*Liberty Belles & Boys 4-H Club, Ada, Ohio. likes. We meet the 1st & 3rd Tues. of each month at 7 pm at the First Presbyterian Church in Ada.*

In this issue of E-News: As many people have seen and heard in the news, schools all across the country are experiencing a shortage of school bus drivers. This is true in the Issaquah School District as well. Drivers may work part time or up to 40 hours. Full benefits include medical, dental, and vision. Drivers work a school calendar and schedule. If you or someone you know is interested, please call for more information or apply online by clicking here. In the s the United States Radium Corporation hired hundreds of young women to paint the dials on watches and clocks. The paint glowed in the dark. It was mixed with radium. Many of the girls who worked in the factory started to get mysterious ailments. The company denied all wrongdoing, but some of the young women fought back. Radium Girls by D. Gregory is their story. November 8, 9, 15, 16, 17 at 7: Cash and checks only. It will be held immediately following 1st period, at 9: Community members are welcome and encouraged to attend. Enjoy the extra day with family and friends, and especially to celebrate the service of all U. The general portion begins at 6: Athletes and parents are required to attend. Following the general meeting, separate meetings with winter sport coaches will begin in assigned locations at approximately 7: You are receiving this email because of your relationship with Liberty High. If you wish to stop receiving email updates sent through the Blackboard service, please unsubscribe. Issaquah School District E-News is an unattended email address used to distribute information to the community. To contact someone about topics in E-News, please email orrw issaquah. The Healthy Youth survey includes questions related to physical activity and diet, unintentional and intentional injury, substance use, risk and protective factors, access to school-based services, and sexual behaviors, abuse and orientation. Survey results are used by schools, communities and state agencies to plan programs to support our youth and reduce their risks. Armstrong if you have any questions. Equal Opportunity Notice The Issaquah School District complies with all applicable federal and state rules and regulations and does not discriminate on the basis of sex, race, creed, religion, color, national origin, age, honorably discharged veteran or military status, sexual orientation including gender expression or identity, the presence of any sensory, mental or physical disability, or the use of a trained dog guide or service animal by a person with a disability in its programs and activities, or employment related matters, and provides equal access to the Boy Scouts and other designated youth groups. The following employees are designated to handle questions and complaints of alleged discrimination: The Issaquah School District will also take steps to assure that national origin persons who lack English language skills can participate in all educational programs, services and activities.

Recognizable for its crack, the Liberty Bell remains significant today for its message of liberty. Plan your visit to the Liberty Bell Center to allow time to view the exhibits, see the film, and gaze upon the famous cracked bell. No tickets are required and hours vary seasonally. Today, we call that building Independence Hall. Speaker of the Pennsylvania Assembly Isaac Norris first ordered a bell for the bell tower in from the Whitechapel Foundry in London. That bell cracked on the first test ring. Local metalworkers John Pass and John Stow melted down that bell and cast a new one right here in Philadelphia. Listen to the story of the Liberty Bell in this audio podcast. The wide "crack" in the Liberty Bell is actually the repair job! But, the repair was not successful. The Public Ledger newspaper reported that the repair failed when another fissure developed. This second crack, running from the abbreviation for "Philadelphia" up through the word "Liberty", silenced the bell forever. No one living today has heard the bell ring freely with its clapper, but computer modeling provides some clues into the sound of the Liberty Bell. The inscription of liberty on the State House bell now known as the Liberty Bell went unnoticed during the Revolutionary War. The Meaning The State House bell became a herald of liberty in the 19th century. The Anti-Slavery Record, an abolitionist publication, first referred to the bell as the Liberty Bell in , but that name was not widely adopted until years later. Beginning in the late s, the Liberty Bell traveled across the country for display at expositions and fairs, stopping in towns small and large along the way. For a nation recovering from wounds of the Civil War, the bell served to remind Americans of a time when they fought together for independence. Pennsylvania suffragists commissioned a replica of the Liberty Bell. It then sat chained in silence until the passage of the 19th Amendment in It is made of bronze. While there is evidence that the bell rang to mark the Stamp Act tax and its repeal, there is no evidence that the bell rang on July 4 or 8, There are two other bells in the park today, in addition to the Liberty Bell. It weighs 13, lbs. That bell is currently in storage. Did you know the Liberty Bell was named by abolitionists fighting to end slavery? For closed captioning of this video, please visit [www](http://www).

