

**Chapter 1 : Blue Bloods Series by Melissa de la Cruz**

*Blue Blood, True Blood: Conflict & Creation and millions of other books are available for Amazon Kindle. Learn more Enter your mobile number or email address below and we'll send you a link to download the free Kindle App.*

The main character of the series, she must help solve the mystery of the Blue Bloods slayings, and the existence of their ancient rivals, the Silver Bloods. Her "bondmate" is Charles Force, but she forsook her bond with him to be with her "human familiar", Stephen Chase. According to the Repository files, she subsequently fell into a coma when Schuyler was three. The most powerful of the seven messengers. He is "Enmortal" and therefore does not adhere to the cycles of birth and death as other vampires do; he remains in the same physical shell for centuries. Romantically linked to Bliss Llewellyn. After Jack forsook their bond, she chose to be with her true love, Kingsley Martin. He changed his last name to Force after Allegra broke their bond. Her bondmate, Salgiel, was lost during the Great War in Rome. The first victim of the New York slayings by the Silver Bloods. Twin sister of Deming Chen. Twin sister of Dehua Chen. Are also the Twin Angels of the West Winds. They have excellent speed, high intelligence, a photographic memory, and enhanced senses. When victory was nearly within reach for Lucifer, the twin angels Abbadon and Azrael, his most loyal lieutenants, stood down, an act that was soon followed by many others. They betrayed Lucifer and turned to Michael, but it was too late to save themselves. Banished from Heaven, the angels awoke on Earth as immortals, cursed to survive on human blood and to live forever through cycles of reincarnation. Gabrielle chose to descend to Earth out of love for them, and was joined by her heavenly twin Michael, who could not bear to live without her by his side. They were called the Uncorrupted, as they were not vampires by sin, but by choice. Together, Michael and Gabrielle created the Code of the Vampires, the rules that they would all follow through the centuries to bring peace and beauty to the world, with the hope to one day be forgiven and be allowed to return to Paradise. Silver Bloods[ edit ] Fallen angels who have remained loyal to Lucifer and have no desire to return to Heaven or to follow the Code, Silver Bloods each have the strength of a thousand vampires. Instead of feeding on humans, they fed on their fellow vampiresâ€™the Blue Bloodsâ€™consuming their souls and memories; this act led to a life of turmoil and misery, and turned their blood silver. This causes them to appear schizophrenic. In past centuries, they had been enslaved by the Blue Bloods on Earth, until they rose up and fought against them in a ruthless massacre. Michael declared war against Lucifer and his followers, eventually banishing Lucifer into Hell, securing him behind 7 impenetrable gates. Blue Bloods[ edit ] Publication Date: March 27, Schuyler Van Alen never fit in at Duchesne, her prestigious private school, preferring grungy, thrift-like second-hand clothes to expensive designer labels, and living in a decrepit old mansion with her grandmother, Cordelia, the only family she has. While most find her strange, she is content with her life and her two only friends, Oliver Hazard-Perry and Dylan Ward. But when Schuyler turns fifteen, her life suddenly begins to change. When she arrives, she finds that she has more in common with her classmates than she thought. She is a Blue Bloodâ€™a vampire. A society of powerful and influential Americans whose ancestors can be traced back for centuries. Schuyler and Oliver, whom she learns is her human Conduit, are suddenly thrown into a race to find the answers to the questions that she, and everyone else is asking. Have their ancient enemies, the Silver Bloodsâ€™vampires who prey on vampiresâ€™suddenly returned after having thought to be vanquished? After a tragic attack involving Cordelia, Schuyler soon finds that she herself is in danger, and that she has a long journey ahead of her that will take her to every corner of the world. Masquerade[ edit ] Publication Date: May 1, Schuyler and Oliver have traveled to Venice , Italy, in search of her grandfather, Lawrence Van Alen, who is said to have the answers she is looking for to solve the mysteries of the Silver Bloods. Schuyler attends the ball with the hopes of seeing Jack Force, her forbidden crush, but he barely acknowledges her. After the ball, however, Schuyler receives an invite to a secret Blue Blood masquerade ball, covertly organized by Mimi Force. Schuyler attends, again with the hope of seeing Jack. When she is kissed at the party by a mysterious masked vampire, she presumes that it is Jack, only to later suspect it was someone else. Bliss Llewellyn meets a masked gentleman, hoping that he is Dylan Ward, who had disappeared during the speculated return of the Silver Bloods. When Schuyler returns home, she is

