

Chapter 1 : Israel, Canada Sign 'Historic' Free Trade Deal | United with Israel

The Canada-Israel Free Trade Agreement is a free trade agreement between Canada and Israel.

It continues to serve as the foundation for expanding trade and investment between the United States and Israel by reducing barriers and promoting regulatory transparency. In December , the Joint Committee met to exchange views on issues and concerns related to agricultural market access and telecommunications and government procurement, among other topics. Both governments acknowledged the progress and collaborative work that has taken place since the last meeting of the Joint Committee in Washington, DC which was in October . At the meeting, the United States and Israel agreed that the two sides would explore discussions of a mutual recognition agreement on telecommunications and explore concerns voiced by U. They also made progress on a number of market access issues related to standards, customs classification, and technical regulations. Both sides agreed to continue the dialogue through the U. Recognizing in the s that the FTA had not served to liberalize some aspects of bilateral agriculture trade, the United States and Israel concluded an Agreement Concerning Certain Aspects of Trade in Agricultural Products ATAP , which provided for duty-free or other preferential treatment of certain agricultural products. The agreement was extended through , and a new agreement was concluded in . In December , the two sides agreed to extend that agreement for a second time, extending through December 31, . Despite the impasse over agricultural free trade, during , technical experts from the United States and Israel worked together to resolve some existing agricultural trade concerns. The Israelis removed a longstanding obstacle to U. However, many technical barriers still remain for U. According to the Department of Commerce, U. Goods exports to Israel supported an estimated 40 thousand jobs in latest data available. The top export categories 2-digit HS in were: Travel, transportation air , and intellectual property industrial processes and computer software categories accounted for most of U. The five largest import categories in were: R and D services, transportation, and travel categories accounted for most of the U. Trade Balance The U. Sales of services in Israel by majority U.