### Chapter 3 : Heart | Liberty Belle and the Union Boys

*January 20, - Liberty Belle Yesterday was a big day for my son Sander and Megan's son Kimball. They went to Colorado snowboarding with Megan's husband Chris and our sister Kendal's boyfriend Rob.*

This became commonly known as "No Taxation without Representation." In August, the group was founded in Boston, Massachusetts. In December, an alliance was formed between groups in New York and Connecticut. In Boston, another example of violence could be found in their treatment of local stamp distributor Andrew Oliver. They burned his effigy in the streets. When he did not resign, they escalated to burning down his office building. Even after he resigned, they almost destroyed the whole house of his close associate Lieutenant Governor Thomas Hutchinson. It is believed that the Sons of Liberty did this to excite the lower classes and get them actively involved in rebelling against the authorities. Their actions made many of the stamp distributors resign in fear. Early in the American Revolution, the former Sons of Liberty generally joined more formal groups, such as the Committee of Safety. The Sons of Liberty popularized the use of tar and feathering to punish and humiliate offending government officials starting in 1765. This method was also used against British Loyalists during the American Revolution. This punishment had long been used by sailors to punish their mates. In March 1766, they rallied an enormous crowd that called for the expulsion of any remaining Loyalists from the state starting May 1. The Sons of Liberty were able to gain enough seats in the New York assembly elections of December to have passed a set of punitive laws against Loyalists. In violation of the Treaty of Paris, they called for the confiscation of the property of Loyalists. Flags[ edit ] In 1780, the Sons of Liberty adopted a flag called the rebellious stripes flag with nine vertical stripes, four white and five red. A flag having 13 horizontal red and white stripes was used by Commodore Esek Hopkins Commander-in-Chief of the Continental Navy and by American merchant ships during the war. This flag was also associated with the Sons of Liberty. Red and white were common colors of the flags, although other color combinations were used, such as green and white or yellow and white.

### Chapter 4 : Liberty Belles and Boys meeting held | The Ada Icon

*Liberty Belle Volleyball Club Pioneers is a program geared toward developing the skills of every player to improve their all-around playing ability. As part of this program, they will be given a six week opportunity to make lasting friendships while learning the game and skills of volleyball.*

Determining the Facts Reading 2: The existing crack adds mystery to the symbolism. How and when did the bell crack? It is difficult to determine from historical documents, although there are many traditional explanations. In he returned to the United States on a triumphal tour around the country. His visit created a resurgence in pride and interest in the American Revolution. There was no mention of a crack. Six months later, another newspaper ran a story about the bell and quoted its inscription. The new bell was cast by John Wilbank in None of these discussions indicated that the old bell was unusable. In the same year, a stylized rendering of the bell appeared in an antislavery publication showing the bell without a crack. It gave out clear notes and loud, and appeared to be in excellent condition until noon when it received a sort of compound fracture in a zigzag direction through one of its sides Although widely accepted, this claim was never documented. The journals do not contain such a statement. Questions for Reading 2 1. What kind of reaction did his visit provoke? When and how do the different sources say the Liberty Bell cracked? Do the sources seem reliable? Is there any information that might indicate a reason for selecting the dates other than historical accuracy? Why does there seem to be a need to attribute the cracking to a significant event? When do the stories begin that give a significant event as the occasion when the bell cracked? Why might that be? Can you draw any conclusions about the crack from these sources? Compiled from David A. The Story of the Liberty Bell Philadelphia: Paige with David A. Kimball, "The Liberty Bell:

Years later, she becomes a member of the American team at the Olympics in Berlin , where she wins gold medals for competitive swimming. Once there, she reports all she had witnessed in Poland to the military and political leaders. Months later, after Amsterdam falls into Nazi control, Libby again is met with by Rick Cannon who arranges for her to be smuggled into France. At the Battle of Dunkirk, she again is saved by Rick Cannon when he gets her safely into a boat headed for England. The boat is shot out of the water by a German Stuka, but Libby has already jumped overboard. She swims the breadth of the English Channel to England. Once safe, she runs to the nearest military base and reports in, confirming her survival of the attack. She is hailed by both English and American papers as the "Miracle of Dunkirk" and she also meets with Winston Churchill. After reporting all the atrocities she witnessed, she is sent back to America. In the autumn of , Libby is living in her hometown of Philadelphia. Upon visiting Independence Hall, she meets Tom Revere, a guard there. While he is polishing the Liberty Bell , it seems to peal loudly and the small replica of the bell, which Libby always keeps with her, resounds in tandem. She is leaving the Hall feeling very strange, when she overhears a plot being discussed by men with German accents, and one who certainly is Rick Cannon. Although her first instinct is to call the FBI , she instead crafts herself a bright costume and a blue domino mask, takes the name Liberty Belle and drives to where the spies said they would be. Although certain that Rick Cannon is a Nazi and traitor to America, she discovers that he is actually working for Army Intelligence. He is overtaken by the true saboteurs, however, and it is Libby as Liberty Belle who rescues him. She gives as her contact the name of Tom Revere and she later returns to that guard and tells him everything of her adventure and her desire to continue as a mystery-woman. Liberty Belle Now a mystery-woman, Liberty Belle happens to be in the right place and the right time to become involved in the founding of the All-Star Squadron. On December 8, she is present with a handful of other mystery-men in the White House when President Roosevelt announces his order that the Justice Society of America mobilize all American costumed heroes into a single unit, an All-Star Squadron , responsible directly to the President. Their first mission is to fly to the West Coast, search out any saboteurs and prevent a Japanese attack on the U. That adventure brings more heroes together and they travel to Pearl Harbor. Later she goes to Mexico and helps save Shiera Sanders. This is all a trick orchestrated by Hath-Set in his reincarnated identity of Dr. This "alien" and alien ship appears over various cities and locations the world over and the message was always the same: All who resist will be obliterated. For a brief moment in the history of the terrible World War, all the leaders unite against a common threat. Hitler, Mussolini, and Tojo all send word to Roosevelt and Churchill that they were ready to join in common defense against the alien. This union never came about, however, for various heroes of the All-Star Squadron were able to discover the masquerade and defeat Hath-Set. Soon after, the core members of the All-Star Squadron, including Libby, begin the process to elect other mystery-men for membership. During the meeting, Libby speaks out and sums up the mission of the All-Stars: At the end of this same month Libby is present when Robotman is taken into the custody of the New York Police Department, the focal point of a legal battle over whether Robotman is property or an independent "person". At the hearing she comes as Liberty Belle, though she does sign an affidavit under her true name of Libby Lawrence which is presented to the judge. At about this time the world comes to know the mystery-woman they called Wonder Woman in truth a time-traveling Queen Hippolyta. They are joined by the Red Tornado Ma Hunkel and discover not only saboteurs but a secret super-plane. With some members of the disbanded JSA missing, Liberty Belle calls an emergency meeting of the All-Stars whom she could find, as well as having invited the Tarantula. This results in Libby and the others meeting, for the first time in combat, the Brain Wave. Within the Perisphere the group finds the comatose bodies of the JSAers and were given an ultimatum "€" enter into the dream world crafted by the villain and save the heroes from within, or else be killed. Libby and company accept the challenge but fail as quickly as did the JSAers. Only the timely intervention of the Green Lantern saves the heroes and