thrilled to find that Lawrence has returned to New York. The lives of the young vampires continue to become more mysterious, with Bliss experiencing recurrent blackouts, visions of a man in a white suit, and a menacing voice that only she can hear, while Schuyler is growing weaker as her mixed blood complicates her transformation from human to vampire. When Lawrence learns that Schuyler needs to take a human familiar in order to stabilize her transformation, an act that is not allowed until the vampire has turned eighteen, he suggests that she choose Oliver. Her plan turns into a disaster that puts countless others in danger, and her blood legacy into question, forcing a blood trial. Could the allegations against Mimi possibly be true? Revelations[ edit ] Publication Date: Charles forbids Schuyler to have any contact with her grandfather or her best friend, Oliver. Knowing that her heavenly bond with Jack is being put at risk, she aims to make life miserable for Schuyler, as well as keenly planning her ceremony with Jack in the hopes that she can still save their bond. Schuyler and Jack begin to contemplate the outcome if he were to forsake his bond and stay with Schuyler. Schuyler knows that because she has now taken Oliver as her human familiar, he is forever devoted to her, and whichever choice she makes will have consequences. Bliss does not tell anyone about seeing Dylan, who has returned ragged and almost sickly, as she is still torn between her love for him and her fear of what the conclave would do to him if they knew. Bliss had always been treated as the favorite child, with Jordan often pushed to the background, even by her own mother, BobiAnne. While he is gone, she communicates telepathically with him, but it brings her no peace. When more members of the Conclave travel to Rio, both Oliver and Schuyler, who is said to be the key to defeating the Silver Bloods, secretly follow them. But once the Conclave arrives for a gathering, a mass attack against them takes place that further endangers the future of the Blue Bloods. The majority of the conclave members slaughtered, it is discovered that Nan Cutler, the Regent of the Coven was a Silver Blood traitor all along. They were soon attacked by Lucifer himself when they reached the top of the mountain and in their battle, Lawrence was stabbed with a poisoned sword, destroying any possibility of future reincarnations. The battle is bloody, and when the violence ends in a heart-breaking outcome, Schuyler is once again in danger. More than a year has passed since the battle in Rio de Janeiro. Their travels soon take them to Paris, where they attend a party thrown by the European Conclave. He tries to convince Schuyler to come home to no avail, but when her physical health continues to deteriorate, she agrees and returns to New York with Oliver. She travels with the Lennox twins, and with Kingsley Martin, whom she begins to discover she has a deeper connection with than previously thought. When their journey takes them back to Rio, they finally discover Jordan, except they find that her body has been abandoned and that Sophia has taken on a new living form. She returns to New York City for her senior year, and despite her feelings for Kingsley, she continues to make sure that her imminent bonding ritual with Jack draws ever near. After returning home, Schuyler learns that her mother, Allegra, has finally awoken, and she rushes to the hospital to see her. When Allegra informs her daughter of The Van Alen Legacy, Schuyler must inform the seven gatekeepers that Lucifer and Leviathan are plotting to open the Gates of Hell so they may be released onto Earth. Allegra claims that she now must find Charles Force, who was last seen battling Leviathan in an underground labyrinth. She has learned the stunning secret of her origin. Before the ceremony, she discovers that a small piece of glass hidden in her bouquet is the sword of Michael, the same sword that Jordan had used in her attempt to stab her. The bonding ceremony, however, goes terribly wrong, and Lucifer himself appears. His presence forces Jack, Schuyler, Mimi, and Kingsley into the glom: The only one that does not make it out of the glom is Kingsley, who becomes trapped in the underworld. Misguided Angel[ edit ] Publication Date: Mimi Force has been elected as the new Regent of the crumbling Coven, which, thanks to an internet video release of the teen vampires at a party, is at risk of being exposed to the Red Bloods humans. Meanwhile, she has begun working with Oliverâ€”an unlikely situation due to their rocky relationshipâ€”and the Lennox twins in order to find a missing teenage vampire who has been kidnapped and threatened with being burned alive. The Conclave covers up the secrets of the video by making the public believe that it is a new movie trailer, and assign certain members to work on production. This provides a cover-up, but does not fix the real problem at handâ€”someone knows far too much about them, and has every intention of using it against them. Help with the kidnapping soon comes from a Chinese Venator named Deming Chen, who must solve the mystery of the kidnapping before one of their own is

