

Chapter 1 : India Changes MBBS Curriculum After 21 Years, Doctors To Study Ethics & Attitude

1) Students will receive clinical exposure in their first year instead of the second. 2) In a bid to help students better cope with learning the complexities of medicine, overcome the language barrier and ensure they can handle the workload, the new curriculum will include a foundation course in the first year.

Search New CA course will make entry tough for students Institute of Chartered Accountants of India has proposed changes in the CA curriculum that are expected to be implemented by November education Updated: Mar 22, The entry-level test is named CPT and is currently designed in the pattern of entry-level tests for engineering, medical and other professional courses. Students who are in the final year of their graduation can also register for the IIPCC on provisional basis. The last leg of the CA course is the final course, designed to impart expert knowledge in financial reporting, auditing and professional ethics, taxation, corporate laws, system control, strategic finance and advanced management accountancy. As per the proposed changes, the three levels would be called foundation, intermediate and final. The weightage given to some of the level 1 subjects will be changed. The paper on fundamentals of accounting, which is already there at the CPT level carrying 60 marks, will be renamed as principles and practices of accounting and will carry marks as it is the core subject for the CA profession. Meet Nischal Narayanam General English and business and commercial knowledge will also be added at the first level as new subjects, given their importance in the modern business world and preparing the CAs for tomorrow. Also, the foundation examination will be partly descriptive and partly objective. The present MCQ-based system encourages students to do a lot of guesswork. As a result, even undeserving students reach the next level. The foundation exam is likely to be conducted along with intermediate and final in May and November. In another expected change, students will have to appear for eight papers in level 2 intermediate under the new scheme. The papers on business laws 60 marks , communication 20 marks and ethics 20 marks in level 2 may be changed to corporate laws and other laws marks. Cost accounting may carry marks instead of A new paper on business economic environment 40 marks may be added. ICAI is now in the process of preparing a syllabus for each subject. Once syllabi are prepared, the new study material based on this syllabi will be prepared. The government-approved scheme will be notified in the Gazette of India for inviting comments for 45 days. The modified scheme will be sent to the ministry of corporate affairs for final approval. The institute is expecting the changes to be implemented by November

Chapter 2 : GCIV: India Changes Course

Cyclone Gaja changes course, likely to make landfall between Cuddalore and Pamban in TN V Ayyappan Cyclone Gaja has changed its course and might make landfall between Cuddalore and Pamban in Tamil.

The exam is the standard for Change Management Certification. The exam is intended to validate student proficiency with Change Management tools and techniques. The following highlights the exam. The exam is included in the program. Upon submitting the retake fee, Acuity Institute will provide areas in the course for the student to review prior to the next exam attempt. The exam is administered online. Students will need to have an active internet connection to complete the exam. The exam is open book. Students may use any reference materials to complete the exam training manuals, project materials, etc. Students have a maximum of 2 hours minutes to complete the exam. Once the entire exam is complete, the student will be notified immediately if they passed the exam. Students will not have access to their answers; this information is kept confidential to Acuity Institute. This certification program was comparable to other programs I researched, but it was much more convenient. I was able to download all of the materials and complete the course online when it fit in my schedule. This course provided a good foundation for executing a change management effort. The exercises and tests required thought and helped me to grasp the concepts. It also provided some great background information on why change is so hard for us as humans. As someone who has been a change manager on more than one project; this certification will help me improve planning and organizing my next change management project. This course will certainly benefit change management professionals whether they are seasoned or new to the field. I thought it was a fabulous class that provided structure to what can at times be a daunting qualitative challenge for an organization. I valued the formal methodology, tools, templates and concepts taught throughout the program. I particularly look forward to applying the tools and techniques gained through the simulation in my day to day responsibilities in leading our Firm and Clients through organizational change. I found it grounded in reality, unlike many other training programs which are too generic and artificial. It was quite refreshing to see that my 30 years of experience were very applicable to this exercise. All the videos, the study material everything provided were so in detail and everything has been explained very elaborately. Also, there is a provision of assistance from the experts if required. In all, this is a One stop solution for someone who wants to learn Managing the Change in enjoyable way. I needed something to use toward my Change Management Certification so it needed to be aligned with the Association of Change Management Professional process. I found the content to be solid and informative AND I learned some new concepts! Additionally the toolkit was fabulous and the fact that it was integrated and linked in one file is superb! I would highly recommend this training – it is the biggest value for the money out there for basic, CM understanding, skills and tools. The material had an adequate depth level – this is a real course, not couple of slides put together to take your money! All in one, a great experience, worth every penny! George Jucan Change Management Professional The Acuity Institute Change Management Certification course was great value and an effective online training program to gain the skills that our company is looking for, as we increasingly see the need for effective Change Management in the projects we undertake. In particular I was impressed with the professionalism and enthusiasm of the people at Acuity I interacted with. In the most recent project, there was a Change Management Department that was run by the Customer. I observed how well they were able to identify the Change Management Risks, both from the standpoint of the technology, and more importantly from the Stakeholders. Their methodical approach to the analysis and then the Change Management Plan impressed me immensely, and I wanted to learn more about Change Management and how to excel. I researched and found this Change Management Professional course available, and it had excellent reviews and the FAQs were impressive with the responsiveness of Acuity. I registered and started taking the course. I have already starting using the tools and information to increase the immediate and long term success of my projects. Thank you, and what an excellent course. I highly recommend this course for all Project Managers. Dave Helfrich Change Management Professional As a Change Management professional this certification seemed like a perfect fit to my overall education and experience. The course was well written and

