

## Chapter 1 : 5 Things That Make English Difficult for Foreigners to Learn | Mental Floss

*The English for Foreign Students (EFS) Program in the Stanford Language Center offers courses to international graduate students in English as a second language (ESL), as well as training courses for prospective ESL teachers through the Linguistics Department.*

May 18, istock A billion people are learning English around the world and most of them are struggling with the same things. In 12 years of teaching ESL English as a Second Language , I was surprised to find that there is little overlap between the mistakes foreigners make and the struggles native speakers have. Here are five of the biggest quagmires in English. Something like this, I expect: The key words in that sentence make no sense to millions of people around the world learning English as a foreign language. Your alarm goes where? Why do you get up rather than stand up? Clothing gets put on but not put off, taken off but not taken on. There are thousands of phrasal verbs, literally enough to fill special dictionaries just for them. To make it worse, any one of these unfathomable constructions can have several meanings. How many definitions can you think of for "to put off"? They often convey extremely subtle subtexts which another native speaker automatically picks up on. When foreigners start learning English, they are taught to use will. And then they spend the rest of their English learning career unlearning everything they thought they knew. Neither of them are particularly in love with their jobs, so they share their dreams for changing their lives. But the second person sees the possibility of changing career as much likelier to happen. The English learner, however, is struggling to work out whether the conversation is about the future at all, let alone the degree of likelihood it carries. For the student of English they are an impediment that begins at entry level and keeps on being a problem forever. Now, has that made it clear? But English makes up for that with its ton of rules about when to use a, when to use the, and when to use nothing.