destroyed. She is quickly thrown into untangling a web of lies and secrets regarding the kidnapping, facing an unforeseen twist when she thought she had all the answers, yet ultimately finding who is responsible for threatening their world, and why. Mimi learns that Jack has been found by the Venators that she had sent to look for him, but he refuses to turn himself in. While she is pleased that her brother is ready to face his fate, she is also planning to travel to Hell to rescue Kingsley, with Oliver by her side. *Lost In Time* [ edit ] Publication Date: Jack and Schuyler have traveled to Egypt in an attempt to find a solution to the impending blood trial, the confrontation between Jack and Mimi in which only one can survive. The two of them search Alexandria for one of the gates along with its gatekeeper, Catherine of Siena. Mimi still has every intention of making Jack pay for breaking their bond, but she first wants to rescue Kingsley Martin. When they find Kingsley, she is shocked to find that he appears to be content living in Hell and appears to have lost all interest in her, much to her dismay. Allegra Van Alen has developed deep feelings for Ben, but forces herself to attempt to stay away from him before it progresses too far. She knows that she is the true bondmate of Charles Van Alen, and the two of them are meant to be together. Charles knows what is happening between the two of them and tries to keep Allegra on the right path and protect her from making a dire mistake, but she cannot help but be drawn to Ben. Even though she is plagued with visions of her lying unconscious in a hospital bed as a result of her temptations, she cannot turn her back on love. Jack finally confronts Mimi to face his fate, but he has learned what they must do in order to permanently break their bond so neither of them will have to perish, and they ultimately make a very dark decision to once again give their loyalty to Lucifer. *Gates of Paradise* [ edit ] Publication Date: January 15, *Gates of Paradise* tells the stories of Mimi, Schuyler and Bliss in their final struggle against Lucifer. *Keys to the Repository* companion novel [ edit ] Publication Date: June 29, This book is a "companion novel" and not a part of the story told in the seven-book series. This book is structured as a set of files from the Repository of History, a Blue Blood establishment below the streets of New York City. These files contain detailed descriptions and information on the characters in the series.

*Blue Blood, True Blood has 82 ratings and 7 reviews. Nadine said: What a terrific read! Not often does one learn about what goes on to do with the illumi.*

Is my blood blue? Your blood is actually red. The blue hue of your veins has more to do with how your eyes absorb and see color than the color of the blood itself. The level of oxygen in your blood cells determines the brightness of the red color. Blood pumped directly from the heart is oxygen rich and bright red. As the blood circulates the body and oxygen is removed by tissue, the blood grows darker. For that reason, blood returning to the heart and lungs often has a dark red appearance. Do I need to drink 8 glasses of water a day? Additionally, the water you take in on any given day comes from many places, not just glasses of water. Fruits and vegetables contain water, as do other beverages like tea, coffee, and juices. Just listen to your body. The amount of water you should aim to drink depends on your physical activity, your diet, your weight, your health issues, and even where you live. Can I sweat out toxins? As that water evaporates, it helps cool your body and prevent overheating. Sweat is primarily water. A very small portion of the fluid is made up of salt, carbohydrates, proteins, and other minerals from your body. Sweat contains no toxins. Your kidneys and liver are designed to filter and remove any toxins from your body. This includes heavy metals and drugs. This could be dangerous, even deadly. Your body is designed to remove toxins without your help. This myth comes from a common misconception about how vaccines work. Vaccines contain weakened or dead strains of a virus. You may still experience some minor symptoms, such as a fever. If you come into contact with the live virus in the future, your immune system is equipped to defend against and defeat the virus. Full immunity from a vaccine can take several weeks. Can going out into the cold make me sick? Germs make you sick, not weather. In order to get sick, you need to come into contact with germs or viruses. Cold temperatures outside drive people inside. Being around more people provides more opportunities for germs to spread. Dry air from central heating systems also makes it easy for viruses and germs to survive longer, get into your nasal passages, and start an infection. If I swallow gum, will it stay in my stomach for 7 years? If this myth were true, many people would be carrying around a bit of extra weight from accidentally-swallowed gum. Fortunately, this myth is false. If you swallow a large clump of gum or a lot of pieces of gum in a short period of time, the gum could block your digestive tract, but this is unlikely to happen. Does shaving make my hair grow back darker and thicker? The first time you shaved your armpits or your face, the hair was likely thin and wispy. Over time, that hair grew back a bit thicker and coarser. This hair growth could be a sign of an underlying medical issue.

