Chapter 1 : Solutions Manual for Investments

*But now, with the Investments 9th Solutions Manual, you will be able to * Anticipate the type of the questions that will appear in your exam. * Reduces the hassle and stress of your student life.*

Chapter 2 - Asset Classes and Financial Instruments 6. Municipal bond interest is tax-exempt at the federal level and possibly at the state level as well. When facing higher marginal tax rates, a high-income investor would be more inclined to invest in tax-exempt securities. You would have to pay the ask price of: The coupon rate is 3. In this case, the yield to maturity is 2. Students will learn in a later chapter how to compute both the price and the yield to maturity with a financial calculator. In the absence of a split, Stock C would sell for , so the value of the index would be: After the split, stock C sells for Therefore, we need to find the divisor d such that: The divisor fell, which is always the case after one of the firms in an index splits its shares. The return is zero. The index remains unchanged because the return for each stock separately equals zero. The return on each stock is as follows: In an equally weighted index fund, fund, each stock is given equal weight regardless of its market capitalization. Smaller cap stocks will have the same weight as larger cap stocks. The challenges are as follows: By design, many of the transactions would be among the smaller, less-liquid stocks. The call option with the lower exercise price has more value than one with a higher exercise price. The put option written on the lower priced stock has more value than one written on a higher priced stock. The contract multiplier is There is always a possibility that the option will be in-the-money at some time prior to expiration. Investors will pay something for this possibility of a positive payoff. Value of Call at Expiration Initial Cost 0 4 0 4 0 4 5 4 10 4 Value of Put at Expiration Initial Cost 10 6 5 6 0 6 0 6 0 6 Profit -4 -4 -4 1 6 Profit 4 -1 -6 -6 -6 A put option conveys the right to sell the underlying asset at the exercise price. A short position in a futures contract carries an obligation to sell the underlying asset at the futures price. Both positions, however, benefit if the price of the underlying asset falls. Chapter 2 - Asset Classes and Financial Instruments 4. The after-tax yield for the taxable bond is: If the after-tax yields are equal, then: The broad market place is divided into Money Markets and Capital Markets. The chapter begins with Money Market characteristics and examples of Money M oney Markets instruments. It then moves to longer-term Capital Markets. The four subdivisions of Capital Markets are discussed: Longer-term bonds, equity, futures and options. The student should have an insight as to the interpretation, composition, and calculation process involved involved in the various market indexes presented on the evening news. The student should have some understanding of the basics of options and futures. For example, commercial banks are the major participants for many of the instruments. If students have adequate backgrounds from prerequisite classes, discussion of characteristics of marketability, liquidity, and default risk may be appropriate. The mortgage mortgage backed market has grown grown rapidly in recent years. Equity Securities Two key points are relevant in the discussion of equity instruments. First, it should be emphasized that with the issue of common stock owners having a residual r esidual claim to the earnings of the firm. The priorities of debt holders and preferred stockholders are contrasted with common shareholders. Second, the differences in preferred stock and common stock dividends should be emphasized. Preferred shareholders have a priority claim to income in the form of dividends. Preferred stockholders are limited to the fixed dividend while common shareholders do not have limits. The partial tax exemption on dividends of one corporation being received by another corporation is important in discussing preferred stock. A brief discussion on depository receipts can introduce international investing to the students. The major factor to contrast c ontrast in the discussion is whether the index is price weighted or market value weighted. The third possibility is equal weighting. It provides an example of a market-value-weighted market-value-weighted index as compared to the price-weighted price-weighted average computed in Example 2. The examples of market-value indexes used in the text shows their diversity. The international indexes represent the most popular indexes used by investors. All All rights reserved.
