He was born on January 01, in The United Kingdom and spent most of his growing years in the northern region of England. Under the pen name, Sally has written a total of four novel series comprising of around 35 novels in all between them. He has also written the very famous Inspector Sam Blackstone mystery series under his pen name, as well as his real name Alan Rustage. Other than the first pseudonym of Sally Spencer, he also writes thriller novels under the second pseudonym James Garcia Woods. In his attempt of doing so, Sally was inspired by other courageous authors like Emma Blair and Mary Jane Staples, who are also male authors just like him. Sally always had the dream of becoming an author since his childhood as he used to read several mystery and thriller novels and get inspired by them. He used to even try writing several stories of his own sometimes. He used to get lost in his own imaginary world and think of fictional characters and plots and used to make notes about them in his notebooks. It was not a usual task for a child of his age to indulge so much in his passion for developing mystery stories and characters. However, he believes that it was this dedication and determination of his that helped him to master the skills of creative writing and become a reputed author. Sally also says that he has received great inspiration by reading the successful works of the writers of his time and is thankful for them for whatever he is today. He believes that those novels helped him to hone the necessary skills required for writing a mystery novel. He has always believed that his struggle would pay him good returns some day and is quite happy to have achieved great success in his life as an author. Sally never denies the fact that his friends and family members have helped him a lot and have supported him throughout his struggling days. Sally says that if they would have not been there to encourage and motivate him in his struggling days, then he would have not been able to become what he is today. Before becoming a full time author, Sally used to work as a teacher. He has taught school students in England and Iran, and it was during his stay there as a teacher in one of the schools at the time of that he witnessed the fall of the rule of Shah through his own eyes. The situation in Iran was such that he had developed an interest in arms and weapons as he used to deal with the rifles frequently. He says that on one occasion he had landed himself at the gunpoint of the revolutionaries and the soldiers for possessing a rifle. However, it turned out to be a routine drill and he was lucky to come out safely from that situation. After that experience, he had never been comfortable in the presence of weapons. Sally has lived in Madrid for more than 20 years and considers it to be one of the most exciting and interesting cities that he has ever lived in. However, he has been living in the quiet environment of the seaside town of Calpe, on the Costa Blanca for the past few years. The initial series of novels written by Sally were based on historical sagas which were set in Cheshire, the place where he grew up, and London. The novels were highly successful among the English readers, however, the American readers found the dialect of the novels to be quite a strain. Sally has written more than 20 books under the pen name, some of which were based on the characters named Detective Chief Inspector Woodend and Monika Paniatowski. Sally also wrote novels based on the character of Detective Inspector Sam Blackstone. Other than writing exciting novels, Sally loves to play pub and bridge quizzes as well as a few other games. He is quite competitive in his games. He is also a hardcore fan of video games and it takes iron discipline to make him get over with it. It was published in the year by the Dales Large Print Books. The plot of the novel opens up with the discovery of the strangled dead body of a teenager named Diane Thornburn. The body is found hidden in the salt store of the Cheshire village. The main character of the series, Chief Inspector Woodend is called on from London to investigate the case. Woodend is required to catch the killer as soon as possible before he takes the lives of other innocent girls of the village. However, the place becomes the murdering site of a man named Robbie Peterson, who was a former criminal and a current club owner. His body is recovered from his office, with a long nail inserted in his skull. Chief Inspector Woodend is once again asked to carry

out the investigation of the mysterious murder along with Sergeant Bob Rutter. With the newspapers screaming for a quick solution, this is a case no one wants to touch -- so naturally it is Chief Inspector Woodend who finds himself left holding the baby.*