**Chapter 3 : Blue Bloods (Official Site) Watch Full Episodes on CBS All Access**

*Preface. As far as the history of this planet is concerned, you can consider that everything you ever learned is a complete [www.nxgvision.com](http://www.nxgvision.com) history and science books are rewritten to accommodate the agenda of the controllers of this planet.*

When a series of drive-by murders occur after six wrongly convicted men are released from prison, Danny and Baez wonder if they were orchestrated by the men as an act of revenge. Also, Frank combats the guilt he feels about these innocent men unfairly serving nine years in prison, and Jamie and Eddie find themselves in a life-threatening situation. Frank is giving a question answer with the press and one woman asks if he can comment on the 5 million dollars settlement awarded to the so-called prospect park six. Garret jumps in and says for those of them who were not covering this office when this crime was committed, a gang rape took place the night after Frank was sworn in. Danny and Maria are on the scene of a shooting, a man drove up and shot a woman named Ida in the head in front of witnesses. Erin is walking with Monica when someone shoots her. Jamie speaks to Anthony and asks him if he could speak to the city law department and give Lewis a break since his brother Manuel was one of the prospect park six. There is another victim, a year-old girl and Frank thinks these assassinations are tied to the prospect park six, their release, their reward. Danny continues with Brandy and Maria leaves the room when she returns she announces that Randall died nine days ago, he is not the guy they are looking for. Jamie and Eddie go to Mrs. Frank gets home and Henry, Erin, Jamie, and Danny are there – they discuss the case. Danny gets a message, an off-duty officer was just shot while walking her dog. He says there was a guy, one of the six, called Dewan Wilson who he treated badly in a cell. Jamie and Eddie go back to the Escobar apartment and see them moving out, Manuel is there and Jamie says to say hi to Dewan when he sees him, he leaves a card for him. It turns out the officer who was killed when walking her dog, her father was the lead detective in the prospect park six case. And, the year old that was killer, her mother was one of the arresting officers in the prospect park six case. Manuel visits Jamie, says he is in touch with Dewan and thinks there is something going on with him because his texts are weird; Manuel agrees to give Jamie the phone number. At the station, they trace it and find that Dewan has been in Miami. Danny calls Dewan, he freaks out that he has his number – then Danny walks in while Dewan is having a message. Danny handcuffs him and tells him he is taking him back to New York. Eddie and Jamie are driving in a squad car when they stop to get a coffee, Eddie goes in a cafe to get coffee and tea when she sees a guy in black car driving up to Jamie and the guy shoots him, but thankfully Eddie runs out of the cafe and alerts Jamie just in time, he ducks and is ok – Eddie shoots the other guy and he is DOA. At dinner, everyone is waiting again for Jamie to arrive, he is a bit late but he is there. Jamie brings Eddie to dinner and tells everyone that she is the future Jamie Reagan. Frank welcomes Eddie to the family, she calls him dad and everyone laughs.

