I have always been an avid traveller from inside but never really got so much of opportunity earlier. In my words, you live only once though many other people have said it earlier and you have to make the most of it. The pristine clear lakes surrounded by the dry hills, freezing cold and a walk on the frozen rivers is all you need to see and experience in Ladakh. No must visit list is complete without including Ladakh. Rann Of Kutch Ohh yeah! The feeling is wicked and weird when one sees white land till the sight! Sikkim If you have ever thought that the heaven of earth is only Kashmir and the paradise is Switzerland then my lovely readers, Sikkim is going to give you the shock of life. The fairly unexplored region is home to some of the best scenic mountains and waterfalls and what not. Ultimate peace is what you get in the paradise of Sikkim, peace to the eyes and peace to the soul. It is not a cult favorite tourist place but I have included this in my list because I really want to see the beauty of this place situated in Meghalaya. If you ever plan a trip to the North-East or Shillong to be precise, you should not come back without visiting this little village. Varanasi Being a North Indian I feel really ashamed of the fact that I have not been able to see the ancient city yet. If you want to feel the culture, spirit and beauty of Indian, Banaras is where you belong. The colorful city is beautifully clad with Ganga Ghats and little boats floating in the Holy river. The ancient architecture is commendable and looks enthralling when sun sets with the vision of Ganga Aarti. You have always named those two islands while filling the map of India. Enjoy some adventure activities in the sea as well. Kolkata is anyways joyful but at the time of the Bengali festival Kolkata adapts a whole new Avatar. The bridge still exists though it is geologically evolved now but it surely a must visit place to witness our history and culture. Goa The fun begins here. Like my brother says people forget their own names in Goa, it is crazy. Currently working with NamasteIndiaTrip. To maintain good health a well balanced diet is essential. Plot[edit] The story begins in May , in the Lidenbrock house in Hamburg , Germany , with Professor Lidenbrock rushing home to peruse his latest purchase, an original runic manuscript of an Icelandic saga written by Snorri Sturluson Snorre Tarleson in some versions of the story , " Heimskringla "; the chronicle of the Norwegian kings who ruled over Iceland. While looking through the book, Lidenbrock and his nephew Axel find a coded note written in runic script along with the name of a 16th-century Icelandic alchemist , Arne Saknussemm. Coded, cryptic, or incomplete messages as a plot device would continue to appear in many of his works and in each case Verne would go a long way to explain not only the code used but also the mechanisms used to retrieve the original text. Lidenbrock and Axel transliterate the runic characters into Latin letters, revealing a message written in a seemingly bizarre code. Lidenbrock attempts a decipherment, deducing the message to be a kind of transposition cipher ; but his results are as meaningless as the original. Professor Lidenbrock decides to lock everyone in the house and force himself and the others Axel, and the maid, Martha to go without food until he cracks the code. Axel discovers the answer when fanning himself with the deciphered text: In what Axel calls bad Latin, the deciphered message reads: The Runic cryptogram In Snefflls [sic] Iokulis kraterem kem delibat umbra Skartaris Iulii intra kalendas deskende, audas uiator, te [sic] terrestre centrum attinges. In slightly better Latin, with errors amended: In Sneffels Jokulis craterem, quem delibat umbra Scartaris, Julii intra kalendas descende, audax viator, et terrestre centrum attinges; quod feci. Arne Saknussemm which, when translated into English, reads: Professor Lidenbrock is a man of astonishing impatience, and departs for Iceland immediately, taking his reluctant nephew with him. In late June, they reach the volcano, which has three craters. However, the text also states that this is only true during the last days of June. During the next few days, with July rapidly approaching, the weather is too cloudy for any shadows. Alas for Axel, however, on the second to last day, the sun comes out and the mountain peak shows the correct crater to take. After descending into the crater, the three travellers set off into the bowels of the Earth, encountering many strange phenomena and great dangers, including a chamber filled with firedamp , and steep-sided wells around the "path". After taking a wrong turn, they run out of water and Axel almost dies, but Hans taps into a neighbouring subterranean river. Lidenbrock and Axel name the resulting stream the "Hansbach" in his honour and the three are saved. At another point, Axel becomes separated from the others and is lost several miles from them. Luckily, a strange acoustic phenomenon allows him to communicate with them from some miles away, and they are soon reunited. After descending many miles, following the course of the Hansbach, they reach an unimaginably vast cavern. This underground world is lit by electrically charged gas at the ceiling, and is filled with a very deep subterranean ocean, surrounded by a rocky coastline covered in petrified trees and giant mushrooms. The travelers build a raft out of trees and set sail. While on the water, they see several prehistoric creatures such as a giant Ichthyosaurus , which fights with a Plesiosaurus and wins. After the battle between the monsters, the party comes across an island with a huge geyser , which Lidenbrock names "Axel Island". A lightning storm again threatens to destroy the raft and its passengers, but instead throws them onto the coastline. This part of the coast, Axel discovers, is alive with prehistoric plant and animal life forms, including giant insects and a herd of mastodons. On a beach covered with bones, Axel discovers an oversized human skull. Axel and Lidenbrock venture some way into the prehistoric forest, where Professor Lidenbrock points out, in a shaky voice, a prehistoric human, more than twelve feet in height, leaning against a tree and watching a herd of mastodons. Axel cannot be sure if he has really seen the man or not, and he and Professor Lidenbrock debate whether or not a proto-human civilization actually exists so far underground. The three wonder if the creature is a man-like ape, or an ape-like man. The sighting of the creature is considered the most alarming part of the story, and the explorers decide that it is better not to alert it to their presence as they fear it may be hostile. The travellers continue to explore the coastline, and find a passageway marked by Saknussemm as the way ahead. However, it is blocked by what appears to be a recent

