

Chapter 1 : Natural Science Gr 9 Memorandum - www.nxgvision.com

Explore the largest K Resource Library. Over a million assessments, videos, lesson plans, homework assignments and more.

Lessons come with options for modifications and differentiation in order to help you cater to the needs of your students. Many of the lessons are aligned to Common Core State Standards. With that said, these lessons can easily be integrated into an existing curriculum Math curriculum for any grade. The lessons you see here were submitted by real teachers working in schools across the United States. We encourage you to contact us in order to share your lesson plans with the rest of the Teacher. The lesson involved hands-on activities to make the learning fun and engaging.

Counting Backwards Length of Time: This lesson is great for kindergarten through first grade. About 45 Minutes This lesson is designed to teach students how to measure lengths indirectly and by alternating length units. About 45 minutes This lesson is designed to help students identify and sort common words in basic categories.

Odd or Even Length of Time: Representing Addition and Subtraction Length of Time: About 45 minutes This lesson is designed to help students represent addition and subtraction with objects, fingers, mental images, drawings, sounds e. About 30 Minutes Students will learn to create a small bar graph using candy for information.

Graphing With Insects Length of Time: About 45 Minutes This lesson is designed to teach students to draw a picture graph and a bar graph with single-unit scale to represent a data set with up to four categories. Plus, solve simple put-together, take-apart, and compare problems.

Exchanging Time Length of Time: About 20 minutes depends on of problems Students will compare numbers with three or more digits using visual cues.

Fun Fraction Pizza Length of Time: They will decorate each slice and then exchange slices with classmates and then evaluate the fractions of slices that they have at the end. Students should have already had some lessons about simplification of fractions. They will record the angles that they find in branches, trees, bushes, flowers, etc and then determine the supplementary angle.

Comparing Multiplication Facts Hey Tocayo! Comparing Decimals Game Length of Time: This should not be the first introduction to the topic.

Order of Operations Length of Time: About 45 Minutes This lesson is designed to help students solve problems involving the four operations, and identify and explain patterns in arithmetic.

Unknown Volumes Length of Time: About class periods Finding the volumes of miscellaneous-sized containers using a known total measurement of one container. They will do this in as few steps as possible.

Graph Smile Length of Time: Two 45 minute periods Students will learn about probability and statistics while rolling dice and flipping a coin carefully recording their results.

Prices and Percentages Length of Time: About 1 - 2 Class Periods Using a current list of prices for food and clothing, the students will practice math skills related to percentages.

Silent Geometry Length of Time: About 1 - 2 Class Periods The students will practice using geometry formulas measuring items in the classroom to find area and volume, radius and circumference, and identify the types of angles. In addition, they will learn about scale measurements.

Interest-ing Math Length of Time: About 45 minutes The students will plan a vacation for themselves, group of friends, or family, considering the costs involved.

The Ideal Town Length of Time: About 2 Hours Based on research the students will design a small town with a pre-determined population, assuring there is enough living space, parking spaces, and a sufficient water supply.

About Three Class Periods For a natural disaster there are many variables to be accounted for when planning help for an area. This lesson will give students the opportunity to create a natural disaster plan for a part of their country.

The lessons cover multiple subject areas and objectives. The variety and amount of lesson plans available to you will continue to increase as more teachers submit their work. Please contact us if you have lessons that you would like to share. We commend you for all the hard work that you do. You have the power to inspire our future! Varies depending on grade level and depth of project In this performing arts lesson, students will rewrite a well-known fairy tale to include a great deal of dialogue and then act out that fairy tale creation of props is optional as is taping the performance. Flash Mob Fun Length of Time: Several Class Periods In this performing arts lesson, students will work together with a purpose to create and choreograph a dance for a flash mob to make an announcement for the school. This requires planning prior to mixing the first color. Paper Mache Zoo Length of Time: Varies depending on grade level and depth of project In this visual arts lesson, students will create zoo animals or any animals using paper mache. Perspectives Length of Time: Several Class Periods This visual arts lesson will allow students to get creative while practicing with either photography or videography. Students will also have to consider perspective from things outside themselves. Video Diary Length of Time: Two to Three Class Periods The students will use the art of communication to quickly persuade or convince their peers to change their minds on a variety of popular or unpopular opinions. About 2 Hours Following the Common Core Standards for writing a narrative the students will collaborate and write six stories. Is recycling worth it? Earth Window Art Length of Time: Environmental Impact Studies Length of Time: Menus to Save the Earth Length of Time: Students will create a week long menu using only basic foods and in-season items available in the area. A Gift at a Time Length of Time: About 2 - 3 Class Periods A controversial issue, such as global warming, will be researched using the vast resources of the Internet. The students will research both sides, either supporting or disputing the facts, opinions, and other information. Water, Water, Everywhere Length of Time: Words of the Environment Length of Time: About Three Class Periods For a natural disaster there are many variables to be accounted for when planning help for an area. This lesson will give students the opportunity to create a natural disaster plan for a part of their country. The Ideal Town Length of Time: About 2 Hours Based on research the students will design a small town with a pre-determined population, assuring there is enough living space, parking spaces, and a sufficient water supply. Lesson Plans Length of Time: Olympic Fair Length of Time: Cost of Recycling Length of Time: About 45 - 60 Minutes Using a list of terms from all fields of science, the students will connect them in six or less steps to a non-science term, explaining scientific relationships during the process. About 2 Class Periods The student will connect science to everyday, unusual, or rare actions carried out by people. Two Sides of an Issue Length of Time: The students will rewrite new information based on their research using the same era and people involved to realistically alter the outcome of the event s. Country to Country Length of Time: Mini Debates Length of Time: About 2 Class Periods Each student will be assigned, or may choose, an historical figure to research, selecting a speech given by the figure, and then write a rebuttal challenging some of its content backed by facts. Music and History Length of Time:
