LeGarrette Blount, Eagles -- 1 of 16 -- 6. Fournette continues to build his case here as well. Only Gurley and Bell managed more top level weeks, and only those 2 delivered such production in a higher percentage of outings. This level made sense for the last spot because of a slightly larger difference between 24th and 25th than the surrounding spots and the tidiness of fitting 2 starting RB spots in team leagues. Don't trust any 1 fantasy football expert? We combine their rankings into 1 Expert Consensus Ranking. Our Draft PPR Overall rankings are updated daily.

JJ Zachariason " A. Rich Hribar " T. He could go down as one of the greatest players of all time. With so few multi-year options at running back, I think Bell was the right pick. I would have taken him had he fallen to No. So is the nature of a game where quarterbacks are too streamable, and running backs too unpredictable. Norris professed instant regret at his Howard selection. Howard certainly had the looks of a future star last season, but his CV is probably too thin for the No. As was the case in New Orleans, that can make for difficulties with a deep threat. Instead of forcing a running back " Jay Ajayi? Good enough for Pick 20 in a start-up, but not his fifth-year team option. Nevertheless, the upside is there, as usual. He should still offer league-winning upside for the next seasons. So it was interesting to see Silva take the plunge here, but I agree completely. Gurley has already put amazing runs on NFL tape, and does not turn 23 until August. I was a bit surprised to see Davis come off the board before the running backs, but not entirely. Davis is ranked No. Clay, of course, took the newest Titan. I was still more than pleased to land Mixon. I thought it was the right time to gamble on the unknown over the knowns of LeSean McCoy, etc. Young players are always overvalued in Dynasty leagues, but I think the calculus favored taking a chance here. Moncrief was the WR21 in this draft a season ago. I thought he would have been higher. This feels like a discount, but not as big on as I was expecting. With everyone focused on finding the next big thing, Reeb and Ray are assuming Jordy and LeSean will anchor their teams for the next two seasons. Not in love with the Kelce pick, though I do love Kelce. Get the feeling I will regret passing. He was a college freak who fell not because of film, but measurables. Both could vastly over-perform their draft positions in I think Parker could end up one of the steals of the draft. I was surprised Ross fell as far as he did. His injury history is concerning, but his upside is considerable. Snead has been sort of a forgotten man. His return on fifth-round investment could be through the roof. Still surprisingly young, his rebound potential is high. The group showed restraint with Tyreek. Hill does things few NFL players are capable of. JJ Zachariason " C. Prosise flashed as a rookie, but emerged with serious durability concerns. Murray missed zero games, but was plagued by a toe issue down the stretch.

Chapter 3 : PPR Fantasy Rankings Cheat Sheet - Top Players for

Positional rankings for PPR leagues, updated throughout the offseason.

Aaron Jones key to offensive success Over the last three seasons Watkins has missed 11 total games. More specifically, he has missed 11 games over the last two seasons. In that time Watkins has dealt with foot and hip injuries. At the end of this past season, Watkins had to undergo yet another surgery on his foot. Can he manage to stay healthy for all 16 games in ? Dennison spent the last two seasons with the Denver Broncos. In that time the Broncos No. Before Denver, Dennison was the offensive coordinator for the Houston Texans between In three out of those four seasons the Texans No. In all of those seasons as the offensive coordinator with both the Broncos and Texans, Gary Kubiak was the head coach. In Jeffery missed seven games with a variety of injuries and finished as the 42nd PPR wide receiver. NFL Power Rankings Best player by jersey number With Jeffery now in Philadelphia there are some questions surrounding him. Can he stay healthy for all 16 games? Can Carson Wentz successfully get him in the ball after he threw 14 interceptions and just 16 touchdowns as a rookie? He should easily lead the team in targets. Whether his body and supporting cast lets him reach his ceiling remains to be seen. He finished with 75 receptions, receiving yards and 12 touchdowns on targets. Going into , Adams has the benefit of playing in the same offense but more importantly, playing with the same quarterback. Is Adams this good of a wide receiver or is future Hall of Fame quarterback Aaron Rodgers making him look this good? With all of these other pass catchers, Adams could disappear some weeks just like last year when he had five games with three or fewer receptions and no touchdowns.
