Cardiovascular Medicine Table of contents I. Electrophysiology ; 17 Electrocardiographic Diagnoses: Appendix ; Preparing for Cardiology Examinations show more Review quote Congratulations to the editors and their esteemed group of authors on an excellent new edition that is a comprehensive, up to date, and state of the art textbook on the entire spectrum of cardiovascular medicine and disorders. This book could serve as essential reading material for internal medicine residents and , particularly, trainees in cardiovascular diseases, including for preparation for board exams. Additionally, this textbook would be a thorough resource for busy practitioners, including those in primary care and specialists, who care for patients with cardiovascular diseases. One of my cardiology fellows lent me a copy of the First Edition. It was extremely easy to read, and I felt prepared for the recertification exam. I again used this textbook, Third Edition, for my second recertification exam The Fourth Edition, much like the Third Edition, reaches an excellent balance of being comprehensive while remaining extremely readable It is an excellent resource for anyone preparing for certification or recertification in cardiology. I would recommend a cardiology fellow devote six months to reading the textbook cover to cover. They will find it well worth the time invested. The practicing cardiologist will be able to cover the text book in a month. They will find it both an excellent review and an efficient way to learn new information. Concise Textbook edited by Dr. Joe Murphy and Dr. Margaret Lloyd has again redefined the art of boiling down overwhelming concepts in a merciful manner for practicing cardiologists. With plain dialogue complemented by diagrams and tables, residents and fellows can build a solid knowledge base in cardiovascular disease, as well as prepare for board exams. I would strongly recommend this textbook as a learning tool and reference to guide your cardiology practice. Murphy, MD, has been on staff at Mayo Clinic for over 20 years.
