The pocket-sized revision guides have been designed by expert mathematicians for the new specifications. The versatile books are the ideal learning aid for pupils, providing instant revision, classwork and homework support. Tutorful Favourite Feature They are the perfect alternative, or handy companion, to daunting larger text-heavy revision guides. Tutorful Favourite Feature Signing up is super easy, and all the videos are totally free. No time will be wasted on this intuitive platform, comprised of free expert lessons that will definitely jog your maths memory. Tutorful Favourite Feature Stuart Sidders puts the content together alone, and only relies on donations for all the great revision content The GCSE Video Lessons are an instant and effective way to learn topics you may not have fully understood in school, or struggled to get to grips with. You can also buy detailed and easy-to-understand model answers for each and every question. In fact, it has model answers have been proven to be one of the best ways to prepare for Maths GCSE exams! Tutorful Favourite Feature Each model answers is supported by highest quality teaching. These online flashcards are incredibly adaptive to help you learn faster using spaced repetition. Create your own or simply search for your topic to find other creative cards. MathPapa Algebra Calc Website: Tutorful Favourite Feature A thorough algebra calculator tutorial is available on the site, so you can get started right away. The star rating system allows you to rate the sets of flashcards that have been created. This feature is ideal for helping you decide which to add to your revision calendar, and which sets of cards may not be as productive for you. Tutorful Favourite Feature Cram has intuitive apps too, so you can find other mobile flashcards for your Android, iPhone or Windows device, allowing you to take your flashcards with you on your travels. Tutorful Favourite Feature The perfect platform for teachers and students alike! Browse high quality content written by an experienced Mathematician, revise by topic and take a mock test with mixed questions from all topics. The app was developed in consultation with an experienced secondary maths teacher, so it really is an app you can rely on. Tutorful Favourite Feature There are over cards on the app to keep you busy! Apple , Android A beautifully designed app, tailored to your exact learning needs. Bright colours will keep your mind stimulated for longer periods of study, and help you avoid dreaded revision boredom. Apple , Android When stacks of notes on your desk begin to pile up, and everything seems to be getting on top of you during revision time, mind-mapping is a simple and effective tool to break down everything you have left to learn into digestible chunks. Gone are the days of wasted paper and illegible scribbles, this app should be your new go-to mind mapping tool. All of the questions on the app are organised by topic, so you can become really well acquainted with the particular wording used for each type of question. Answers are overlaid onto the question page at the touch of a button, providing clear, concise, step-by-step solutions. You can choose from a number of display styles and formats. It also supports binary, octal and hexadecimal calculations and has an optional RPN mode. Best Study and Exam Tools Helix Stationary We tried and tested popular stationary protractors, compasses and so forth in an endeavour to find the most accurate, reliable and time-testing tools, and Helix came out on top. Their protractors, rulers and other necessary Maths GCSE equipment are cheap and cheerful and you can buy them just about everywhere. Tutorful Favourite Feature Sure to last you a lifetime! Casio FXGTPLUS Scientific Calculator A classic scientific calculator, without any unnecessary bells and whistles, just the functions you need to revise efficiently and undertake exams to the best of your ability. Tutorful Favourite Feature Thousands of positive online reviews from students speak for themselves! The online calculator provides basic and advanced

mathematical functions useful for school or college. Tutorful Favourite Feature You can operate the calculator directly from your keyboard, as well as using the buttons with your mouse! There you have it!

Chapter 2 : BBC Bitesize - GCSE Maths

This updated and refreshed version of CGP's bestselling Revision Guide is the ideal companion to Higher Level GCSE Maths - it even includes a free online edition that can be used wherever you have internet access.

While I develop this site, I have decided to store my worksheets, revision booklets and other printable resources on the TES Website tes. The TES website is a more robust site and is a place where thousands of other teachers from around the world share their work. There are, however, so many resources available on the TES Website, it can be difficult to find specific ones. For this reason I am providing the links below to take you to a page that will show my uploads, grouped by type. Each carefully selected compilation has fully-worked solutions which can either be used in class or can be e-mailed to students to go through at home. This can save a lot of valuable time in class. These booklets are ideal to help students consolidate or revise a particular topic. They are designed to be printed at either A4 or A5 and have space for students to do their working as well as to write their final answers. At the moment 40 topics have been uploaded and they are all FREE. The sheets contain a wide selection of exam-type questions which gradually increase in difficulty, with the last questions often having an extra twist. They are ideal for revision, starters or plenaries and are a really great way for students to practise answering questions quickly while enjoying a break from traditional text books and worksheets. These Treasure Hunt question cards have been prepared in two sizes. The large cards can be displayed around a classroom and used for a whole class activity; the smaller cards are good to use for group work or by individuals. Unlike most Treasure Hunts, these have the added feature that the answers give an encrypted clue. Deciphering this clue reveals where the treasure is hidden! Loop Cards Each available topic has four sets of 16 well-formatted loop cards with carefully selected questions. Students choose a set of cards and sort them into order by answering the questions. After checking their answers, they can repeat the activity with a different version of the cards and check that they have learnt from earlier mistakes. The cards are designed to be used by individuals, pairs or small groups. One of my favourite uses is for two students to have different versions of the cards and race each other. They then check their answers, shuffle, swap packs and race again quickest overall time wins! Cut out card size of each card is approx. Posters These posters were originally designed for my own classroom, but I am now delighted to be sharing them. They make great wall displays as well as being able to be printed at A5 or smaller and given to students as revision aids. I have had these printed as large as A1 with the high quality being maintained. There is only one quiz available at the moment, but I will be preparing quite a few more. These quizzes are self-running and are timed to last 15 minutes, but I have included a non-timed version if you want to slow things down a bit. Each quiz has 20 questions and answers on a variety of topics from different parts of the curriculum and more. The quizzes are ideal to use to fill a gap in an unexpected Form Period, or even a planned one. On this site at the moment there are fully-worked hand-written solutions to 64 of the past papers from the Edexcel IGCSE and I have created a prototype of my first interactive game, which I would love you to try. If you want to be kept up-to-date with the development of this site and be informed when further resources are uploaded, then follow me on TES.