**Chapter 4 : Blue Blood, True Blood: Conflict and Creation by Stewart A. Swerdlow**

*Blue Bloods is a drama about a multi-generational family of cops dedicated to New York City law enforcement. Frank Reagan is the New York Police Commissioner, and heads both the police force and the Reagan brood.*

The Sirians were at war with the Orion system. This hostility exists to this day. It is intriguing since the beings in Orion were once very human, as Lyraen colonists, and then were taken over by the Reptilians. However, the Sirians and the Reptilians trade with each other and the beings from Sirius A sell weaponry to the Dracos! A complex political situation indeed. The comet also caused the planet Uranus to flip on its side. It is the only known planet that rotates north-South instead of East-West. The Draco bases there today still have no hesitation to shoot down a NASA probe, although increasingly as the US government becomes a satellite of the shape-shifters- they begin to let a few Earth probes in. This meeting took place outside of the Milky Way Galaxy with a neutral council because all civilizations within the Milky Way Galaxy were in some way connected to the fighting, and all had some sort of stake in belonging to the winning side. Interesting prequel to letters from andromeda from Alex Collier author of " Defending Sacred Ground ". The Hatona Council convened for many decades as the fighting continued in this solar system. Finally, with their intercession, an agreement was reached between some of the human factions and the Reptilian Earth colonists. Keep in mind that this agreement was without the participation of the Reptilians from the original Draco Empire. The agreement stated that a new breed of humanity would be created on Earth that would contain the DNA of all interested parties who participated in the "peace" process. A designated area on Earth would be set aside for the creation of this new species. The Earth-based Reptilians of Lemuria agreed to this under the condition that the Reptilian body be the foundation for this new being. This is why the original Bible states, "Let us make man in our own image. To achieve a new species from a Reptilian androgynous body, it was necessary to separate the genetics into male and female components. This is the allegorical story in the Bible of Adam and Eve. Creating Eve out of the rib of Adam is actually the story of separating the androgynous Reptilian body into male and female. This is also why human fetuses go through Reptilian-style development in the womb before looking humanoid. Many prototypes were developed over millennia. Under the supervision of the Hatona Council, races were created and then destroyed when it was not acceptable by all parties. This explains why ancestors of mankind appear and then suddenly disappear in layers of archaeological analysis. Twelve humanoid, and one Reptilian, groups donated DNA for this purpose. Hybrids were also developed on Atlantis and Lemuria. The African versions were created by beings from a nomadic, artificial planet known as Nibiru , or Marduk. These Reptilian-like beings travel in a manufactured world looping our solar system. The Sumerians called them Anunnaki. The cosmic joke to this project is that all of the groups donating DNA secretly programmed sequences to cause their genetic strand to be predominant. This set the precedent for eternal conflict. Humanity was doomed to fight and be controlled. No one group would ever be in charge. The project was doomed for failure before it even began! Such DNA programming invites tyranny and oppression. Soul-personalities attracted to such a planet have a victim mentality. Many advanced cultures call Earth a prison planet, and dump their criminals here as punishment. DUNE was a prison colony, like Australia. Earth fits the archetype. The current expression of the 2 brothers still tossing nuclear bombs then called East of Eden, today called the Middle East Conflict, may be a perfect healthy fractal of the Orion Wars, with the main warring galactic elements all nicely staged to work out a galactic conflict in a micro-cosm. This may be more however than a tempest in a teapot, because the galactic players appear to be willing to up the stakes with more intervention if their chess piece starts to lose. Enlil as Yahweh the encoder in Bible Code may not be willing to stand aside as his Israel under the hex Draco flag is destroyed by yet another nuclear blast. Israel was originally the genes of Enki when his Thoth Ptah line Akhanaton, took the gold from Egypt, assuming the Moses identity to start the Essenes. The Reptilians ensured that the new Man would be forever attached to the Reptilian frequency because the foundational prototype was Reptilian. This meant that the new Man could easily be mentally controlled by them. Upon discovery of this information that the Reptilians wanted control of the new race, the Atlanteans began a severe electromagnetic bombardment of Lemuria. This bombardment

