You can always visit this page to check for newly uploaded files. The generation born after the year until is referred to as Generation Z. This is the first generation to be born with complete technology. They do not know life without technology. Hence, they are often termed as digital natives and are extremely comfortable with technology. They can email, text and use computers without any problems. In addition, members of Generation Z can understand and master advancement in technology. Unfortunately, this reliance on technology and gadgets has had a negative effect on the members. They rather stay indoors and use their electronics than play outdoors and be active. They are leading a sedentary life that can result in health problems later on. For them, social media platforms are a way to communicate with the outside world. They are not bothered about privacy and are willing to share intimate details about themselves with complete strangers. They have virtual friends and for them hanging out with friends means talking to them over the cell phones, emails and text messages. However, at the same time, this generation is considered to be creative and collaborative and will have a significant impact on the way companies work when they join the workforce. Members of Generation Z are adept at multi-tasking. They can text, read, watch, talk and even eat simultaneously. However, this has also led to reduced attention span leading to what psychologists call acquired attention deficit disorder. This generation is unable to analyze complex data and information as they cannot focus for very long. This highly diverse environment will make the grade schools of the next generation the most diverse ever. Higher levels of technology will make significant inroads in academics allowing for customized instruction, data mining of student histories to enable diagnostics and remediation or accelerated achievement opportunities. Gen Z kids will grow up with a highly sophisticated media and computer environment and will be more Internet savvy and expert than their Gen Y forerunners.
