*The purpose of Dorf's Modern Control Systems, Thirteenth Edition is to present the structure of feedback control theory and to provide a sequence of exciting discoveries. The book demonstrates various real-world, global engineering problems while touching on evolving design strategies like green technology.*

Other policies Teamwork, collaboration, and helping each other: For tasks intended for group work, you are expected to find a partner and share the tasks among the group members. In a group project, effective teamwork is critical to maximize the productivity of the whole group. In the submitted work, identify components and indicate percentage contribution by each member to each component. For tasks not intended for group work, individual submission is required. In this case, you are encouraged to discuss among your friends on how to attack problems. However, you should write your own solution. Cheating is a very serious offense. It will be dealt with in the most severe manner allowable under University regulations. If caught cheating, you can expect a failing grade and initiation of a cheating case in the University system. If in doubt about what might constitute cheating, send e-mail to your instructor describing the situation. If you notice anyone cheating, please report it to the instructor or the TA. Do not deal with it yourself. State and Federal laws as well as Iowa State University policies prohibit any form of discrimination on the basis of race, color, age, religion, national origin, sexual orientation, gender identity, sex, marital status, disability, or status as a U. Language or gestures of discriminatory nature will not be tolerated. Severe cases will be reported to appropriate offices. See ISU policies at <http://www.isu.edu>: Individuals with physical or mental impairments who are otherwise qualified to perform their work or pursue their studies may request reasonable accommodations to enable them to work or continue their studies. If you believe you have learning disability, you must contact Student Disability Resources at the Academic Success Center to initiate the accommodation process. Accommodation for religion based conflict: Iowa State University welcomes diversity of religious beliefs and practices, recognizing the contributions differing experiences and viewpoints can bring to the community. Students with religion based conflict should talk to the instructor and appropriate university offices to request accommodations at the earliest possible time.