the provided templates provided concrete experience in accordance with course materials. I would recommend this course for anyone pursuing a career in Change Management. The structure of the course, methodology, and Change Management toolkit provide the essential tools for you and your organization to manage change in this continually changing environment. From reinforcing the vision, to accountability, including all stakeholders, skills development, ensuring measures are in place, and recognizing and rewarding along the way, the change management course is scenario-based and provides in-depth knowledge and understanding for you to succeed. All the tools you need are included to help you and others overcome the cognitive hurdle of change. This course has certainly helped me improve upon planning and executing my next change management project. I highly recommend this training for anyone wanting to implement change in their organization. Robert Jeffcoat Change Management Professional The Change Management Certification Course offered educated me well on the process, motivation and theory of change management. As a retail professional, the climate is constantly changing. This course provided clear and concise information that will enable me to lead my team through the changing environment. I feel that this course will benefit me greatly in my career. It does provide with hands on tools and practice exercises, offering a constructivist experience to the student. I enjoyed the course, and recommend it for persons who wants to understand change management process as well as getting additional material to get ready for the CCMP certification.

Chapter 3 : Hindu nationalist-led state changes Muslim name of Indian city | World news | The Guardian

India Changes Course Dr. Salli Vargis, Professor History, Honors Program Coordinator, Georgia Perimeter College Fed up with corruption, dynastic policies and ineffective public services, Indian voters catapulted Narendra Modi and his Bharatiya Janata Party to power in the country's elections.

Gender inequality in India Secondary education covers children aged 12 to 18, a group comprising 8. The two halves of secondary education are each an important stage for which a pass certificate is needed, and thus are affiliated by central boards of education under HRD ministry, before one can pursue higher education, including college or professional courses. Those at least 15 years old by 30 May for a given academic year are eligible to appear for Secondary board exams, and those 17 by the same date are eligible to appear for Higher Secondary certificate board exams. It further states that upon successful completion of Higher Secondary, one can apply to higher education under UGC control such as Engineering, Medical, and Business Administration. Secondary education in India is examination-oriented and not course-based: Senior school or high school is split into 2 parts grades and grades with a standardized nationwide examination at the end of grade 10 and grade 12 usually informally referred to as "board exams". Grade 10 examination results can be used for admission into grades at a secondary school, pre-university program, or a vocational or technical school. Passing a grade 12 board examination leads to the granting of a secondary school completion diploma, which may be used for admission into vocational schools or universities in the country or the world. Most reputable universities in India require students to pass college-administered admissions tests in addition to passing a final secondary school examination for entry into a college or university. School grades are usually not sufficient for college admissions in India. Most schools in India do not offer subject and scheduling flexibility due to budgeting constraints for e. English, Mathematics, Social Studies, Science, one language, and one optional subject depending on the availability of teachers at different schools. Students re-enrolling in most secondary schools after grade 10 have to make the choice of choosing a "core stream" in addition to English or the local language: Students study Mathematics up to single-variable Calculus in grade

Types of schools[edit] Government schools[edit] Majority of the students study in the government schools where poor and vulnerable students study for free until the age of Kendriya Vidyalaya project, was started for the employees of the central government of India, who are deployed throughout the country. Largest system of aided schools is run by D. In , four of the top ten pre-schools in Chennai were Montessori. These are modelled after British public schools , which are a group of older, expensive and exclusive fee-paying private independent schools in England. According to some research, private schools often provide superior results at a multiple of the unit cost of government schools. The reason being high aims and better vision. According to the latest DISE survey, the percentage of untrained teachers para-teachers is The competition in the school market is intense, yet most schools make profit. Even the poorest often go to private schools despite the fact that government schools are free.

