

Chapter 1 : Neverland - Wikipedia

"All the Way to Morning" By Marc Harshman Like Santa Claus, Moundsville's Marc Harshman journeys around the world in one night with his latest work, "All the Way to Morning." "It's a story of a young child falling asleep," Harshman said.

Monday, Oct 22, Presser Points - Belichick: The new issue popped up on the New England injury report late Friday and Gronkowski did not travel with his teammates to Chicago on Saturday. You never know who that player is. For example what happened with Sony [Michel] there in the first quarter, that could happen to anybody at any time, unfortunately. So we have to be prepared for those things. At whatever point the die is cast and we know it is then we go in that direction. Yeah, Josh is very, very good at that. He does a great job in preparation and planning. He does a great job in play calling, in-game adjustments and knows our offense very thoroughly, without question, and is able to adapt quickly to whatever changes he needs to make. Asked what stood out on film from one of two key plays in the kicking game, Belichick had plenty of praise to pass around. They maybe overplayed it a little bit to the kick side. Then obviously great running by C. But we had a hat on a hat. It was fairly clean through the line and then [Kevin] Toliver had a shot at him coming over from the safety position and C. Jackson each had interceptions to halt Bears drives and give their own offense extra chances to attempt to score. Belichick praised the individual efforts and plays by his young defensive backs. It was a great play by both players. We were able to get it away from them. Just not very good. He broke a couple tackles. But not very good by us in any area. There are a lot of yards to be gained when there is nobody out there. A guy just runs until he runs out of bounds or picks up a first down. There are other things involved in that. The bottom line is a lot of things could be better, need to be better. A lot of things that we need to work on. All of the above.

Chapter 2 : All the Way to Morning by Marc Harshman - FictionDB

For many years Marc Harshman taught fifth and sixth grades at the Sand Hill School, one of the last of the three-room country schools. Raised in Indiana, he has lived his adult life in West Virginia with his wife, Cheryl Ryan who is an artist, children's author, and librarian.

The novel says the Neverlands are compact enough that adventures are never far between. Peter tells Wendy the way to Neverland is "second to the right, and straight on till morning", but he is described as saying "anything that came into his head". In the novel, the children are said to have found the island only because it was "out looking for them". Barrie also writes that Neverland is near the "stars of the milky way" and it is reached "always at the time of sunrise". From afar, these stars depict Neverland in the distance. The film version repeats this representation, as the Darling children are flown through the solar system to reach Neverland. The passage of time in Neverland is similarly ambiguous. The novel Peter and Wendy mentions that in Neverland there are many more suns and moons than on the Mainland, making time difficult to track. The island is located in a sea known as the Sea of One Thousand Islands. Time freezes as soon as the children arrived in Neverland. It is accessible only via a magic portal generated by a strange sphere, where time has frozen due to external cosmic forces converging on the planet, preventing anyone living there from ageing. Peter and the Lost Boys live in the Home Under The Ground, which is accessed by sliding down hollowed tree trunks, one for each boy. A Never tree tried hard to grow in the centre of the room, but every morning they sawed the trunk through, level with the floor. At the end of the play, one year after the main events in the story, the house appears in different spots every night, but always on some tree-tops. The mermaids made no attempt to rescue him, but he was saved by the Never bird. In the Disney franchise version of Neverland, many non-canon locales are added, which make appearances variously throughout film, TV and video game instalments. The Black Castle referred to in the film is an old ruined and abandoned castle, decorated with stone dragons and gargoyles. Neverpeak Mountain is the huge mountain that is right in the middle of Neverland. According to Peter Pan in Scarlet, when a child is on top of Neverpeak Mountain, he or she can see over anyone and anything and can see beyond belief. Some small islands can be found in it, and it seems that it can communicate with the real seas, as a normal ship comes across the path of a young James Hook in The Pirate Fairy. The Home Underground has also been replaced by an intricate tree house structure which is prominent on the landscape rather than concealed, as the Lost Boys have successfully taken over their part of Neverland. The Home Underground is discovered buried and forgotten by an adult Peter in the film, underneath the new home of the Lost Boys. Thus, while more elaborate, the locations of the Home Underground and the Pirates are unchanged. Neither the redskins nor their territory appear in the film. Fairies[edit] Fairies are arguably the most important magical inhabitants of the Neverland, and its primary magic users. A property of their nature is the production and possession of fairy dust, the magic material which enables flying for all characters except Peter, who was taught to fly by the birds as described by Barrie in Peter Pan in Kensington Gardens , and later by the fairies in Kensington Gardens. They are allied to the Lost Boys and against the pirates. Tinker Bell is essentially a household fairy, but far from benign. Her exotic, fiery nature, and capacity for evil and mischief, due to fairies being too small to feel more than one type of emotion at any one time, is reminiscent of the more hostile fairies encountered by Peter in Kensington Gardens. They are also responsible for the collection of abandoned or lost babies from the Mainland to the Neverland. The roles and activities of the fairies are more elaborate in Peter Pan in Kensington Gardens. These fairies are more regal and engage in a variety of human activities in a magical fashion. They have courts, can grant wishes to children and have a practical relationship with the birds, which is however "strained by differences". They are portrayed as dangerous, whimsical and extremely clever but quite hedonistic. After forgetting how to fly, unable to be taught by the birds, see birds, below , Peter is given the power to fly again by the fairies. Barrie writes that "when the first baby laughed for the first time, its laugh broke into a thousand pieces, The "Never Fairies" and associated sparrow men live in Pixie Hollow, located in the heart of Neverland. Birds[edit] In the novel and the play, between the flight from the mainland reality and the Neverland, they are

