The resource to the URL or file is currently unavailable. Look for the "Order Swatch" button associated with each fabric. This will indicate if a swatch is available for that particular fabric or not. Because many of the fabrics we stock are non reorderable and are "special purchases", there is the possibility that a fabric could sell out by the time you receive your swatch. You can add multiple fabric images to the Design Wall, rearrange them, view them next to or on top of each other, and add them all to your cart from one convenient window. If you want to be sure you are able to get this item, we would encourage you to order it now, as it may become unavailable in the very near future.

Special Purchases Many of the items we purchase come to us from well known brand name design houses. This is first quality merchandise that we purchase at significant discounts and which we therefore are able to offer to you at remarkably low prices. A consequence of buying this Special Purchase merchandise is that we cannot reorder. So, when we are sold out, we will not be able to order any more. If the quantity available is running low and you want to be sure you are able to get this item, we would encourage you to order it now, as it may become unavailable in the very near future.

Reorderable Items A Reorderable Product is one that we attempt to maintain in stock at all times. Occasionally, our supplier may be out of stock, causing us to be in a temporary backorder inventory position. In that case, you will see the ETA estimated time of arrival , indicating our best estimate of when it should arrive at our warehouse. Some reorderable products are available for backorder. If you would like to backorder this item, simply select your quantity and Add to Cart and this item will be automatically placed on backorder for you and shipped when available. You will not be charged for this item until it is shipped and you will not be charged additional shipping. Even dry cleaning can produce some shrinkage. We recommend you test a 4" x 4" square of your new fabric if you are at all unsure how it will react to your chosen laundering method. If you always test the same sized square, you will be able to check the percentage of shrinkage.