destroyed the dream machine. This adventure quickly leads into the next as Libby and those with her are attacked by human and sub-human villains, minions of the Ultra-Humanite. The battle is decided in favor of the villains when the Ultra-Humanite appears himself, housed in the body of the actress Delores Winters. Libby is taken captive along with some other heroes and is discarded only after the intervention of Robotman. Robotman is taken captive while Libby was left alone. In the end, the All-Stars win the day. February 20, sees the first meeting of the full roster of the All-Star Squadron, a meeting presided over by Liberty Belle. Army Intelligence alerts the All-Stars of possible saboteur activity in California. Liberty Belle takes with her a small contingent of mystery-men most mystery-men being centered on the east coast, California is a long ways from home and head to a scheduled meeting with Captain Rick Cannon in Santa Barbara. By the time they arrive, Capt. Cannon has been kidnapped by agents loyal to Imperial Japan. Libby and her comrades saved Capt. Cannon and in the process met and fought the scientifically altered Japanese agent Tsunami. Some of the All-Stars are captured by the Japanese submariners who are in secret off the Californian coast, but they are rescued by Liberty Belle and Firebrand. A second attack by Tsunami is averted only by the intervention of Neptune Perkins. The Japanese American community is in confusion over the action of the Japanese loyalists, but a full scale rebellion of Japanese Americans never unfolds. At the conclusion of the mission Libby told Rick Cannon that, although she has feelings for him, Johnny Quick is the man for her. She also lets Johnny Quick know her feelings for him. The end of February brings trouble for the African-Americans living in Detroit. A faction of whites do not want a group of blacks moving into what was being hailed as a new Negro housing project – the Sojourner Truth Homes. Libby and the All-Stars enter into the fray when they see a newsreel showing the Olympic athlete Will Everett held hostage by a group of whites. That same newsreel show the young man turn from flesh-and-blood to hard iron and make his escape. They recognize him immediately as the pawn of the Ultra-Humanite called Amazing Man. After cross burnings and vandalism, after a mob riot and a near-lynching, the All-Stars are able to calm the masses of both black and white, as well as deal with the key initiator of the unrest: What the All-Stars do not learn was that the robot way ahead of its time in terms of technology comes from a mysterious person called Monitor. Though the main objective is not accomplished Libby is taken captive by the Japanese while the All-Stars had capture Tsunami. Prince Daka offers a swap – Tsunami and the rod for Liberty Belle. The All-Stars accept and go to the Bronx Zoo for the exchange. It is a trap, however, a double-cross involving a small bomb. A battle ensues and in the end the Japanese agents are forced to flee without the rod. Days later, Libby returns to Philadelphia to visit with her friend Tom Revere. Afterward, full of grief, Libby resigns as All-Star chairman and hysterically gives up being Liberty Belle. Libby puts her Liberty Belle uniform back on, joined with Hawkgirl, and the two intervene. During their fight they are joined by Johnny Quick and the Flash. The experiment is accomplished, with Libby holding some of the electrified equipment. The Baron regains his sight and Libby gains the ability to manipulate sound waves. The two Nazi agents, though, escape yet again. That same week Metropolis is menaced by Funny-Face who has a machine that brought comic strip characters to life. Libby and the All-Stars come to the city and are able to defeat the villain. Libby does not change her name to Chambers, however, and news of the nuptials were not made public. Libby is present in the Perisphere when Mekanique arrived and attacks the All-Stars Libby remains in the Perisphere and is present when the missing JSAers return from what they called a different dimension. Mekanique also comes back to the Perisphere, with Robotman, and tells a tale of coming from the future: Mekanique speaks of a war-wracked future and the need to save a little girl. Not knowing that Mekanique is only telling half-truths, the Green Lantern and Firebrand save the girl. By mid-April Libby is still practicing her mental generation of sound waves, the Hawkman had agreed to co-chair the All-Star Squadron with Liberty Belle, allowing her more time to be Libby Lawrence and wife of Johnny Chambers, and Libby even tells the tale of her origin to Mr. Jonathan Law for a book he was planning on writing after the War is concluded. Even on the day of their return to the Perisphere, it is attacked by the group Axis Amerika. The attack is repelled and two nights later Libby co-chairs another general meeting in which President Roosevelt himself attends his very first. Libby suggests they first engage in a trial membership, as they are all younger than 21 years of age. The highlight of the exhibition is a surprise appearance by Babe Ruth. Shortly thereafter, the Green Lantern seems to turn traitor against the US and a special hearing is called

