Lexi-Pediatric Suite includes: Lexi-Drugs™ for Pediatrics Now the information found in Lexi-Comp's trusted Pediatric Dosage Handbook can be easily accessed in your PDA!*

What should you do about behavioral issues, from toilet training to teaching responsibility to teenagers? These are questions that all parents have. Health problems and parenting issues can arise anytime evenings, weekends, when you're at work or traveling or your doctor's office is closed. Pediatric SymptomMD is designed especially for these concerns and challenges. The Symptom Care Guides help you make smart decisions on what level of care if any is needed and how to provide speedy symptom relief for minor illnesses or injuries you can manage on your own. Pediatric SymptomMD is derived from the clinical protocols used by pediatricians and nurses in 10, practices and nurse advice call centers in the US and Canada. They have been tested for 15 years on more than million symptom calls. The Parent Advice Messages deal with the most common behavior and wellness questions parents ask their physicians. Each topic provides a description of the issue, three to five specific recommendations to address the concern, and often additional resources which may be useful to your situation. Symptom Checker Features Easy 3-step navigation: Choose the most appropriate symptom care guide 2. Use the symptom decision chart to find the recommended action 3. Follow the self care advice to make your child more comfortable The care guide that best matches your child's symptom can be located quickly by using the alphabetical index, body area index, or keyword search. Content - each symptom care guide contains: If not, there are quick links to related guidelines. The instructions provide clear, up-to-date steps for relieving symptoms. The information provided with this Application is not a substitute for professional medical or behavioral advice, diagnosis or treatment; it is for informational purposes only. Talk with your healthcare provider about any questions you may have regarding a medical condition. If you think your child may have a medical emergency, call the doctor or immediately.
