Embassy in The Hague, Netherlands. Embassy earlier this week. Marine Corps residence, a utility building, and multiple access pavilions. Full construction will begin this summer, while completion of the embassy is scheduled for Take a peek of the project right below. The buildings, while American in character, reflect sensibilities that are Dutch. Other buildings on the campus, including utility buildings, will be clad in brick to provide uniformity to the campus. The use of brick is not limited to the building facades, but extends to other site elements such as bridges, and even the pavers of the walkways throughout the campus. The Chancery interior will feature the use of wood veneer and blue glass. Although the facility will not provide Consular services, which are located in Amsterdam, a large multi-purpose space will welcome visitors and is situated with the most advantageous views of the landscape. The new campus grounds respect the Dutch landscape of water, scrub, and field. The prevailing landscape of Wassenaar includes extensive use of waterways, including canals both small and large, and ponds. The new campus includes a newly designed pond, and other drainage canals that blend with this landscape while providing functional and ecological benefits. It will also include plantings and trees that are typically found in the Netherlands, and selected for resiliency in their location. The building is registered with the U. The site has a high water table, as well as an abundance of rainfall. To take advantage of this abundance, the embassy captures rain, and reuses it for any irrigation needed to sustain the plantings. The permanent art collection, curated by the Office of Art in Embassies AIE , will feature works by contemporary American, Dutch-American and Dutch artists for both the interior and exterior spaces. Works will encompass a variety of styles and media, and include site-specific commissions. The collection will forge a dynamic cross-cultural exchange around shared themes between the United States and The Netherlands.