by the President. Libby is present in the Perisphere when Alan Scott prepares to turn himself in as well as his power ring. This became unnecessary after a change of heart by the other All-Stars especially the JSA contingent. At this same meeting Libby introduces the assembled All-Stars to Miss Paula Brooks alias the Tigress, she announces that the young woman wishes membership as an All-Star. She is voted in as a trial member, another Young All-Star. Libby and her co-chair Hawkman then send the Young All-Stars on another war bond drive, this one in Colorado. These problems are dealt with by the Young All-Stars though they have been ordered to not interfere. After the Young All-Stars walk out the villainous Mekanique put into play its plan to destroy the members of the Squadron, it shrunk them to doll-size and attacked. Libby leads the All-Stars to the Amazonian nation of Rioguary where an attack of "supermen" is occurring. Later Life She and Johnny married and they had a child whom they name Jesse and begin raising a family In the s, Libby improved her relationship with her daughter and even the JSA members.

### Chapter 6 : The Liberty Bell

*We had already envisioned our boys falling off cliffs, into geo-thermal pools, or getting attacked by a wild animal. Two Liberty Belles.*

Kimball Morgan Hanks came into the world August 20, and has made my life an adventure ever since. And he has never slowed down since! At the beginning of his life, he made his preferences known—he wanted to be in constant motion, whether it was being walked around, bouncing in a bouncy chair, or riding in a car. The second we stopped at a red light, he would howl until we were moving again. He also loved being outside. At just a few weeks old and somewhat colic-y, all I would have to do was go outside and he would magically calm down. And trust me, nothing has changed in his fourteen years! As a toddler, he loved monster trucks and his battery operated four-wheeler. Luckily he also thought it was funny! Kimball just kept right on walking, making his little car noises, never really noticing what he ran over. And Chris had a part-time job charging the battery to his little four-wheeler. One time, I noticed Kimball going around and around in a rather tight circle, and realized he had fallen asleep! Monster trucks eventually turned into a dinosaur phase. I learned more about the Triassic period than I ever cared to, needless to say. He also loved catching frogs, turtles, salamanders, and any other slimy little critter. Actually, he still does! Which is good—it gets some of his tireless energy out. And though he is small in stature, his heart is fierce. He is one feisty kid. Sometimes that feistiness drives me crazy when the two of us are disagreeing about something. Number 7 But he is also kind, mostly polite, and well-liked by his friends. He is the biggest cheerleader on whatever team he is ever on, always encouraging his teammates and celebrating their victories as if they were his own. He goes out of his way to offer a pat on the back, a slap on the helmet, or a high five. At fourteen, he still tolerates this mom praying for him at night, and sometimes even makes specific requests known to me. This is also something I hope and pray will never change. It is usually my favorite time with him, when his body and mind are still for once and I have his undivided attention.

*Liberty Belle and the Union Boys. New York, New York. One Raging Rock Band With a Southern Rock Twist Brought to You By: Laura Keim - Lead Vocals, Guitar Bass Guitar Andrew Williamson - Drums, Vocals.*

