

Chapter 1 : Free and Open Courses | UNITAR

The following year, the Review of Governance and Oversight within the United Nations, Funds, Programmes and Specialized Agencies, reiterated this recommendation: 1 Independent Inquiry Committee into the Management of the Oil-for-Food Programme, Vol.

What is Money Laundering? Money laundering is the process of concealing the true origin of money that was obtained from criminal activity. Though the source of laundered money is often unclear, most illegal funds originate from activities such as drug trafficking, fraud, tax evasion and corruption. Money laundering poses a serious threat to the economy. The International Monetary Fund IMF notes that money laundering can discourage foreign investment, impact international capital flows and result in welfare losses. Money laundering can distort our understanding of the economy, incorrectly shifting demand for goods, services or currencies, and impacting exchange rates. In some cases, criminals may be able to exercise a great deal of political power due to the large amounts of illegal funds they have amassed. Overall, money laundering has consequences that impact every nation. Most people assume that money laundering only occurs in developing economies where regulations are rather loose, yet economies such as the United States and Canada are still susceptible to financial crimes despite their extensive AML legislation. For this reason, a comprehensive AML program is essential to maintaining a strong global financial system. These recommendations are regularly updated and revised, most recently in , to reflect changes in global systems. Currently, the FATF has 37 members including the United States, Canada and the European Commission, who are responsible for ensuring that the Forty Recommendations are respected at applicable institutions, such as banks. Additionally, international organizations such as the IMF, the World Bank and the United Nations also adhere to these anti-money laundering recommendations. Though the FATF provides a framework to help nations address money laundering issues, many countries maintain their own unique regulations to ensure greater protection against financial crimes. Awareness of regulations can ensure that your organization is not susceptible to financial crimes and avoids facing non-compliance fines. In fact, earlier this year, Deutsche Bank was fined over million GBP by British and American government agencies for failing to uphold adequate anti-money laundering policies. A weak or ineffective AML program lead to financial trouble and a damaged reputation. To ensure that your organization is adhering to AML regulations, consult local government legislation. In the United States, several laws have been passed over the last 40 years to protect the economy from money laundering. The BSA ensures that businesses keep adequate records of monetary transactions to help law enforcement detect and confront the introduction of illegal funds into the financial system. Banks Money Services Businesses check cashes and money transmitters Securities and commodities firms.

Chapter 2 : Executive MBA (EMBA) Program | Martin Tuchman School of Management

human and financial time and resources are devoted to the program. In best practice organizations, diversity is a process that is an integrated, ongoing and measurable.

Funds, Programmes, Specialized Agencies and Others Funds, Programmes, Specialized Agencies and Others

The UN system, also known unofficially as the "UN family", is made up of the UN itself and many affiliated programmes, funds, and specialized agencies, all with their own membership, leadership, and budget. The programmes and funds are financed through voluntary rather than assessed contributions. The Specialized Agencies are independent international organizations funded by both voluntary and assessed contributions. UNEP acts as a catalyst, advocate, educator and facilitator to promote the wise use and sustainable development of the global environment. UN-Habitat The mission of the United Nations Human Settlements Programme is to promote socially and environmentally sustainable human settlements development and the achievement of adequate shelter for all. Every year, the programme feeds almost 80 million people in around 75 countries. All were brought into relationship with the UN through negotiated agreements. Some existed before the First World War. Some were associated with the League of Nations. Others were created almost simultaneously with the UN. Others were created by the UN to meet emerging needs. It is both a forum for negotiating agreements between developing and developed countries and a source of technical knowledge and information to aid development. IFAD The International Fund for Agricultural Development , since it was created in , has focused exclusively on rural poverty reduction, working with poor rural populations in developing countries to eliminate poverty, hunger and malnutrition; raise their productivity and incomes; and improve the quality of their lives. IMF The International Monetary Fund fosters economic growth and employment by providing temporary financial assistance to countries to help ease balance of payments adjustment and technical assistance. IMO The International Maritime Organization has created a comprehensive shipping regulatory framework, addressing safety and environmental concerns, legal matters, technical cooperation, security, and efficiency. UNIDO The United Nations Industrial Development Organization is the specialized agency of the United Nations that promotes industrial development for poverty reduction, inclusive globalization and environmental sustainability. The objective of WHO is the attainment by all peoples of the highest possible level of health. Health, as defined in the WHO Constitution, is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. WMO The World Meteorological Organization facilitates the free international exchange of meteorological data and information and the furtherance of its use in aviation, shipping, security, and agriculture, among other things. World Bank The World Bank focuses on poverty reduction and the improvement of living standards worldwide by providing low-interest loans, interest-free credit, and grants to developing countries for education, health, infrastructure, and communications, among other things. The World Bank works in over countries.

