If any link is not working Please feel free to Comment, We will try to fix it. Comment if you like it or want to give any suggestion. These books are basically for CBSE Board but most of the state boards had also adopted the pattern and Content of these books. The time where the students had limited options for choice of NCERT textbook solutions, especially for Math and Science, has gone, but now with many choices, available students are dangling between which to choose. Mission behind providing the books for free Our motto is providing all the NCERT books for free to everyone and for this, we are ensuring you that you are going to get the books from class 1 to class 12 for free. All our links are working fine and one-click downloads of the books are available. Our team has given its best effort to make sure that all the books must be downloaded without any technical issue. Our team has chosen the best way to ensure that the readability of the books should be improved and It should be more interesting than previous for the students to read and learn from the books very easily. The choices made in each edition are from the experts keeping in mind the authority and detail of content. This question might have come in your mind. There is a concrete reason behind it. It is always advised to start from standard 6 NCERT texts and read up to standard 12 texts for all relevant subjects. They are easy to study, and also helps to save a lot of time. Mistakes are rarely found any and checked numbers of time before its publication. NCERT books are written by experts in their respective fields after many research. Source of information of NCERT books are genuine and information are provided by government agency and institutions. NCERT books cover topics in a well-framed manner. NCERT books start with basics then they go to advanced level. Knowing what to read and how to read are two different things. In this method, you have to read all books from the specific class and after completing them then proceed to next class and in the same way to next class. Example-Start from class 6 NCERT books then read and complete all subjects history, geography, civics political science and science after completing all subjects move to next class class 7 and again read all subjects of class 7 NCERT Books. In this method, you have to first complete any one subject from any class then move to next class and read the same subject which you have read in previous class. Example-Start from class 6 take any subject for example science then complete it and after reading the science book moves to next class 7 and read same subject Science and after completing it move to next class and again choose science subject. If you read NCERT books subject wise you will understand subject easily and your basic knowledge gets stronger in any subject. In contrast, if you read NCERT books by the first method that is class wise you will get less knowledge because this method creates the gap between the same subject. To understand the above question, understand the simple logic: If you read NCERT books with full concentration then you will cover it in two to three months months. If not with much focus and concentration it will take too much of time may be months four to six months. It will take two months to three months, not one month because you have to read around 44 NCERT books even if you complete one book in one day it will take more than one month. Time depends on your hard work, concentration, and caliber. Take interest while reading and enjoy the chapter. Instead, read them till your mind absorb the subject matter without any stress. When completed, again revise the chapters of your interest within days. Revision is the key, so keep revising them very frequently. This method will definitely work. If you love technology and smartphone, then you should know what Google is going to bring in Next Google smartphone is releasing in October , yes, the Google Pixel 3 is coming soon. The questions and answers given in NCERT textbooks at the end of each chapter are not only important for examination but also essential for understanding the concepts in a better way. Hence, we will tell you that you must read the NCERT books which are very essential for all the examinations. We recommend you to make the notes for every chapter and read it carefully to get success in the exam. These model solutions provide in-depth and step-by-step solutions to all questions in the NCERT textbooks and are an irreplaceable support to students that will help them in learning, working on assignments and preparing for exams. I love helping people and providing free education.
