Testimonials "â€Clinical Pharmacology provides me the security and peace of mind to know I will find the exact information I seek, in clear and concise wording, and in a timely mannerâ€Thank you for being the valuable tool that you are in supporting me to more fully and completely honor my oath of a pharmacist by providing me access to quality pharmaceutical informationâ€" Robert Serravo, PharmD Porter Adventist Hospital, Denver, CO About Clinical Pharmacology Used by more than 1, hospitals and over 35, retail pharmacies in the U. Clinical Pharmacology is accepted by all 50 state Boards of Pharmacy as a compendium to fulfill the drug reference requirements for licensed pharmacies, and is officially recognized by the Centers for Medicare and Medicaid Services CMS as a drug compendium for determining the appropriate use of drugs and biologics for cancer patients. Proven by multiple independent research studies, Clinical Pharmacology is the most complete, easiest-to-use and most dependable drug information solution available today. Features Clinical Pharmacology provides a single resource to answer all your medication questions, empowering you to maximize your time and productivity. Monographs Get concise, accurate, clinically-relevant information on all U. Clinical Pharmacology monographs are developed through a peer-reviewed process and represent an objective analysis of the most clinically-relevant drug information. Reports Clinical Pharmacology is your trusted ally in decision support, offering custom reports that help you evaluate and choose appropriate medications for your patients. Drug Product Information Clinical Pharmacology offers extensive information on drug product attributes and physical descriptors. Full color product and package images as well as product storage information are included in the detailed How Supplied section. The FDA has significantly increased the number of drug products that must be dispensed with a MedGuide, now encompassing millions of prescriptions. Clinical Pharmacology provides your solution, as it includes all publicly available MedGuides in their proper format and structure. Drug IDentifier Our Drug IDentifier feature is quickly accessible and simple to use - just "click and go" to be on your way to accurately identifying unknown tablets and capsules. Searching Clinical Pharmacology provides you with multiple ways to search for and find drug information. Conduct an overall site search or search by indication, adverse reaction, classification, NDC or manufacturer. Additionally, Clinical Pharmacology allows you to browse lists, such as Monographs A-Z or Investigational Monographs, for instant access to content. Maximize Time Receive the information you need in a few clicks. No other drug information resource works as simply and efficiently as Clinical Pharmacology. We know how valuable your time is. Increase Productivity Having one source for all drug-related answers is key. Enhance Patient Care Clinical Pharmacology will help you speed through tasks like researching drug data and screening for clinical problems, freeing you up to focus your time, attention and expertise on drug counseling for patients and prescribers. Tools and Add-on Modules Take advantage of the ultimate integrated drug, disease and medical information solution. Build your Clinical Pharmacology subscription your way by adding these tools: With this module comes extensive information regarding drug-drug and drug-solution stability and compatibility, and expanded information for extemporaneous compounded products e. Clinical Calculators from MedCalc Instantly subtract minutes of complicated calculations from your drug dosing and clinical evaluation routines. Perform complex dosing calculations in just seconds to make your job easier, speed up your daily workflow, ensure accuracy to avoid dangerous drug errors, and concentrate your valuable time on patient care. Working with our development partner MedCalc , Clinical Pharmacology offers an extensive list of calculators many of which were developed especially for Clinical Pharmacology users. Global Drug Name Directory powered by Index Nominum Wherever people go, their medications go with them â€ across the country, across the street or across the world. Drug products may be recognized by different names or have different ingredients depending on the country of origin. To ensure safety and accuracy, health professionals must have the right tools for managing international medication encounters. Add the Global Drug Name Directory to your online Clinical Pharmacology subscription and gain the ability to conveniently search for,

and retrieve, international brand and generic drug product names, country of origin, and drug manufacturer information. FormChecker FormChecker is an easy-to-use formulary management and communication system that aids in Joint Commission compliance, ensures pharmacy guidelines are followed and reduces time spent on management of formulary conversions. OnFormulary also reduces the time clinicians spend resolving formulary problems, cutting administrative costs. Clinical Pharmacology Toolkit This workflow integration solution is a complimentary service for our customers who access Clinical Pharmacology via IP-authentication. Enhance your subscription with the ability to integrate Clinical Pharmacology directly into any workflow application or intranet. The Clinical Pharmacology Toolkit increases accessibility to drug information when and where you need it! Testimonials "When purchasing our clinical software program, ease-of-use was paramount. We quickly trained the nursing staff to look up many of their own medication questions, incompatibilities, as well as print patient medication information sheets. As far as the pharmacy is concerned, the depth and breadth of information is excellent and the layout makes for quick searchesâ€”in my opinion, Clinical Pharmacology is the best on the market. I love the fact that it always provides answers to my questions at my fingertips, no matter where I am. Clinical Pharmacology is comprehensive, easy to use, and up to date, and because it uses the most accurate resources and literature to substantiate its findings, I trust the content.
