

Chapter 1 : Mathematics: Exploring Your World: Teacher Edition | eBay

Exploring Your World. Our preschool, Exploring Your World (EYW), offers a wide variety of developmentally appropriate learning activities addressing the individual strengths and learning needs of all children.

While exploring your town? Or maybe as you travel the globe? This really is a stitching trip around the world! Bringing together two things I love, embroidery and English paper piecing, this 8-week club will result in a large mini quilt. Of course, this project starts with embroidery. This club features seven small embroidery patterns representing landmarks and a few natural features from each of the seven continents. Patterns and instructions will be emailed on Tuesdays starting through December. **Traveling the Globe Stitching Club:** If you are outside of the US or Canada, please visit my Etsy shop to sign up. Or, feel free to email me molliejohanson@gmail.com or reach out via social media. Visit and stitch your favorite spots in your little city with the **About the Town Stitching Club!** This club ran as an 8-week club and is now available as a complete download in PDF format. This club is part embroidery and part English paper piecing EPP. The result is a hexagon-shaped embroidered mini quilt that is almost entirely stitched by hand. Plus the bonus pattern for the center! To connect with others who are stitching about the town, use the tag **AboutTheTownStitchingClub** on social media. **About the Town Stitching Club:** Like the others, it combines hand embroidery and English paper piecing to make a mini quilt. You might even decide to do your stitching out in nature! This project features six embroidery patterns representing different elements in nature. The patterns are small enough to fit on 2-inch hexagons, but each features a mini scene. The embroidery combines with English paper piecing to make a mini quilt. Full instructions and templates are included for EPP, though some embroidery experience is recommended. The **Around the House Stitching Club** ran as an 8-week online pattern club, but it is now available as a complete download. This club combines embroidery and English paper piecing, and is suitable for beginners, while fun for experienced stitchers too. This project features six embroidery patterns representing rooms in your house. And actually, each pattern is made up of three smaller patterns that you can use together or separately. So technically, you get 18 small patterns. Full instructions and templates are included, and some embroidery experience is recommended.

Chapter 2 : Student Opportunities to Explore Your World!

Please take note of the following: There is a new step in the registration process. Students will need to submit a copy of your school id/acceptance letter, your passport and your resume.