caused the bulk of the continent to submerge into the ocean, now called the Pacific Ocean. Inner Earth became the "homeland" for most of the surviving Reptilians of Lemuria. Here, they created a vast underground civilization. This started the legends of hell and demons living in fire under the Earth. They built tubes containing fast, subway-like vehicles that can travel to any point on the Earth within a few hours. They created the famed underworld cities of Akkadia, Agartha, Hyperborea, and Shamballa that are sought by explorers to this very day. These cities are built along the inside wall of the inner crust that lines the interior of the Earth. Remember, the hollow Earth is not a theory, but a scientific fact caused by the cooling and spinning of a planet as it is ejected from a star or sun. The primary entry points to the inner Earth are via the North Pole, where there is an opening of miles, and the South Pole, with an opening of miles. These can be seen from space. That is why commercial aircraft are not allowed to fly over these areas; not because of magnetic disturbances, which is the "official" reason. Admiral Byrd reported on these openings in the 1940s until his information was concealed by the government. At the very centre, or nucleus, of inner Earth, there is a globe of energy left over from the creation of this planet that acts as an inner sun. It is the light from this object suspended by gravity and centrifugal force that causes the light of the aurora borealis. Numerous cave entrances to the inner Earth exist in the Rocky Mountains and Sierra Mountains in the western United States, as well as less numerous openings in the Ozarks and Appalachian Mountains. Entries also exist in the Alps, Himalayas, Andes, and the Caribbean. There are also numerous sub-oceanic entry points, particularly in the deep trenches of the Pacific Ocean, the Caribbean Sea, and the Atlantic submarine mountain ranges especially on or near the Azores, Canary Islands, and the Falklands. All of these areas are closely guarded by local governments and N. Artificially created entrances exist under the new Denver airport, the Giza Plateau in Egypt, major Air Force complexes around the world, and many of the Temples in India and China. A major Chinese entry point is under the Shensi Pyramid that is out of bounds for everyone in Western China. Of course, with the Reptilians off the Earth's surface, the Atlanteans were free to play with this new mankind and establish humans as the ruler of this planet. They established colonies all over the remaining portions of land. They invited the Sirians to come and play with them. They booted the Marduk beings off-world and took control of their slaves. They created new hybrids for sea and land, one of which became the Merfolk, a genetic blend of human and dolphin. The dolphin species was brought here from the Andromeda Galaxy to monitor all of these events. Whenever the Atlanteans detected underground Reptilian activity, they blasted the inner Earth with lasers and electromagnetic pulses to kill them. Unfortunately, this weakened the upper crust of the Earth's top mantle riding over the trapped magma between the upper and lower crusts. After several millennia of these attacks, the Atlantean continent started to break up. Their civilization began to break up as a reflection of the physical deterioration of their continent. The Atlanteans became even more belligerent as fear and destruction overtook their mind-patterns. Black magicians and sorcerers took the place of scientists and religious leaders. Fortunately, the population foresaw the destruction that was coming. Many refugees relocated to what is now Egypt, Peru, the Appalachian Mountains and Western Europe, just before the continent collapsed into the upper crust of the Earth. This collapse caused the Earth to flip on its axis, creating the legend of the Flood written about in the Bible, and in other world cultures. This catastrophe was used as a window of opportunity by the groups that donated DNA to create mankind. They immediately began reorganizing the humans into new groups that became the basis for future nationalism. The Sirians helped to create the ancient Egyptian culture. Those from Tau Ceti organized the Slavic culture. The Rigelians were busy in China and the Orient. While all this was transpiring, the Reptilians saw an opportunity and seized it! For further details of the flow of genetics and an alien intervention in mankind, please refer to the Milky Way Galaxy chart on the book. The inner Earth provided a subterranean locale for the Reptilians to regroup and formulate plans to retake the surface. At this point, the Reptilians were completely cut off from their home in the Draco constellation. Their spaceship, the Moon, was in human hands. They were alone, isolated on a now hostile planet. They needed to defend themselves. They developed a plan to insidiously retake the surface by blending their genetics with the genetics of the surface humans. Because the human prototype already had Reptilian genetics, it was easy to access the mind-pattern. The Reptilian frequency was already established in the brain stem as well as the Reptilian brain section of these hybrid humans. The population of Sumer was chosen as the starting point.

