

Chapter 1 : Academy Model Aeronautics - AMA Documents

Supporting model aviation events and clubs across the United States and around the world, we're a non-profit association supporting and uniting model aviation hobbyists. Learn more about AMA AMA Campaign Statements.

Are you ready for some drone racing? In This Episode [The league was created in April to make it easier for local drone racing chapters to organize drone racing events. MultiGP created a software system that helps race organizers manage race day. The software removes many of the logistical challenges organizers face in running an event that features multiple pilots and races. The league started in April and has grown to include fully activated chapters. There are over chapters that are fully activated or are in the process of becoming activated. MultiGP has a uniform course design so that pilots can measure their performance against other pilots worldwide, but chapters are free to develop other course designs, if they so wish. The MultiGP website includes the profiles of the pilots that are members of each chapter. There are standard specifications, but pilots are generally, very free to create their own racing designs. The organizers of the chapter events are the unsung heroes, as they are dedicating their time to advancing the race and the sport. MultiGP has 5, registered pilots. For those starting out, MultiGP provides support. Drone racing as a spectator sport is still evolving. Few people understand it, so it will take time for people to gain an understanding and appreciation for it. But with increase in marketing and media articles, more and more people are learning about it every week. A community of pilots, manufacturers and fans is starting to emerge. More and more manufacturers are developing racing drones and supporting drone racing as a sport. This will propel the sport and increase the access to racing drones to people who may not wish to build their own. It will continue to evolve as people learn about drone racing. The promotional attention that the Drone Racing League brings to the sport can benefit the local drone race organizers. Since MultiGP already has a league infrastructure in place, they may particularly benefit as people search for local racing options as they become interested in the sport. Chris talks about the challenges of growing the league and the sport. The first is maintaining communication with local chapters and supporting their efforts. The league is also creating their first World Championship race series for all chapters to participate. MultiGP has a strong interest and commitment to supporting education through drone technology. The league works with middle and high schools and has formed a strategic alliance with the American Modelers Association to advocate safety and education to young people. FPV will eclipse any other radio controlled sport that has ever happened due to the commercial application of what they do – close proximity flying of remote vehicles, which has applications in many industries.

Chapter 2 : Club Finder | Academy of Model Aeronautics

Those charts, diagrams, and text which show the area, dimensions, stations, access doors / zoning and physical locations, of the major structural members of the aircraft. Includes an explanation of the system of zoning and measurement used.

Thank You On this site, you will find information for David B. Waymer Aeromodeller Flying Field. Also on this site is information about requirements to use David B. Additionally Park Safety and Rules are located under that tab. The AMA offers many Benefits and promotes model aviation in safe model airplane operation. If you are new to model aviation and would like to learn more about the If you are new to model aviation and would like to learn more about the AMA, please click this link to find information on AMA membership benefits. If you are unsure of your current AMA membership status, you can check it here. There are two asphalt and one grass Control Line circles for flying control line aircraft. Additionally, there is a shelter with picnic style tables and an information board. A fire extinguisher and first aid kit are located at the information board. Most types of model aircraft can be flown at Waymer Field. Due to open flame restrictions, fuel turbines and pulse jets are strictly prohibited. Please be courteous to others when flying different forms of aircraft. Waymer Field is a gated Park. Opening and closing of the gate is the responsibility of Park Pass holders. Please lock the gate if you are the last Park Pass holder to leave. If there are non-pass holders it is your responsibility to ask them to leave. Dawn to Dusk Sound Restrictions: You can find detailed information in the Park Safety and Rules Tab. With this in mind please be respectful of our neighbors.

Chapter 3 : ATA - Wikipedia

In this special issue of Model Aviation focused on building, we review three kits, build the Pober Pixie, construct a giant-scale foam B, and scratch-build opposing fighters! Plus, we visit Warbirds & Classics over Michigan and deliver your favorite columnists.

Chapter 4 : EAA Has Presence at Successful AMA Expo West Show – EAA Blog

The AMA is putting the best face possible on FAA Reauthorization, saying that the changes represent a "new chapter" for the organization.

Chapter 5 : Aircraft ATA Chapters List | Aviation Maintenance Jobs and training search

Aircraft Wood and Structural Repair Wood was among the first materials used to construct aircraft. Most of the airplanes built during World War I (WWI) were constructed of wood frames with fabric coverings.

Chapter 6 : EAA's James Ray Aviation Scholarship Fund To Finance Flight Training | Aero-News Network

The Academy of Model Aeronautics (AMA) makes no warranties, either express or implied. Information in this website, including maps, URL and other web site references, are subject to change without notice.

Chapter 7 : AMA Flight School

This chapter shall include the necessary procedures to lift and shore aircraft in any of the conditions to which it may be subjected. Includes lifting and shoring procedures that may be employed during aircraft maintenance and repair.

Chapter 8 : Homepage | Academy of Model Aeronautics

AMA District III News: AMA Clubs and EAA Chapters inspire next generation of aviators As model aviation enthusiasts, we should always look for ways to grow our hobby. I hear complaints that no one, particularly young people, is interested and that our hobby is dying.

Chapter 9 : Evansville Radio Control Model Aircraft Club

Introducing the AMA Alpha! The Alpha is a rubber-powered airplane that provides amazing flight duration, controlled flight, and can easily be disassembled and taken home to fly again.