relatively simple animals which provide entertainment, instruction and some limited guidance to flyers. These birds are described as unable to sight its shores, "even, carrying maps and consulting them at windy corners". On the island, the various birds speak bird-language, described as being related to fairy language which can be understood by young humans, who used to be birds. Lost Boys[edit] The Lost Boys are a tribe of "children who fall out of their prams when the nurse is not looking", [10] and who, having not been claimed by humans in seven days, were collected by the fairies and flown to the Neverland. There are no "lost girls" because, as Peter explains, girls are much too clever to fall out of their prams and be lost in this manner. There are six Lost Boys: Tootles, Nibs, Slightly, Curly and the Twins. They are not permitted to fly by Peter, as it is a sign of his authority and uniqueness. They live in tree houses and caves , wear animal skins, have spears and bows and arrows, and live for adventure. They are a formidable fighting force despite their youth and they make war with the pirates, although they seem to enjoy a harmonious existence with the other inhabitants of Neverland. Pirates[edit] The crew of the Pirate ship Jolly Roger have taken up residence off-shore, and are widely feared throughout Neverland. How they came to be in Neverland is unclear. Their captain is the ruthless James Hook , named after the hook in place of his right hand. The Piccaninny tribe are known to make ferocious and deadly war against Captain Hook and his pirates, but their connection with the Lost Boys is more lighthearted. For "many moons" the two groups have captured each other, only to promptly release the captives, as though it were a game. Mermaids[edit] Mermaids live in the lagoon. They enjoy the company of Peter Pan but keep their distance from everyone else on the island, including the fairies. They are not sociable creatures and do not speak nor interact with outsiders. They are malevolent, hedonistic and frivolous; yet they sing and play "mermaid games" in which they "rise to the surface in extraordinary numbers to play with their bubbles", "made in rainbow water". At first glance, Wendy is enchanted by their beauty, but finds them vain and irritating, as they would "splash her with their tails, not accidentally, but intentionally" when she attempted to steal a closer look. Their homes are "coral caves underneath the waves" to which they retire at sunset and rising tide, as well as in anticipation of storms. Like all the agencies of the Neverland, the animals do not need to eat, nor are they eaten when killed, nor do they reproduce as they enjoy the same immortality as all other inhabitants , so their presence is a paradox. There are also some briefly described locations without inhabitants, but the narrator hints at their former presence, such as a "hut fast going to decay". Popular culture[edit] In the many versions and derivations of Peter Pan, Neverland and its inhabitants have been omitted, added, or elaborated upon. In the Japanese anime , The Adventures of Peter Pan Peter Pan no Boken , the individual characters of the pirates, "redskins", and mermaids are expanded, and new characters such as the schizophrenic spellcaster princess Luna and the witch Sinistra are added. Neverland appears in Peter Pan and the Pirates. Neverland is prominently featured in the first half of the third season of Once Upon a Time. The story is referenced in the Doctor Who audio drama Neverland , where Charley compares the Eighth Doctor to Peter Pan and says that when she heard the story, she wanted to be Wendy. The Neverland of this story is in the Antiverse, where the Never people, who have been erased from existence by the Time Lords , live. The quote "second star to the right, and straight on till morning" is the course heading given by Captain Kirk in the final scene of Star Trek VI: English singer Kate Bush also references "Second star to the right, straight on till morning" in her song "In Search of Peter Pan" from her second album, Lionheart. One character keeps the windows open at night, "just in case" as her children are off fighting in the war. Geils Band mentions Never, Neverland in their song " Centerfold. Annihilator released an album and song entitled "Never, neverland" in Neverland is a indie film, a dark re-imagining of the classic of Peter Pan whose Neverland is an amusement park. Additionally, there is a location called the Noplace which is cold and devoid of colour where people in a coma and those who are "lost" live. Finding Neverland is a semi-biographical film about the author J. Neverland appears in the film Pan. This version is a floating island in a sky-like dimension.

Chapter 3 : Wednesday Headlines: Laughing all the way to the bank. - The Morning News

This was purchased for our granddaughter. I know Marc's work very well and have read all of his books. He is a very talented author and gives a very positive outlook on a variety of subject matter.
