Some speculate Obama will lead a quiet post oval office life as have many presidents before him. Others feel Obama, a former constitutional law professor will once again be bitten by the professorial bug. Find out through this article why we believe it will be the latter and not the former. Now that the Presidential Election is over, we the people of the United States are asking the big question "what will Barack Obama do now? After an eventful 8 years in office, the former president has settled nicely into his new life outside of the White House. Even though the Obamas are not in office, Barack and Michelle still keep busy between attending conferences, giving keynote speeches, and performing jury duty in Chicago. They even had time to tour Harvard as they dropped off their daughter at college. Some speculate that Obama may join the Democratic National Convention to help fundraise for future campaigns or advocate for the United States in International Conferences. The biggest guess is that Obama will return as a professor to teach law at Columbia University. Where Search Jobs For those who are unaware, Barack worked as a lecturer for 12 years at the University of Chicago and was well liked by students across campus. His classes were engaging and challenging; leaving students even more excited to come to the next class. Years of giving lectures improved his public speaking skills until he became the well-spoken orator we know today. With his skill set and background in education, will he return to his old job or does he have something new in his sights? What Is Obama Doing Today? The ex-president has been busy this year. The area holds special significance for Barack as he lived there previously as a child, before returning to his birthplace in Hawaii. August "The Obamas were spotted on the Harvard campus escorting their daughter Malia to her dorm. She is set to begin classes as a freshman this fall. His heart will always belong to Chicago, but the former president has a home somewhere else as well, Columbia University. As a young man, Barack took classes at Occidental College in Los Angeles before transferring to Columbia to finish his degree. He then went to on to attend Harvard University. Obama first began class at Harvard University in Within his first year at the college, he was selected to be an editor for the Harvard Law Review, based on his academic achievement and an impressive writing submission. The very next year, he made headlines as the first black president of the publication. His close peers at the time stated that he won the election because he was able to convince a crucial group of conservatives that if they voted for him, he would protect their interests. And these same communication skills would later be used to build up trust with communities in the South Side of Chicago. As the first black president, the event was highly publicized and Obama received a lot of attention in the media. It was this attention that led him to land a job out of college. Barack proudly ended his Harvard schooling with a J. One reason folks are convinced he may go back to lecturing is that he already possesses extensive classroom experience. He was hired to teach at University of Chicago Law School from to In , he was elected to the United States Senate. The president has referenced this period of his life before in speeches and debates. This comment stirred up quite a bit of controversy as Hillary Clinton pointed out that he never held that title. Several times during his 12 years as a professor in the Law School, Obama was invited to join the faculty in a full-time tenure-track position, but he declined. Obama did teach several courses involving constitutional law and race theory at the University of Chicago and was labeled a senior lecturer. You might wonder what it would be like to be taught by Barack himself? Overall, students seemed to like him as a professor and repeatedly left him good reviews. The Chicago staff had a reputation for leaning more towards the right politically and Obama said that he often felt like he was an outsider. Barack openly criticized ineffective liberal policies and failures, citing unsuccessful legal attempts to fix problems. A former student turned law professor, D. That was one key component to his lessons. He tended to stay neutral or stick to a middle ground when lecturing. In especially heated debates, he would draw out uncomfortable topics, forcing students to confront tough questions. As word of his classes spread, more students began enrolling in his courses. In addition, his reviews and evaluation scores skyrocketed. Some students went as far as to call themselves his groupies. For Barack, putting schooling into practice was a big part of his philosophy and you could often find him actively contributing in the areas of which he taught. For example, while teaching a class on districting and campaign financing, Obama helped to create a leading casebook in the field. He also improvised his own textbook for his political seminar on racism and law. While his classes were extremely popular, the lecturer faced other troubles with fellow teachers. Although he was offered tenure positions several times, he always turned them down and instead focused on his political career. Did you know that Obama was the first sitting president to publish an academic paper? A source told Pagesix. Columbia has also offered to house the presidential library in what is rumored to be a race between Columbia and Chicago University. Columbia has already donated land in New York to the cause if it is selected. If they do win the bid, it would be convenient for Barack to watch over the library while in the area. A current running joke is the idea that Obama can meet up with another Columbia staff member, Amal Clooney , who is teaching civil rights on campus. Obama has long been a friend of actor George Clooney and his wife, Amal, even visiting them in Italy earlier this year. At least he can sit with someone at lunch on his first day of class! Final Thoughts At this point, it seems clear that a position in higher education could very well be in the future for the former president of the United States. With a successful teaching career from Chicago University and his experience in office, many are certain Barack Obama will have much to teach to the newest class of future legal professionals. If the president does choose to return to education, let us hope he brings back his passion for bi-partisanship and lively debate. Even the most boring of lectures can be brightened with a professor who knows how to ask the right questions. Obama enjoyed this period of his life so much that he authored a book about it titled *The Audacity of Hope* , in which he wrote:

Several similar items have been circulated during or since the U. In fact, neither of the Obamas gave up their law licenses because they were facing disciplinary actions or criminal charges: But being a licensed professional myself, I knew that every state not only requires licensure, they make it possible to check online the status of any licensed professional. Let me explain what that means. Both of them still had current licensures as well. I happen to know there is currently in the Indiana State Prison in Michigan City Indiana an inmate who is a licensed physician, convicted of murder when he chased the two burglars who entered his home and terrorized his family into the street and killed them. This physician still has an active medical license and still sees patients, writes prescriptions, etc all from inside the prison. And he renews his medical license every two years, too. Something else odd; while the Search feature brings up the names, any searches for the Disciplinary actions ends quickly. As in, Too Quickly. Less than a half-second quickly on a Search Engine that can take five seconds to Search for anything. Such claims are based on misreadings of information about license status and erroneous interpretations and assumptions about such information, as detailed below: This lead-in is wrong on two counts: Michelle Obama does in fact have a license to practice law in Illinois it is currently on inactive status , and she did not hold a position as legal counsel with the University of Chicago Hospitals she worked at that institution as Executive Director for Community Affairs and then Vice President for Community and External Affairs. None of her job duties at the University of Chicago Hospitals required her to have an active law license. This passage is also wrong: The difference is crucial: Therefore, it is not uncommon for lawyers who are not in practice i. Reactivating an inactive law license is a fairly easy procedure, as noted in the Volokh group blog for law professors: Being an active status lawyer costs more money than being inactive, and it requires one to do Continuing Legal Education classes, unless one is in certain jobs for which the CLE requirements are waived. The difference in bar fees, for instance, is why I myself was inactive in The following passage includes the erroneous implication that Barack Obama gave up his law license to avoid disciplinary action: The above passage is also not true. This is hardly remarkable or suspicious:

In the 13 years between Obama's return to Chicago from law school and his Senate campaign, he was deeply involved with the city's constellation of community-organizing groups. Obama spent.

Load Error The conventional move for a post-presidency life is back home: So the idea of the vibrant, glamorous Obamas — two of the most famous people in the world — living here was a very big deal. They still love going to restaurants and attending the occasional exhibition or play. But outside a rarefied circle of close friends, they fly pretty much under the radar. That bubble is literal: The street in front of their home is blocked by a police car, with officers on duty, a standard security detail for any former president. Visitors to the block must check in with the officers before proceeding to any of the homes. Not that anyone would run into the Obamas: They rarely walk their dogs and typically come and go from a secured side entrance of their home. But that bubble is also figurative: The Obamas, they say, are quiet, unobtrusive and entitled to their privacy. The Obamas have always been careful about controlling their message, and the code of silence extends to almost every aspect of their social lives: Speak without authorization and you could be exiled from Obamaland. And no one in their inner circle would discuss their post-presidency life in Washington. Their Instagram and Twitter feeds are strictly on brand: Favorite causes, public appearances, romantic birthday wishes, envy-worthy vacation shots. One is hard-pressed to find signs that they live here. Most people assumed that the Obamas would move back to Chicago, where they still own their Hyde Park home. But eight months before leaving office, the president said they would stay in town until younger daughter Sasha graduates from Sidwell Friends in June. Earlier this year, Michelle told Ellen DeGeneres that the family has settled into their new home. Museums and theaters in Washington hoping for the Obama touch have been treated to a few: And restaurants, of course. Restaurants typically skirt the issue when customers or employees share a sighting: One tweeted a photo of the couple at Tail Up Goat; another excited patron videotaped the former president at Nobu. The Obamas, Valerie Jarrett and friends sat at a corner table overlooking the water; their detail sat at the next table. Customers took pictures from afar but did not approach; one party sent a round of shots. Guests clapped as they shook a few hands on the way out. From a political standpoint, keeping a low profile follows a long tradition: But also because they travel a lot to promote their pet platforms: Several of those trips include paid speeches, the modern golden goose for every former president and first lady. Individual speaking fees are not disclosed, but according to multiple media reports, the Obamas get top dollar: His spokesman explained last year that the speeches allow the couple to donate to their favorite social programs. There are also exotic trips for living their best life: Details are even harder to come by here. Former attorney general Eric H. Jarrett, one of their most trusted confidants, declined to answer questions about their post-White House life. Maybe they had a private tour or attended a VIP event with Winfrey? A museum spokesman never responded to questions. Most of their closest friends are African American. Expect a very public book tour, because they need to sell a record number of books to justify that amount. Terms were not disclosed. The Obama Foundation, a key focus of his post-presidency and developer of the presidential center, is also based in Chicago and held its first summit last October. Sasha is scheduled to graduate next June. Her older sister will presumably be at Harvard for the next three years. So, yes, the Obamas are based in Washington — for now.
