Abstract Integrale Linguistik honour the life and work of Helmut Gipper. Part I covers the History of Linguistics (Hennig Brinkmann, Eugenio Coseriu, Hartwig Franke & Kristina Franke, Johannes Lohmann, Gerold Ungeheur); Part II Theory of Linguistics (Karl-Otto Apel, Edeltraud Bälow, ShirÅ Hattori, Ladislaus Hojsak, Alfred Hoppe, Werner Ingendahl, H. Joachim Neuhaus.

Tokoh-tokoh yang merupakan penganut teori ini adalah: Bloomfield, Hockett, Gleason, Bloch, G. Pandangan-pandangan Ferdinand De Saussure itu antara lain mengenai: Telaah Sinkronik dan diakronik dalam studi bahasa. Perbedaan Langue dan Parole 3. Hubungan sintagmatik dan hubungan asosiatif atau paradigma Keempat hal tersebut belum dikenal dalam studi linguistik sebelumnya. Adapun penjelasannya adalah sebagai berikut: De Saussure membedakan telaah bahasa secara sinkronik dan telaah bahasa secara diakronik: Telaah bahasa secara sinkronik adalah mempelajari bahasa pada suatu waktu tertentu b. Dalam literatur linguistik dinyatakan bahwa sejak Plato hingga akhir abad ke kajian kebahasaan bersifat diakronik. Saat itu hubungan genetis pada tiap-tiap bahasa dicari ketersambungannya. Kehadiran Ferdinand de Saussure, dengan karya monumentalnya *Course in General Linguistic*, membawa perubahan pada kecenderungan itu. Sejak itu, terjadi peralihan arah pada kajian linguistik, dari kajian diakronik menuju sinkronik, dengan penelitian struktural-gramatikal menjadi titik tekannya. Pemikiran inilah yang menjadi titik tolak munculnya aliran strukturalisme dalam bahasa. Perilaku bertutur itu terdiri dari dua bagian kegiatan: Di dalam otak penutur A terdapat konsep-konsep atau fakta-fakta mental yang dihubungkan dengan bunyi-bunyi linguistik sebagai perwujudannya yang digunakan untuk mengeluarkan konsep tersebut. Baik konsep maupun imaji bunyi itu terletak di suatu tempat yaitu di pusat penghubung yang berada di otak. Lalu terjadilah proses psikologis yang menghubungkan imaji bunyi ini dengan konsep yang sama, seperti yang ada dalam otak A. Apabila B berbicara dan A mendengarkan, maka proses yang sama akan terjadi pula. Jadi karena sifatnya yang konkret itu maka parole itu bisa didengar. Sedangkan Langue adalah bahasa tertentu sebagai sistem tertentu. Jadi karena bersifat abstrak, hanya ada dalam otak penutur bahasa yang bersangkutan. Menurut De Saussure linguistik murni mengkaji langue bukan parole. Adapun alasannya sebagai berikut: Langue bersifat sosial dalam pengertian sinkronik dan berada dalam otak. Sedangkan parole bersifat individual dalam pengertian idiosinkronik. Langue bersifat abstrak dan tersembunyi di dalam otak sedangkan parole selalu bergantung pada kemauan penutur dan bersifat intelektual. Langue adalah pasif sedangkan parole adalah aktif. Jadi menurut De Saussure parole tidak layak dijadikan bahan kajian linguistik karena sifatnya yang individual dimana apa yang keluar dari mulut penutur dalam bentuk kalimat yang berubah-ubah dan bersifat idiosinkretis. Sebaliknya langue layak dijadikan bahan kajian linguistik karena bersifat sosial dimana di kalangan anggota masyarakat yang dipertalikan satu sama lain oleh langue akan tercipta suatu average yang merupakan tanda atau lambang yang sama dan berpola dan digabungkan dengan konsep-konsep yang sama dan berpola, serta tidak berubah-ubah dari satu individu ke individu lain. Istilah petanda dan penanda diambil dari kridalaksana, Kedua unsur itu tak terpisahkan seperti dua sisi selembur kertas. Hubungan antara penanda dan penanda, yakni antara bentuk dan makna, didasari konvensi dalam kehidupan sosial. Kedua unsur itu terdapat dalam kognisi para pemakai bahasa. Namun, tanda linguistik itu tidak dapat berubah immutable , tetapi sistem bahasa dapat berubah. Hal ini berarti bahwa bahasa dapat dianggap sebagai sebagai satu deretan atau urutan. Hubungan sintagmatik dan hubungan asosiatif atau paradigma Hubungan Sintagmatik adalah hubungan antara unsur-unsur yang terdapat dalam suatu tuturan, yang tersusun secara berurutan, sifatnya linear. Hubungan sintagmatik termasuk dalam tataran fonologi, morfologi, dan sintaksis. Misalnya pada kata kita terdapat hubungan fonem-fonem dengan urutan k-i-t-a, apabila urutannya diubah maka maknanya akan berubah, atau tidak bermakna sama sekali. Morfem adalah kesatuan bentuk bahasa terkecil yang mengandung arti dan makna. Hubungan paradigmatis dapat diperoleh dengan cara substitusi. Sama halnya dengan hubungan sintagmatik, hubungan paradigmatis terdapat juga dalam tataran fonologi, morfologi, dan sintaksis.

Contrary to the conceptions proposed by Noam Chomsky , which reduced linguistics first to psychology and later to biology , IL adopts a non- reductionist stance: A broad view of linguistic subject matter is taken: This includes not only systematic aspects of languages, i. It is assumed that each major aspect of natural languages the morphological, the syntactic, the semantic, etc. This is achieved in IL by developing separate but interrelated theories for each major aspect Integrational Morphology, Integrational Syntax, etc. A non-linguistic theory e. History[edit] Integrational Linguistics is an approach to linguistics that has arisen mainly from work done by Hans-Heinrich Lieb since roughly From its inception, Integrational Linguistics has been non-generative. As such, it was opposed to the general orientation of linguistics in the sixties and early seventies where language variability was programmatically disregarded. The integrational treatment of language variability has later been continued, and to some extent completed, in Lieb In , Lieb began work on a general syntax as part of a theory of language systems. At the same time he was also working on a theory of grammars conceived as part of a theory of linguistic description not of a theory of language. The integrational format of grammars construed as empirical axiomatic theories Lieb , [12] is also characterized in Lieb Part G , [4] and more briefly in Lieb Under his direction, the group did work both on a general syntax and on the syntax of German from to By now the theory of language developed in Integrational Linguistics has grown into an in-depth theory of all major aspects of language, and its application to a number of different and unrelated languages of the world is in progress.
