Plan of a 19 m barge, built in Venice Contemporary plans Since early 18th century many drawings were made that are in naval or museum archives today. They are the most reliable source of information. Some of them have been put online by museums or government institutions. They are the easiest way to quickly get information on certain vessels. The most famous selection of ship drawings was published by Fredrik Henrik af Chapman in Several reprints of that book are available. The Stockholm Maritime Museum has put the 62 drawings of that publication on its website. There are many more drawings by Chapman and others on the museum website. Use "ritning" as search term. It was published in France in several volumes and is available online with of its plans. On the model shipwrights website many different plans are free to download. The Royal Museums in Greenwich have a large collection of plans that can be bought. The Deutsche Schiffahrtsmuseum made ship plans and drawings of equipment of late 19th century till available for the public in the DigiPEER-project. The United States Coast Guard has several of its ships on its history website , starting with plans from the early sailing cutters in There are several famous printed editions of plans and drawings: Amiral Paris, Souvenirs de la marine. Collections de plans ou dessins de navires et de bateaux anciens ou modernes, in French. Editions des 4 Seigneurs, Grenoble Very detailed large scale plans, metric scale, of sail in 18th and 19th century. Album de Colbert, Reprint by Editions Omega, Nice, The 50 plates show every stage of the building of an gun-ship. Comments on the plans in French, English translations in supplement. Exemplified in a Series of Draughts and Plans with Observations. Boydell Cheapside, London, Facsimile reprint by Jean Boudriot Publications, Description and plans of a gun-ship, a gun-ship and five smaller ships. The ANCRE publishing house offers several reprints of contemporary books and plans on historic ships. Recent works on historic ships The contemporary plans were made for experts who knew how to read such a plan, and usually only specific topics were covered, like the hull lines, or the sail plan. Often only information on the type of ship can be found, not about the specific vessel. If you want to build a model of an historic ship, you are better served with a comprehensive set of plans of that ship, researched and arranged by a naval historian. They used original sources from archives, museum collections and contemporary publications to compile information on each ship and provided drawings for building a model. Somewhat older are the plans by Harold Underhill that are sold by model-dockyard. The Nautical Research Guild sells treatises and plans online and by mail.

Chapter 2 : www.nxgvision.com:Customer reviews: Historic Sailing Ships Colouring Book (Dover History C

AMAZON BEST SELLER This incredible adult coloring book by best-selling artist Jade Summer is the perfect way to relieve stress and aid relaxation while enjoying beautiful and.*

This yet another good colouring book in the Dover series. It is a book that works on two levels. Firstly it is really good colouring book on ships. Trychare has selected well and the ships range from the early Greek Triremes, Roman trade, Phoenician ships and so on right to the Cutty Sark. I must admit Dover Colouring books are a guilty pleasure. The range of subjects is quite staggering. I have several of the History type subjects which are excellent. Dover are excellent- cheap, well drawn, educational and fun. BUT the paper that they use is largely recycled which is admirable but there is a trade off. Whilst coloured pencils crayons are fine paints and fibre tips and the like are not. The paints disintegrate the paper and the fibre tips bleed through. The cover shows a Spanish ship in full sail but the artist has made the old mistake of showing the sails blowing one way with the flag going against the wind! A school boy error. But, and this is the important point that anyone who likes sailing ships or takes an interest will love this book. In all thirty-four historic sailing ships are depicted and really well IMHO. Each sailing ship has a decent explanation which adds to the interest and delight of the book. Secondly it is an excellent resource for education. If you have a topic or a reference library then this is a good book to get. This type of book saved me hours of prep and research and made tailoring worksheets and the like much easier. It really is excellent. Great fun at a cheap price.