Chapter 4 : Ganges - Wikipedia

Nearly a month after India pushed back its deadline indefinitely for exporters to put bar codes on their primary packages, the Directorate General of Foreign Trade (DGFT) has set a new deadline of April

November 7, Munch India will open on Nov. Munch India, also the name of their food truck, will open in Berkeley on Wednesday, Nov. Munch India Shattuck Ave. During this time, Ahmed helped his wife with catering gigs on the weekends. Family upbringing and religion, she said, are the biggest factors that determine what people in various parts of India like to eat and how they prepare it. The couple also operates the Munch India food truck, which makes appearances at four locations in San Francisco and Emeryville captured here, at 62nd and Doyle streets. The couple will run the food truck during the day and open the restaurant for dinner, starting at 5: Sarah Han About six years ago, the couple decided to officially work together again, starting the Munch India food truck. Appearing at four locations during lunch hours in San Francisco and Emeryville five days a week, the truck offers a menu of dishes from areas across south Asia. And what about naan? Diana Afroza, executive chef and co-owner of Munch India. Another is the all-you-can-eat buffet. Recalling his days working as a waiter at an Indian restaurant during his college years, he said the common practice was for leftovers to be frozen at the end of the day, then reheated the next day to be served to unsuspecting customers. He and Afroza have tried most of the Indian restaurants in the East Bay and they notice a similar lack of quality and freshness in the offerings. Who do they think they are? Munch India is a casual sit-down restaurant offering seating for up to 20 diners. The restaurant will be open for dinner only and closed on Sundays and Mondays , as the couple “ who live in Berkeley, about a minute walk away ” will also continue running their food truck during lunch hours, although they may end up amending their appearance schedule once the restaurant opens. The menus at the truck and the restaurant will always be different, the couple said. At the restaurant everything will be served a la carte, with a choice of 10 to 12 total dishes, from appetizers and main dishes to desserts. Diners will be able to watch Afroza and Ahmed cook their meals to order in the open kitchen. Munch India features an open kitchen. Both dishes are popular in Northern Indian, in places like Delhi and Lucknow, which Ahmed considers the food center of India. For now, Munch India will not serve alcohol. Eventually, it will offer a variety of soft drinks and lassis, along with non-alcoholic cocktails. Their thought, perhaps audacious and naive, is that the quality of their food will spread the word of their existence. The couple is willing to take a chance, at least at first. Hours will be 5: Follow Munch India on Twitter for its most current food truck schedule. Become a member Berkeleyside relies on reader support so we can remain free to read for everyone in Berkeley. Become a member and be part of the future of independent, local journalism.

Chapter 5 : New Changes in CA Course to be Introduced by ICAI - Robomate Plus

New Changes in CA Course to be Introduced by ICAI According to the Economic Times, the Institute of Chartered Accountants of India (ICAI), the exam conducting authority, has approached the Ministry of Corporate Affairs to improvise the CA curriculum, introduce electives, new subjects, and open book tests in a few papers.

Mizoram Assembly Polls The IPCC-suggested mitigation pathways will need huge reductions in energy-demand and agricultural emissions, replacement of fossil fuels, plus some form of CO2 removal carbon storage or sequestration “ India is prepared for none of these. Life as we know it will not be the same. We need changes in every aspect “ land, energy, industry, buildings, transport, and cities. For such transitions to be successful, every person will have to bear some weight. This will mean changes in the food we eat, the way we travel, what we wear or consume every single day. And yet, around the world, individuals and groups are taking collective action, pricking tiny holes of light in a dark, despairing frame. Veganism, once considered a joke, is now a veritable business. In Great Britain, the number of vegans quadrupled from and , for many the climate crisis is the reason. Frustrated by the failure of governments, some citizens are even signing up for rebel action. Spanning a wide age group members are ready to get arrested. In wider collective action, citizens are taking governments to court over inaction. Lastly, voters, the ultimate bugaboo for politicians, are changing. In the US midterm elections, there are several constituencies with very close electoral races where climate worry ranks high. How long before climate change worry forces its way into politics in India? This is perhaps good news for those who want to lobby and affect change. The success of the Montreal Protocol the only other comparable international agreement shows the importance of key nations and leadership in such global problems. Pressure can be effective, targeted pressure even more. Perhaps just as important as the climate conference agenda, is the dinner table conversation or the street-side chat with a neighbour. It is an important message, I think, that places us in the middle of a maelstrom and gives us agency to prove that, after all, we had the power to change. This is the first in a series of articles on climate change, based on the recently published IPCC report Padmaparna Ghosh is a freelance writer.