These humans were primarily descendants of the Martian, Maldekian, and Lyraen refugees. The Reptilians have a preference for the genetics of blonde-haired, blue-eyed people whose mind-patterns and genetics are so easily controlled. They abducted members of the ruling classes , including political leaders. Using these humans, they began a new hybridization program that took several generations to perfect. This would produce a human-looking Reptilian that could easily shapeshift from Reptilian to human, then back again.

**Chapter 5 : Selected excerpts from: Blue Blood, True Blood, Conflict and Creation - 1**

*Commentary added by Dan Winter in italic letters. Otherwise is directly quoted from Stewart Swerdlow's books as itemized.*

I picked a couple of comparatively moderate ones, the sentiment dialed back to 3 or 4 on the goo meter. If you are in any doubt just how saccharine and cloying such expressions can be, try finding a Hallmark birthday card that accurately reflects your thoughts about spouse, child, parent or sibling. The current generation is building families approximately only two-thirds as quickly as the generation before them, and at roughly only half the rate of the generation before that. So among the usual Facebook sentiments we find things like this: The ones who would do anything to see you smile and who love you no matter what. And on the face of it, how terrible is that really? I know people with horrible families who struggle to maintain the relationship out of duty or innate decency. I know people who are estranged from their families. I have one friend who was abandoned then adopted, and now views his adoptive parents as family. I know of other adoptees that, upon discovering they had a living birth parent, exhausted considerable resources and emotional energy attempting to bridge that dead family connection. Sometimes “happily not always” they are code for the abandonment of standards entirely. Christianity, as it often does, provides a sane alternative to two extremes: It is impossible as a Christian to shrug off the duties we owe to those to whom we are blood relatives in favour of spending our time and money exclusively on people who make us feel good instead and pretending they are our families. The Lord taught the importance of duty to our blood relatives. While the Pharisees allowed a son or daughter to take the financial support they owed to their parents under Old Testament law and give it to the temple or synagogue instead, the Lord rightly condemned the practice. Paul reinforced the importance of duty to family to Timothy: Happily, the Scripture provides an antidote to the opposite error as well. One sometimes wonders how eldest grandson Danny, his wife Linda and their two boys have any kind of family dynamic of their own. One wonders how a real family with this level of time commitment to one another would maintain any close friends or attachments outside of the clan or show hospitality to anyone at all the Reagan family meals are notoriously free of outsiders. The Reagans perform their time-bending miracles against a backdrop of reasonably devout Catholicism, but I would love to see anyone who commits more than an hour a week to his or her Christian life pull off this sort of extravagantly ritualized extended family life without other aspects of their Christian walk getting short shrift. Yes, I realize that this is TV, not real life. But there are people who actually live like this. The whole extended family sits together in church, goes home together afterward, and its members interact minimally with other believers while there. Again, the teaching of Christ provides the cure: And whatever we give up for the Lord, no matter how trivial, he promises back a hundred times over. I know whereof I speak on this subject: These little sacrifices are characteristic of many friends and members of my own extended family. Should we not be imitators of him in this respect? The Lord certainly taught that there is a family relationship among believers that transcends blood relationships. In accepting you for what you are, it acknowledges that you never need to change in any way and abandons any effort to modify your conduct except when it becomes especially irksome in which case it may on occasion lose its philosophical composure somewhat. If you are truly saved, you can never lose your salvation. That, too, is another post. What you can certainly lose is the pleasure and appreciation of fellowship with other believers when you insist on clinging to a cherished sin. And if you choose that sometimes-more-difficult road, I can assure you that there is very little in this world as consistently challenging, intellectually stimulating, rewarding, encouraging, supportive and comforting. There is very little for which I would trade the rewards of life in the family of God.

### Chapter 9 : Blue Blood | Definition of Blue Blood by Merriam-Webster

*"Blue blood" is an English idiomatic phrase for "noble birth." The term is an English borrowing of the Spanish phrase, sangre azul, ("blue blood"). Spanish nobility used sangre azul to differentiate between classes of nobility descended from the Moors and those descended from the Visigoths.*