Chapter 3 : UNITAR | Knowledge to lead

The United Nations System Staff College is the learning organization of the United Nations system. It designs and delivers learning programmes for staff of the UN system and its partners.

Foundations of American Sport. Description What is the practical application of key concepts and issues in sports management within the sports business workplace? This class emphasizes the key concepts and issues in various disciplines of the sports industry, and the relationship between disciplines within the industry. Students and faculty share practical experience and incorporate student experimentation to fully prepare students for advancement in the Sports Management program. Description This course examines the data collection process, application, and management practices as it applies to various sports throughout the world. Using soccer as a platform to explore techniques, students will develop a working knowledge of the practical applications of analysis and models used to make management decisions within an organization. In response to the sports industry turning towards greater application of analytics and critical thinking skills, Soccer Analytics aims to develop students into managers who can make decisions, based on provided models, on player and team valuations. Students will be able to demonstrate the capability to apply advanced critical thinking skills to sports business issues and have the ability to integrate objective analysis with subjective judgment in a way that adds value to decision processes. Description In the past several years, the National Basketball Association NBA has undergone a fundamental transformation that can be directly linked to the growing emphasis placed on the importance of analytics. As the style of NBA play has evolved, basketball teams have been hiring analysts at an ever-increasing rate to remain competitive. The continuous growth of more detailed basketball data makes it clear that this trend is set to continue. In this course, students will develop a working knowledge of the practical application of analysis and models used to make management decisions within an organization and a professional league. Utilizing data made available through the NBA and other publicly available resources, students will learn to use analytics to ask and answer the right questions and provide best practice solutions through critical thinking. Fundamentals of Sports Analytics. Description This course is an introduction to the application of analytic tools and techniques used to aid sports decision-makers. The structure of the course examines the use of analytics to four main areas of interest: Emphasis is placed on how the application of analytics has altered the decision processes of sports organizations. Having a basic understanding of analytical tools and their application to sports issues is essential for the success of anyone pursuing a career in the field of sports management. Sports Accounting and Finance. This course provides an extensive overview of the business of professional sports and the financial and accounting skills necessary for sports managers to succeed in professional sports organizations. This course moves from a macro to the micro look at the industry, by surveying the business models of major sports leagues and organizations with specific reference and emphasis on finance and accounting and the role they play in decision-making. By the end of the course, students will have a solid comprehension of the role of accounting and finance in the sports industry, and be able to successfully apply that knowledge to accounting and financial issues routinely faced by sports managers. Description How does one demonstrate the capability to apply advanced critical thinking skills to sports business issues such as player valuations and salary negotiations in baseball, and have the ability to integrate objective analysis with subjective judgment in a way that adds value to decision processes? Finally, the course explores contemporary issues such as team-owned regional sports networks and their impact on the sport. Students will evaluate theories, concepts, frameworks, and methods essential to the functioning and management of international sports. By the end of this course, students will be able to illustrate the differences between U. Description Digital, social, and mobile media continue to heavily impact every aspect of sports business, often in profound and unanticipated ways, particularly in managing and optimizing revenue streams. All revenue line items are fully intertwined and integrated with each other, media, sponsorship, ticketing, hospitality, concessions and licensing, etc. Students
