

Chapter 1 : Common Core Resources for Special Education - Special Education (CA Dept of Education)

This list assembles a selected group of approximately books and journals currently available in the field of education mostly published in the late s.

While researching an important paper, you come across an online journal database that claims to connect academics to high-quality peer-reviewed research. Intrigued, you search for keywords related to your topic, only to discover that you must pay a hefty subscription fee to access the service. Check out the top 21 free online journal and research databases in this article, and click the link below to download the full list of databases, completely free! It allows users to search more than 66 million open access articles. In addition to a straightforward keyword search, CORE offers advanced search options to filter results by publication type, year, language, journal, repository, and author. ScienceOpen Functioning as a research and publishing network, ScienceOpen offers open access to more than 28 million articles in all areas of science. Although you do need to register to view the full text of the articles, registration is free. The Berlin- and Boston-based company was founded in with the goal to "facilitate open and public communications between academics and to allow ideas to be judged on their merit, regardless of where they come from. It has archived more than two million articles from 9, journals, allowing you to either browse by subject or search by keyword. The site was launched in with the aim of increasing the visibility of open access scholarly journals. Content on the site covers subjects from science to law to fine arts and everything in between. Links lead to other sites, where you may have to purchase the information, but you can search for full-text articles only. The service primarily indexes journals, grey literature such as technical reports, white papers, and government documents , and books. All sources of material on ERIC go through a formal review process prior to being indexed. It is run by Cornell University Library and now offers open access to more than one million e-prints. The site offers more than , abstracts and more than , full-text papers. There is not yet a specific option to search for only full-text articles, but because most of the papers on the site are free access, it is not often that you encounter a paywall. You must become a member to use the services, but registration is free and enables you to interact with other scholars around the world. Publishing seven open access journals, the nonprofit organization is committed to facilitating openness in academic research. According to the site, "all PLOS content is at the highest possible level of open access, meaning that scientific articles are immediately and freely available to anyone, anywhere. The repositories it searches through are assessed and categorized by OpenDOAR staff to ensure they meet quality standards. Sixty percent of its content is open access, and you can filter your search accordingly. Digital Library of the Commons Repository Run by Indiana University, the Digital Library of the Commons DLC Repository is a multidisciplinary journal repository that allows users to check thousands of free and open access articles from around the world. You can browse by document type, date, author, title, and more or search for keywords relevant to your topic. It is, however, a highly useful research database for academics in a variety of disciplines. All the information is free to access, and it provides facts about every country in the world, including information about history, geography, transportation, and much more. Paperity Paperity boasts being the "first multidisciplinary aggregator of open access journals and papers. In addition to providing readers with easy access to thousands of journals, Paperity seeks to help authors reach their audiences and help journals raise exposure to boost readership. Although it provides access to both free access articles and those behind a paywall, you can limit your search to only full-text articles. The site indexes more than three million publications, making it an invaluable resource in the world of computer science. EconBiz EconBiz is a great resource for economic and business studies. A service of the Leibniz Information Centre for Economics, it offers access to full texts online, with the option of searching for open access material only. BioMed Central BioMed Central provides open access research from more than peer-reviewed journals in the fields of biology, clinical medicine, and health. You can browse these journals by subject or title, or you can search all articles for your required keyword. JURN A multidisciplinary search engine, JURN provides you with links to various scholarly websites, articles, and journals that are all free access or open access. Dryad Dryad is a digital repository of curated, open access scientific research. It is run by a not-for-profit

membership organization that aims to "promote a world where research data is openly available, integrated with the scholarly literature, and routinely reused to create knowledge. PubMed PubMed , of the National Center for Biotechnology Information, is a very well-known research platform in the fields of science and medicine. Semantic Scholar A unique and easy-to-use resource, Semantic Scholar harnesses the power of artificial intelligence to efficiently sort through millions of science-related papers based on your search terms. According to the site, although some articles are behind paywalls, "the data [they] have for those articles is limited," so you can expect to receive mostly full-text results. Another feature is the extensive advanced search options, which allow you to search by cell type and brain region, among other things. Zenodo Taking its name from Zenodotus, the first librarian of the ancient library of Alexandria, Zenodo is a tool that was "built and developed by researchers, to ensure that everyone can join in open science. Did we miss any? Help your fellow academics by letting us know on Facebook or Twitter which online journal directories you use the most.
