-friendly manner, as over-complicated steps should not turn away the user. Fortunately, with the way technology has progressed, gone are the times when one had to physically go to a railway station to find out information about all the different trains or even use phones to call up the railway stations and ask for information. With the spread of the internet, it has now become extremely easy to access all the information one needs on all the important trains running through the entire railway network. There are also a vast number of trains that run across the country every day. It is important that the database accurately covers all the trains that run across all the different stations. Any small error can lead to a huge loss for the user, which is unacceptable. There are a large number of trains that are searched about daily by users who need to travel between many important stations. The many types of trains are the Rajdhani, Superfast trains, Duronto, Shatabdi, passenger trains, mail express trains and the local trains that run in the metro city of Mumbai. Mumbai Local The Mumbai Local trains are the most famous of the local trains because of the large volume of people who travel across the length and breadth of the huge city of Mumbai. It is also the oldest mode of transport in the mega city of Mumbai. Luxury Trains Apart from local trains and passenger trains, there are luxury trains too. Those passengers who wish to avail premium travel would also like information on such trains. These trains have a special travel circuit and they travel between important stations where there are many different tourist spots and they also stop at many different heritage spots as well. Some of these luxury trains include the Maharajas Express, the Golden Chariot, the Deccan Odyssey and perhaps the most famous of all the luxury trains, the Palace On Wheels. The trains are specially designed to reflect the utmost luxury to the passengers who choose to travel on these trains. Garib Rath Apart from the luxury trains, the Garib Rath is also a special, one-of-a-kind train. These trains have reduced fares to make train travel more affordable for those less fortunate. The Garib Rath trains are also super fast trains which also have Air Conditioned coaches as well, so that passengers travel with the least inconvenience. The Garib Rath

beats the speeds of some express trains and some super fast trains too! Durgam Express This is one of the fastest trains in India. The Durgam Express trains are parallel to the Rajdhani and Shatabdi trains when it comes to their speed! The Durgam trains have a special ability in that they are only connected to all the major capital cities of the country and the fact that they are long-distance trains allows them to complete long distances between major stations in very short times. The NDTV database of trains between stations includes information on all of the above types of trains and the important stations that connect them. Some Interesting Facts Of Trains Between Stations With such a vast network of railway lines, there are a number of interesting facts about the different trains between stations that are sure to be of interest. For example, the shortest distance that is covered between two successive stations is just 3 kms. The 3 kms long distance is between Nagpur station and Ajni station. In contrast, the longest distance that is covered by a train is 4, kms. The distance is between the stations of Dibrugarh and Kanyakumari and the train that covers it is called the Vivek Express. The Trivandrum-Hazrat Nizamuddin Rajdhani Express train covers a distance of kms without stopping! To Download click here Latest News.

FAQ What is Indian railways train time table? Local as well as long distance train time table is the running schedule of a particular train. The train time table contains train timing - from its departure station to its termination station. Halting time for the train at stoppages along the way are also mentioned in the time table. Of what use is the Indian railway time table? It was around when the railway time table was introduced in India. The motive of railway time table is to synchronize the running of trains across India based on their route and halt stations. It made sure that no two trains from the same or opposite direction reached a platform at the same time. The train time table today gives a complete idea about the running schedule of any train in India. What are important terminologies information associated with time table? Some of the terminologies associated with Indian train time table are train name and number, Intermediate stations and Train status. Let us explain these railway time table facts for you. Train name and Number: Each train has a certain number, and they have a specific name tagged against them which may or may not be unique. This information is essential in singling out a train from thousands of others running on that same day. All the stations, which the train crosses along its route are included in a list of intermediate stations. A train might or might not have a stoppage halt at the Intermediate stations mentioned in the list. A check about train status , gives the users an idea about the present location of the train, list of the upcoming stations, expected time of arrival at the upcoming stations and the delay record of the train. Why expected Platform for Arrival is a key information in the train time table? The expected platform information allows the passengers to avoid the last minute hassles. It helps them plan their boarding and de-boarding much better. Junction stations across India have more than five platforms, on an average, and passengers may face last minute problems while running around along with their luggage, children and other stuff. The expected platform information helps the passengers plan out much better. What are the factors that may affect the train time table between two stations? There are various climate and man-made situations which can cause a disruption in the Indian train time table. Trains are heavily delayed during the winter months due to fog and monsoons due to heavy downpour. They are also hampered by road blocks, strikes, accidents en-route, and many other such factors.