I have so many awesome memories of my summer vacation days, and with my kids beginning theirs, I have been feeling totally nostalgic. My summer days were lucky enough to be spent on the water, first at our year old cottage, and then our new home that was completed when I was 9. See, my parents bought property on the lake that included two old cottages, but had a stipulation from the owner that they not be tore down until she died. But that was okay with me! Summers in those cottages were magical. It had a neat old kitchen with a pantry that forever had ants in it. We ate our meals at a picnic table in the dining area and I never once thought that was a little strange. There was an awesome sun-porch that spanned the front of the cottage did I mention it was pink? The best part of all, though, was the attic. It had steep stairs that led to a little landing with no railing. The landing area lead to a sloped attic room that ran the length of the cottage. It was always hotter than blue blazes, but we would play for hours up there anyway. Because everybody fishes in knee highs! We had a tire swing that we played on constantly. I remember falling off of it and knocking the wind out of my lungs for the first time and thinking I was dying. We got to go get ice cream after, so that made it all okay. We swam all day with neighbor kids and cousins, caught minnows and turtles, and made sandcastles. When we needed a break from the sun, we would go in the woods and build forts. We fished a lot. Six kids at the end of the dock all with hooks is not a good idea, but my cousins and sisters and I all did it anyway. We only snagged each other a few times. It seems like I never caught much, and now my kids just walk down the dock dragging their polls and accidentally catch one. As we got older, we would have huge Monopoly marathons in the shed at the same picnic table we used to eat at inside. There was too much exploring to do outside. Summer Vacation Circa I really want my kids to have the same memories, and for the most part they do. But in the age of electronics, it is definitely more of a challenge. So if you want to have an epic summer, and maybe even feel like a kid again, here is my list of top summer vacation activities: I still feel a thrill when I see them in the backyard. Grab a jar and catch some with the kids. They literally taste like childhood and summer wrapped up in one gooey bite. As an adult, this has definitely lost its appeal, but once I get in the water, it totally takes me back to my younger years and swimming all day. Even better, strap on a pair of waterskis or get on a tube. Read one of your favorite books from your childhood with your kids. Camp out in a tent in the backyard. My best friend and I did this all the time. It was soo much fun and I always had a new dome tent since my birthday is in May. The joke is mom either bought me a tent or a new floatie for the lake every year. Go to the lake and catch critters with your kids. We love eating lunch outside on a blanket in the yard for something different. It just feels special. Go for a bike ride. No summer activity list would be complete without it. So channel your inner child easier for some of us , and enjoy the simple pleasures of summertime. I would love to hear it!

Virtual Tour of Historic Philadelphia The Liberty Bell Tradition tells of a chime that changed the world on July 8, 1776, with the Liberty Bell ringing out from the tower of Independence Hall summoning the citizens of Philadelphia to hear the first public reading of the Declaration of Independence by Colonel John Nixon. It speaks of the rights and freedoms valued by people the world over. The Liberty Bell gained iconic importance when abolitionists in their efforts to put an end to slavery throughout America adopted it as a symbol. For the line in the Bible immediately preceding "proclaim liberty" is, "And ye shall hallow the fiftieth year. In fact, in the original Constitution, the name of the state is also spelled "Pensylvania. They, too, have the state name spelled "Pensylvania" and the Atlantic Ocean called by the name of that day, "The Western Ocean". The choice of the quotation was made by Quaker Isaac Norris, speaker of the Assembly. The Crack There is widespread disagreement about when the first crack appeared on the Bell. Hair-line cracks on bells were bored out to prevent expansion. The Philadelphia Public Ledger takes up the story in its February 26, 1835, publication: It had been cracked before but was set in order of that day by having the edges of the fracture filed so as not to vibrate against each other It gave out clear notes and loud, and appeared to be in excellent condition until noon, when it received a sort of compound fracture in a zig-zag direction through one of its sides which put it completely out of tune and left it a mere wreck of what it was. American Anti-Slavery Society, The Bell achieved its iconic status when abolitionists adopted the Bell as a symbol for the movement. It was first used in this association as a frontispiece to an edition of Liberty, published by the New York Anti-Slavery Society. It was, in fact, the abolitionists who gave it the name "Liberty Bell," in reference to its inscription. It was previously called simply the "State House bell. The line following "proclaim liberty" is, "It shall be a jubilee unto you; and ye shall return every man unto his possession, and ye shall return every man unto his family. The truth is that the steeple was in bad condition and historians today highly doubt that the Bell actually rang in However, its association with the Declaration of Independence was fixed in the collective mythology. The flag became one such symbol, and the Liberty Bell another. To help heal the wounds of the war, the Liberty Bell would travel across the country. Starting in the 1840s, the Bell traveled to cities throughout the land "proclaiming liberty" and inspiring the cause of freedom. We have prepared a photo essay of its journey to the Panama-Pacific Exposition in San Francisco. It traveled the country with its clapper chained to its side, silent until women won the right to vote. On September 25, 1913, it was brought to Independence Hall and rung in ceremonies celebrating the ratification of the 19th amendment. To this day, oppressed groups come to Philadelphia to give voice to their plight, at the Liberty Bell, proclaiming their call for liberty. The bell was ordered from Whitechapel Foundry, with instructions to inscribe on it the passage from Leviticus. The bell arrived in Philadelphia on September 1, 1793, but was not hung until March 10, 1793, on which day Isaac Norris wrote, "I had the mortification to hear that it was cracked by a stroke of the clapper without any other violence [sic] as it was hung up to try the sound. Two Philadelphia foundry workers named John Pass and John Stow were given the cracked bell to be melted down and recast. They added an ounce and a half of copper to a pound of the old bell in an attempt to make the new bell less brittle. For their labors they charged slightly over 36 Pounds. The new bell was raised in the belfry on March 29, 1793. They were so teased with the witticisms of the town that they will very soon make a second essay," wrote Isaac Norris to London agent Robert Charles. Apparently nobody was now pleased with the tone of the bell. Pass and Stow indeed tried again. They broke up the bell and recast it. Upon the arrival of the new bell from England, it was agreed that it sounded no better than the Pass and Stow bell. So the "Liberty Bell" remained where it was in the steeple, and the new Whitechapel bell was placed in the cupola on the State House roof and attached to the clock to sound the hours. The Liberty Bell was rung to call the Assembly together and to summon people together for special announcements and events. The Liberty Bell tolled frequently. Among the more historically important occasions, it tolled when Benjamin Franklin was sent to England to address Colonial grievances, it tolled

