I am also a certified Prince2 Practitioner. This article has been cross posted from pwmather. This post will look at the custom Project Professional Enterprise views and other custom Enterprise Global objects. These are stored in the Enterprise Global with the other default Enterprise Global objects. You do get a lot of views, groups and filters etc. The type of objects are views, tables, groups and filters. The next steps will create custom objects in the Enterprise Global for your environment. Once Project Professional is connected we can start the configuration of the Enterprise Global file. We are now ready to add the custom enterprise objects. For the purpose of this post we will create 1 custom view that includes some of the default Project fields but also our custom RAG Planned Work field, we will also create a custom filter. Firstly we will look at creating the custom Enterprise Global view. Views are based on tables, so firstly we need to create a table, this table defines the fields and the layout in the view. Enter a Name, I would recommend that you prefix all of the custom Enterprise Global objects with a set of characters so that you know they are custom. When you have many custom objects in the Enterprise Global you will be glad you did this! Then add the fields required, set the width and add a custom title plus any other settings you would need, see example below: Click OK then Close. Select Single view and click OK. Single view will create just one view, a combination view will give you a split view. For example, for a combination view you might have the Gantt view at the top Primary and the Task Usage at the bottom Details. For this example we will create a single view: Give the view a name, remember the prefix tip, and select the other options as displayed below: The Table is the name of the table we created in the previous step. Click the Filter drop down and select More Filters: Click Save then Close. Close and check in the Enterprise Global file. Exit Project Professional then re-launch it and connect to the account we created in the first steps so that you are connected to the Project Online PWA instance. This process is required so that Project loads with the new Enterprise Global file. You will now see that the new view and filter are available: Notice only the fields we defined in the table are visible. The custom filter is also available: Selecting this filter on a project will only show tasks that have more planned work than the baseline value, no filter: Selecting the custom filter just created: That covers the intro to custom Enterprise Global objects, in the next post we will look at further configuration entities in PWA.

With the new SharePoint we brought important innovations for how users interact with SharePoint sites and content on mobile devices: From the start, touch has been a key area of investment across all of the products in the new Office, and SharePoint is no exception. Now, when you access SharePoint Online from smaller devices—from inch screens down to 4-inch—you have a new app-like experience that enables you to work your best with your documents and team sites. Office business users will see the new Touch Design pages over the next few weeks as we roll out worldwide. Backstage of the Touch Design experience on a 4-inch screen showing navigation access to Office tiles. The app-like design, with documents displayed as big touchable tiles on the screen, was first introduced with the recently announced OWA for iPhone and iPad. With the new Touch Design pages in SkyDrive Pro and Sites, you touch tiles to view your documents, documents shared with you, or documents you follow. You can also open documents or share the URL of a document with other users using touch. After reviewing a document or site, the next action you might want to take is share. So we made it super easy to share documents. This is the same external sharing process that has been of great value to Office customers since we launched Office. You can share a document internally or externally from the backstage view in Touch Design. To open the backstage, tap the ellipsis next to the document. The new Touch Design pages will load by default on most devices. Navigation Once signed in, you can switch between SkyDrive Pro and Sites by tapping the navigation icon in the bottom left corner of the page. You may also see tiles for other components of Office you subscribe to: Tap the icon in the lower left to access the backstage, which shows tiles you can tap to reach SkyDrive Pro or Sites. Touch Design scales to smaller devices Touch Design was developed to scale to the optimal experience on smaller devices, from 4-inch devices down to 3.5-inch screens. The user experience is exactly the same for pages displayed on devices smaller than 11 inches as it is for pages displayed on 4-inch devices, which we described above. You have the same access to your documents and sites on smaller devices, too. Backstage of the Touch Design experience on a 4-inch screen showing navigation access to Office tiles. Which Office plans will receive the new Touch Design mobile pages? The new Touch Design mobile pages are now available for all Office for business users. Specifically, these plans are: Does this announcement apply to Office dedicated subscribers? The Office dedicated plans are not receiving this same update at this time, because they are managed in a unique, isolated infrastructure. Does this announcement apply to customers who have deployed SharePoint on-premises? This update applies only to the Office service instance of SharePoint Online.

There present variety of motives behind it due to which the readers stop reading the eBooks at their first most effort to use them. Nonetheless, there exist some techniques that can help the readers to have a nice and powerful reading experience. Someone ought to correct the suitable brightness of screen before reading the eBook. It is a most common issue that most of the folks generally bear while using an eBook. Due to this they suffer with eye sores and headaches. The best option to overcome this acute issue is to reduce the brightness of the screens of eBook by making particular changes in the settings. You can also adjust the brightness of screen depending on the kind of system you are using as there exists bunch of the ways to adjust the brightness. It is proposed to keep the brightness to possible minimum level as this can help you to increase the time which you can spend in reading and give you great relaxation onto your eyes while reading. An excellent eBook reader ought to be installed. It will be helpful to have a good eBook reader in order to truly have a good reading experience and high quality eBook display. You can also use complimentary software that can provide the readers that have many functions to the reader than simply an easy platform to read the desired eBooks. Apart from offering a place to save all your valuable eBooks, the eBook reader software even give you a lot of attributes as a way to improve your eBook reading experience compared to the standard paper books. You may also improve your eBook reading experience with help of alternatives furnished by the software program such as the font size, full display mode, the particular number of pages that need to be displayed at once and also alter the colour of the backdrop. You need to take appropriate breaks after specific intervals while reading. The majority of the times we forget that we are supposed to take breaks while we are dealing with anything on the computer screen and are engrossed in reading the content on screen. However, this does not mean that you ought to step away from the computer screen every now and then. Continuous reading your eBook on the computer screen for a long time without taking any break can cause you headache, cause your neck pain and suffer with eye sores and in addition cause night blindness. So, it is critical to provide your eyes rest for a little while by taking breaks after specific time intervals. This will help you to prevent the troubles that otherwise you may face while reading an eBook continuously. While reading the eBooks, you need to prefer to read large text. Normally, you will see that the text of the eBook tends to be in medium size. So, boost the size of the text of the eBook while reading it on the screen. Although this may mean you will have less text on every page and greater number of page turning, you will manage to read your desirable eBook with great convenience and have a great reading experience with better eBook screen. It is suggested not to go for reading the eBook in full screen mode. Although it might appear simple to read with full screen without turning the page of the eBook fairly often, it place lot of anxiety on your own eyes while reading in this mode. Always prefer to read the eBook in the exact same span that would be similar to the printed book. This is so, because your eyes are used to the length of the printed book and it would be comfortable for you to read in exactly the same manner. By using different techniques of page turn you could also enhance your eBook encounter. Check out whether you can turn the page with some arrow keys or click a particular section of the screen, aside from using the mouse to handle everything. Favor to make us of arrow keys if you are leaning forward. Try using the mouse if you are comfortable sitting back. Lesser the movement you need to make while reading the eBook better will be your reading experience. This will definitely help to make reading easier. By using each one of these effective techniques, you can definitely enhance your eBook reading experience to a terrific extent. These tips will help you not only to prevent particular hazards that you may face while reading eBook frequently but also facilitate you to take pleasure in the reading experience with great comfort.
