Precautions Precautions You cannot operate your oven with the door open due to the safety interlocks built into the door mechanism. These safety interlocks automatically switch off any cooking activity when the door is opened; which in the case of a microwave oven could result in harmful exposure to microwave energy.

Table Of Contents How the Microwave Oven Works Microwaves are a form of energy similar to radio and television waves and ordinary daylight. Normally, microwaves spread outwards as they travel through the atmosphere and disappear without effect. Microwave ovens, however, have a magnetron which is designed to make use of the energy in microwaves. Please pay particular attention to the guidance on where to install your oven. When unpacking your oven make sure you remove all accessories and packing. Page 5 Plug your oven into a standard household socket. Make sure your oven is the only appliance connected to the socket. If your oven does not operate properly, unplug it from the electrical socket and then plug it back in. If the clock or display shows any strange looking symbols, unplug your oven from the electrical socket and plug it back in and reset the clock. Once the child lock is set, you will be unable to use any functions and no The time will disappear on the display if you have set the clock. High power is automatically selected but repeated presses of the MICRO button will select different power levels. Micro Power Level Your microwave oven is equipped with 5 power levels to give you maximum flexibility and control over cooking. The table below shows the examples of food and their recommended cooking power levels for use with this microwave oven.

Two Stage Cooking Two stage Cooking During two stage cooking the oven door can be opened and food checked. At the end of stage1, BEEP sounds and stage 2 commences. Quick Start In the following example I will show you how to set 2 minutes of cooking on high power. Auto Defrost 14 The temperature and density of food varies, I would recommend that the food is checked before cooking Auto commences. Pay particular attention to large joints of meat and chicken, some foods should not be completely thawed before cooking. For example fish cooks so quickly that it is sometimes better to begin cooking while still Defrost slightly frozen. This will prevent thin areas becoming warm during defrosting. Ensure the foil does not touch the oven walls.

Quick Defrost 16 Quick Defrost Use this function to thaw only 0. This will require a standing time to allow the center to thaw. In the following example will show you how to defrost 0. Place the mince onto a microwave-safe plate. When BEEP, at this point remove the mince from the microwave oven, turn the mince over and return to the microwave oven. Press start to continue. At the end of the program remove the mince from the microwave oven, cover with foil and allow to stand minutes or until completely thawed.

Heating Or Reheating Guide To heat or reheat successfully in the microwave, it is important to follow several guidelines. Measure the amount of food in order to determine the time needed to reheat. Arrange the food in a circular pattern for best results. Room temperature food will heat faster than refrigerated food. Add 2 tsp water and 2 tsp juice. It is hazardous for anyone to carry out any service or repair operation which involves the removal of any cover which gives protection against exposure to microwave energy.

Important Safety Instructions Important safety instructions Read carefully and keep for future reference 24 Only use utensils that are suitable for use in microwave ovens. Microwave - Safe Utensils Never use metal or metal trimmed utensils in your microwave oven Microwaves cannot penetrate metal. They will bounce off any metal object in the oven and cause arcing, an alarming phenomenon that resembles lightning. Most heat resistant non metallic cooking utensils are safe for use in your microwave oven. Always watch your food while it cooks. Microwave Cooking Stirring Stirring is one of the most important of all microwaving techniques. In conventional cooking, food is stirred for the purpose of blending. Microwaved food, however, is stirred in order to spread and redistribute heat. Always stir from the outside towards the centre as the outside of the food heats first. A There may be several reasons why the oven light will not glow. Light bulb has blown Door is not closed Q Does microwave energy pass through the viewing screen in the door? If the mains sockets in your home differ, or are not suitable for the type of plug supplied then the plug should be removed and a suitable type fitted. Because you