when King George III ascended to the throne in 1763, and it tolled to call together the people of Philadelphia to discuss the Sugar Act in 1764 and the Stamp Act in 1765. In 1774 a petition was sent to the Assembly stating that the people in the vicinity of the State House were "incommoded and distressed" by the constant "ringing of the great Bell in the steeple. However, the steeple was in bad condition and historians today doubt the likelihood of the story. In October 1776, the British occupied Philadelphia. Weeks earlier all bells, including the Liberty Bell, were removed from the city. It was well understood that, if left, they would likely be melted down and used for cannon. The Liberty Bell was removed from the city and hidden in the floorboards of the Zion Reformed Church in Allentown, Pennsylvania, which you can still visit today. From the southern end, the bell is visible from the street 24 hours a day. On every Fourth of July, at 2pm Eastern time, children who are descendants of Declaration signers symbolically tap the Liberty Bell 13 times while bells across the nation also ring 13 times in honor of the patriots from the original 13 states. Each year, the bell is gently tapped in honor of Martin Luther King Day. The ceremony began in 1986 at request of Dr.

**Chapter 9 : boys Archives - Two Liberty Belles**

*Belles Boys has been providing high quality concrete floor treatment, repair and polishing for decades.*

Today is Tuesday, Nov. Oren Cox of Bridgeport, left in orange jersey, finished second. Sophomore Mia Stratman finished less than a second behind Borgias in 18th place, followed by freshman Johanna Vollmer in 19th and Larkin Lucy in 25th. The boys earned their fourth straight district title and sixth consecutive trip to state, where they finished fourth last year. Less than 2 seconds behind Dornfeld was senior Geza Sukovaty in 29th place, and freshman Peter Aspholm finished in 40th. The junior varsity boys, led by freshman Lazo Gitchos, also took first place. For those interested in giving the Mountain Lions a send-off, the team bus will leave from the high school at around 10 a. Friday, and will have a fire truck escort down Glover Street in Twisp a few minutes later. Racing begins at 10 a. Ben Klemmeck, senior, Eli Nielsen, sophomore, Cade Quigley, sophomore, Emerson Worrell, freshman, Carter Dornfeld, junior, Geza Sukovaty, senior, Peter Aspholm, freshman, Athena Milani, freshman, Ella Hall, senior, Icel Sukovaty, freshman, Ava Mott, freshman, Sage Borgias, freshman, Mia Stratman, sophomore, Johanna Vollmer, freshman, Larkin Lucy, freshman, Lazo Gitchos, freshman, Tim Haley, sophomore, Simon Studen, freshman, Cameron Quinn, sophomore, Sam Neitlich, freshman, Michael Mott, freshman, Zach Strong, freshman,