Chapter 6 : Change Management Certification - Online training with Acuity Institute

Dr. David Lai presents "India Changes Course" as part to the Great Decisions lecture series, at the AHEC, Carlisle, Pa, March

Bhagirathi River at Gangotri. Devprayag , confluence of Alaknanda right and Bhagirathi left rivers, beginning of the Ganges proper. The headstreams and rivers are labelled in italics; the heights of the mountains, lakes, and towns are displayed in parentheses in metres. The main stream of the Ganges begins at the confluence of the Bhagirathi and Alaknanda rivers in the town of Devprayag in the Garhwal division of the Indian state of Uttarakhand. The Bhagirathi is considered to be the source in Hindu culture and mythology, although the Alaknanda is longer, and, therefore, hydrologically the source stream. The five confluences, known as the Panch Prayag , are all along the Alaknanda. They are, in downstream order, Vishnuprayag , where the Dhauliganga joins the Alaknanda; Nandprayag , where the Nandakini joins; Karnaprayag , where the Pindar joins, Rudraprayag , where the Mandakini joins; and finally, Devprayag , where the Bhagirathi joins the Alaknanda to form the Ganges River proper. After the Tamsa the Gomti River joins, flowing south from the Himalayas. Just before the border with Bangladesh the Farakka Barrage controls the flow of the Ganges, diverting some of the water into a feeder canal linked to the Hooghly for the purpose of keeping it relatively silt-free. The Hooghly River is formed by the confluence of the Bhagirathi River and Jalangi River at Nabadwip , and Hooghly has a number of tributaries of its own. After entering Bangladesh , the main branch of the Ganges is known as the Padma. The Padma is joined by the Jamuna River , the largest tributary of the Brahmaputra. Catchment region of the Ganga The hydrology of the Ganges River is very complicated, especially in the Ganges Delta region. The river Ganges at Kolkata , with Howrah Bridge in the background Lower Ganges in Lakshmipur, Bangladesh The name Ganges is used for the river between the confluence of the Bhagirathi and Alaknanda rivers, in the Himalayas, and the India-Bangladesh border, near the Farakka Barrage and the first bifurcation of the river. A significant portion of the discharge from the Ganges comes from the Himalayan mountain system. This section of the Himalaya contains 9 of the 14 highest peaks in the world over 8,m in height, including Mount Everest which is the high point of the Ganges basin. Frequently, discharge is described for the mouth of the Meghna River, thus combining the Ganges with the Brahmaputra and Meghna. It is one of the key sites for measuring streamflow and discharge on the lower Ganges. Consequently, streamflow in the Ganges is highly seasonal. The average dry season to monsoon discharge ratio is about 1: This strong seasonal variation underlies many problems of land and water resource development in the region. Bangladesh, in particular, frequently experiences drought during the dry season and regularly suffers extreme floods during the monsoon. The two largest rivers, the Ganges and Brahmaputra , both split into tributary channels, the largest of which merge with other large rivers before themselves joining. This current channel pattern was not always the case. Over time the rivers in Ganges Delta have changed course , sometimes altering the network of channels in significant ways. Before the late 12th century the Bhagirathi-Hooghly tributary was the main channel of the Ganges and the Padma was only a minor spill-channel. The main flow of the river reached the sea not via the modern Hooghly River but rather by the Adi Ganga. Between the 12th and 16th centuries the Bhagirathi-Hooghly and Padma channels were more or less equally significant. After the 16th century the Padma grew to become the main channel of the Ganges. By the end of the 18th century the Padma had become the main tributary of the Ganges. The present confluence of the Ganges and Meghna formed about years ago. In there was a great flood on the Teesta River , which at the time was a tributary of the Ganges-Padma River. The flood of caused the Teesta to undergo a sudden change course an avulsion , shifting east to join the Brahmaputra and causing the Brahmaputra to shift its course south, cutting a new channel. This new main channel of the Brahmaputra is called the Jamuna River. It flows south to join the Ganges-Padma. Since ancient times the main flow of the Brahmaputra was more easterly, passing by the city of Mymensingh and joining the Meghna River. Today this channel is a small tributary but retains the name Brahmaputra, sometimes Old Brahmaputra.

Chapter 7 : India-Pak talks meaningless unless Pak changes course: US think-tank

Designated as a primary affiliate for the market of India as a part of the global network affiliate for Prosci, we offer Prosci Change Management training program as an open enrolment, public forum as well as client specific formats for corporates (HODs, managers, projects, employees at large).

Chapter 8 : Changes in ICSE and ISC syllabus to be effective from | India News - Times of India

Indian culture is a complex one, having been shaped by a variety of influences ranging from Hindu philosophy to British colonisation. More recently, spectacular economic growth and the explosion of offshore outsourcing in India have brought even greater economic and social changes to India and its population.

Chapter 9 : Netflix Unveils More Originals For India Market | Deadline

The river Pamba has changed its course in the area around Sabarimala in Kerala's Pathanamthitta district, forcing the local authorities and the Travancore Devaswom Board to ban entry of devotees.
