View and Download Mercury MerCruiser MCM L ALPHA service manual online. MerCruiser MCM L ALPHA Engine pdf manual download. Also for: MerCruiser mcm lh bravo, MerCruiser mcm l efi alpha.

Mercury MerCruiser V-8 engines can use any type of permanent antifreeze or any brand antifreeze solution that meets GM specification M. The over-full condition results in the engine crankshaft splashing and agitating the oil, causing it to foam become aerated. It is normal for an engine to use a certain amount of oil in the process of lubrication and cooling of the engine. The amount of oil consumption is greatly dependent upon engine speed, with consumption being highest at wide-open-throttle and decreasing substantially as engine speed is reduced. Gasoline is extremely flammable and highly explosive under certain conditions. Be sure ignition key is OFF. Do not smoke or allow spark or open flame in area when changing fuel filter. Wipe up any spilled fuel immediately. Remove water separating fuel filter and sealing ring from mounting bracket and discard. Coat sealing ring on new filter with motor oil. Thread filter onto bracket and tighten securely by hand. Do not use a filter wrench. Position drive unit so that it is straight back. Power steering system must be filled exactly as explained in the following to be sure that all air is bled from the system. All air must be removed, or fluid in pump may foam during operation and be discharged from pump reservoir. Sudden loss of pressure could cause hot coolant to boil and discharge violently. Thoroughly flush the seawater cooling system prior to storage. For additional protection against freezing and rust to the exhaust manifolds and other components, a mixture of antifreeze and water can be run through the engine during Power Package Layup. Install flushing attachment over water pickup holes in gear housing as shown. Attach a water hose between the flushing attachment and a water tap. Lubricate pivot points and guide contact surfaces with SAE 30W motor oil.