cave-in and two of the three, Hans and the Professor, despair at being unable to hack their way through the granite wall. The adventurers plan to blast the rock with gun cotton and paddle out to sea to escape the blast. Upon executing the plan, however, they discover that behind the rockfall was a seemingly bottomless pit, not a passage to the center of the Earth. The travellers are swept away as the sea rushes into the large open gap in the ground. After spending hours being swept along at lightning speeds by the water, the raft ends up inside a large volcanic chimney filling with water and magma. Terrified, the three are rushed upwards, through stifling heat, and are ejected onto the surface from a side-vent of a stratovolcano. When they regain consciousness, they discover that they have been ejected from Stromboli , a volcanic island located in southern Italy. The Professor has some regret that their journey was cut short. At the very end of the book, Axel and Lidenbrock realize why their compass was behaving strangely after their journey on the raft. They realize that the needle was pointing the wrong way after being struck by an electric fireball which nearly destroyed the wooden raft. Prehistoric animals featured[edit].

Chapter 3 : Journey to the Center of the Earth Summary - www.nxgvision.com

This is the Journey To The Center Of The Earth: Original CD. I don't know why movie reviews are here for the Music Soundtrack by Bernard Herrman. All of Bernard Herrmann's movie soundtrack music is amazing.

Background[edit] Keyboardist Rick Wakeman had wanted to make an album that told a story with its music after his father took him to see Peter and the Wolf by Sergei Prokofiev. I was playing keyboards with the lads when I thought, they could play Journey for me. Guitarist Mike Egan, who had played on Six Wives, rounded out the band. Actor David Hemmings was then chosen, and agreed to take part. The concerts and album were announced in October Wakeman explained, "Someone in the street had accidentally kicked out the vocal mike cable just before we started recording. So we boosted up the vocals that were picked up on the other mikes". A snare drum and its microphone also broke during the performance, and Hemmings recorded more narration in the studio after it was found that a tape change occurred in the middle of one of his passages. This sparked concern from the label and management for potential bootleg recordings of the concert to be sold to the public. It peaked at No. It was subsequently released in the four-channel Quadradisc CD-4 format. The album has sold 14 million copies worldwide. Reception[edit] The album received some negative reaction upon its release, with music critics having described the record as a "classical pastiche A journalist for The Sunday Times missed the Royal Festival Hall concert, but thought on record the music "comes over magnificently This could be a score for a Hollywood musical "tuneful, but with epic overtones". However, a "huge cardboard packing case" arrived at his house in which stayed in his garage for "about five months" before he found the score at the bottom which was damaged by water. A year was spent digitising and forming the complete score with conductor Guy Protheroe. Wakeman re-recorded the album with an orchestra, choir, and members of his English Rock Ensemble band as a studio album, incorporating 20 minutes that was previously cut. As Hemmings died in , the narration is voiced by actor Peter Egan. Track listing[edit] All tracks written by Wakeman. Because I stole a few bars.

Chapter 4 : Watch Journey 3: From the Earth to the Moon () Full Movie Online Free Download

But Journey To the Center of the Earth is a story about something that's still never been done! (And won't ever be) Sure, we know a lot more about the Earth's core now than Jules Verne ever did, and the science of the story doesn't work with our present knowledge.
