May 14, , Are you prepared to face it? For those who find it difficult to choose the right course, Ameen-e-Mudassar enlists possible options for students after Class 10â€”along with the bright and dark sides of each courseâ€”in the first part of this series on educational opportunities. Before deciding on which stream to choose in PUC, a student must know the following facts: This makes you eligible for career in Engineering Stream. This is apt for students focused on medicine and who find it difficult to cope up with mathematics. Note- If you select Science in PUC, you have an option to shift to Commerce or Arts stream in case you feel the need to do it in graduation. The students also realise their true potential as in schools with a lot of spoon feeding and pampering at home they live in a life of illusion till coming to the college - With PUC following the CBSE Science syllabus, it will be a very strong foundation for higher education and at the same time challenging for students from the state board SSLC. In case a student cannot continue graduation or wants to pursue correspondence courses, having passed PUC is always an advantage. Science demands hours of effort linked to multiple concepts, theories, formulas and experiments. The motivation level must always be high to face the challenges and tough competition. Many students also feel the need to join coaching centres, this increases the pressure, expectations and less time for any other activities. Nevertheless, all hard work and smart work pays off! Science students are driven by their dream to make it into the best colleges in India and abroad. Most of the subjects taught in Commerce are totally new to school students especially for state syllabus students. Quick learning and application of concepts in Accounts, Business Studies demands problem-solving skills. Commerce students also face pressure to score high grades as their Science counterparts. The advantage is, however, that they can manage their studies with a proper plan even without going for tuitions as long as the college offers good coaching. Arts is an area full of interesting subjects. But the fact is the subjects in Arts like Psychology, Sociology, Political Science, Economics, History, Logic, etc are the most interesting ones and are best suited for students having linguistic, social, artistic and interpersonal intelligence. Commitment towards the subjects studied is a must. Today, the best lawyers, social scientists, economists, journalists, policy-makers come have a Humanities background. Tips for you- Students, tell your parents what you like and what you are really good at. You know how you got 95 hardwork or smart work or hardly worked. Let your parents not be carried away by that. Remember, the world is not run only by engineers and doctors.