But it is also the setting for brutal murder when Robbie Peterson, ex-con turned nightclub owner, is found dead in his office; a six-inch nail driven deep into his skull. With the local force baffled, Scotland Yard drafts Chief Inspector Woodend and Sergeant Rutter up from London, and as the questions and suspects multiply, it soon becomes clear that it is a far from straightforward case. Added to his problems with the case, Woodend is also having trouble with his sergeant. Quietly reliable, retro puzzling. But for once, Woodend feels out of his depth. Was Eddie murdered because he was Eddie, or because he was one of the Seagulls. As Woodend battles with the complexities of the case - and with the less-than-affable local police - he is more than aware that if he does not find the murderer soon, there could well be another death. Her characters are diverse, intriguing, and believable; her plots never fail to surprise; and the procedural details are grittily realistic. Recommend Spencer confidently to anyone who enjoys the British procedural. Why did Schultz seem so frightened when one of his colleagues mentioned the legend of the Dark Lady? Did the workers at the BCI chemical factory - many of whom are known to hate the Germans - have anything to do with his death? How could Fred Foley, the tramp whose bloodstained overcoat was found close to the scene of the crime, have completely disappeared? And is this murder connected with one that occurred in Liverpool nearly twenty years earlier? Excellent work from a too-little-known author. From *The Library Journal*, January But it is no joyful homecoming. Woodend comes to realise that solving this crime will require all his wit, bravado and imagination - aided perhaps by the occasional puff on a Capstan Full Strength and a few pints of best bitter. Review by *Publishers Weekly*: An accomplished craftsman who serves up a good puzzle and deftly solves it with intelligence and insight. The bonus in this book is a fascinating description of life at English resort. Highly recommended for fans of English mysteries or police procedurals in any setting. The more Woodend learns about the world of television, the more he comes to appreciate the fact that he will never understand the people who live in it, though it soon becomes plain to him that unless he unmasks the murderer soon, there is a grave danger that there will be a second killing. As Sergeant Monika Paniatowski goes under cover, posing as a personal assistant and Bob Rutter wonders whether he will ever make it as an inspector, Woodend struggles to untie the knots of jealousy, betrayal and revenge, which seem to be all that is holding the television studio together. There is much here to please Woodend fans, as well as those who like mysteries with a television setting. But where is the farmer, why did he have such swanky furniture in his living room, and who on earth are the victims? How did the killer manage to get away when the crime scene, an isolated farmhouse, was surrounded by fresh snow?

### Chapter 3 : Sally Spencer - Book Series In Order

*In this fast-paced, often humorous puzzler from British author Spencer (The Golden Mile to Murder), backstabbing among media executives, aspiring stars and script writers at the remote Lancashire.*

Why, pray, it is out-and-out chilling! Whether it as a result of sadistic personality disorder or aimed at making snuff films, it beats logic why a serial killer would later on hide a corpse in a salt store. Perhaps salting it away? This is the scope of the gloomy and doomy Chief Inspector Woodend series. By the same token, the protagonist featured therein is between the devil and the deep blue sea. This whodunit series is also known as Chief Inspector Woodend Mysteries. Surprisingly, the name Sally Spencer sounds feminine. This is because, during the time when he was penning sagas, it was virtually a must for female names to grace the covers. Incidentally, Sally Spencer, who is in his sixties and has been a teacher both in his home country and abroad, is the pseudonym Alan Rustage. Did you know that he has also written various books under the pen name James Garcia Woods? Sally Spencer spent his formative years in Cheshire county, a region located in northwest England, and this place is consistently referenced in the said series. The various books contained therein have respective editions. As such, there are more than five editions of the first book in the Chief Inspector Woodend series. Even so, the first edition of the first novel in the serialized mysteries was originally published in July , titled The Salton Killings, and this series is shelved under the mystery, European British literature, and thriller genres. Meet protagonist Charlie Woodend. Not surprisingly, this distinctive habit helps him unravel the perplexing deaths in the series. A workmate who have had the privilege to work together with Charlie Woodend describes him as obstinate, irrational, persistent and, above all, the most suitable police partner which anyone can desire. A villager from Cheshire county, called Diane Thornburn, dies from strangulation. The victim has a bosom friend called Margie Poole; however, the friend, who seemingly is more informed on the murder, is apparently withholding some information. Inspector Charlie Woodend comes in this context; Woodend is called in from London, where is based, and starts sleuthing. Unfortunately for detective Woodend, his sleuthing leads to yet another casualty; the second death, concerning also a youthful female, shows a helical trail pointing to a possible serial murderer on the prowl. At this juncture, Charlie Woodend is second-guessing the killer " at what time has the killer planned and in which other place has he targeted? Best Chief Inspector Woodend Books The first, second, and forth books in the Chief Inspector Woodend series are the best therein, based on public views. The first book in the series, The Salton Killings, has been stated previously and there is no need to revisit. But the place had not bargained for the gory death" wherein a long nail has been hammered into the head" of Robbie Patterson; the victim is a reformed thug who is currently operating a club. Inspector Woodend alongside his partner Bob Rutter are called in from London. The other book is titled The Dark Lady; it is the forth book in the Chief Inspector Woodend series and was initially published in Hereby, detective Charlie Woodend and his partner Bob Rutter are dispatched from Scotland Yard to northern England wherein a German expert has been brutally murdered. As such, the investigators wonder if chicken are coming home to roost. Other Book Series You May Like To wrap it up, the readers who rejoiced at the Chief Inspector Woodend were also delighted at reading the following three series of books. The first series is called Sarah Deane Mystery series and is authored by J. Borthwick; hereby, the featured protagonist is Sarah Deane who is a teacher and doubles up as an amateur detective. Dinah Pelerin is the featured protagonist in this series; similarly, she is an amateur detective and prospective anthropologist who is globe-trotting. Ben Ross, who is childhood friend of Lizzie Marin, not only helps her in the sleuthing but also marries her later on. Jack Reacher is back!
