Norman, Andrew, and Selkirk Bruce of Maryland: their ancestors in Scotland and their descendants in America / Nancy Jones Ellis.

Statue of Wallace at Edinburgh Castle William Wallace was a member of the lesser nobility, but little is definitely known of his family history or even his parentage. There is no contemporary evidence linking him with either location, although both areas had connections with the wider Wallace family. It is possible that all the Wallaces in the Clyde area were medieval immigrants from Wales, but as the term was also used for local Cumbric-speaking Strathclyde Welsh, it seems equally likely that the surname refers to people who were seen as being "Welsh" due to their Cumbric language. Please help improve this article by adding citations to reliable sources. Unsourced material may be challenged and removed. August Main article: His reign had seen a period of peace and economic stability. On 19 March , however, Alexander died after falling from his horse. As she was still a child and in Norway, the Scottish lords set up a government of guardians. Margaret fell ill on the voyage to Scotland and died in Orkney on 26 September The lack of a clear heir led to a period known as the "Great Cause", with several families laying claim to the throne. With Scotland threatening to descend into civil war, King Edward I of England was invited in by the Scottish nobility to arbitrate. Before the process could begin, he insisted that all of the contenders recognise him as Lord Paramount of Scotland. In early November , at a great feudal court held in the castle at Berwick-upon-Tweed , judgment was given in favour of John Balliol having the strongest claim in law. Edward proceeded to reverse the rulings of the Scottish Lords and even summoned King John Balliol to stand before the English court as a common plaintiff. John was a weak king, known as "Toom Tabard" or "Empty Coat". John renounced his homage in March and by the end of the month Edward stormed Berwick-upon-Tweed, sacking the then-Scottish border town. Edward then instructed his officers to receive formal homage from some 1, Scottish nobles many of the rest being prisoners of war at that time. Walter Bower states that Wallace was "a tall man with the body of a giant This was one of several rebellions taking place across Scotland, including those of several Scottish nobles and Andrew Moray in the north. Wallace and Moray were not involved, and continued their rebellions. Wallace and Moray met and joined their forces, possibly at the siege of Dundee in early September. Although vastly outnumbered, the Scottish army routed the English army. The narrowness of the bridge prevented many soldiers from crossing together possibly as few as three men abreast , so, while the English soldiers crossed, the Scots held back until half of them had passed and then killed the English as quickly as they could cross. The infantry were sent on first, followed by heavy cavalry. Thus, the Scots won a significant victory, boosting the confidence of their army. Moray died of wounds suffered on the battlefield sometime in late The type of engagement conducted by Wallace was characterised by opportunistic tactics and the strategic use of terrain. This was in stark contrast to the contemporary views on chivalric warfare which were characterised by strength of arms and knightly combat. Therefore, the battle embittered relations between the two antagonistic nations, whilst also perhaps providing a new departure in the type of warfare which England had hitherto employed. Around November , Wallace led a large-scale raid into northern England, through Northumberland and Cumberland. Two days prior to the battle 25, foot soldiers were paid. More than half of them would have been Welsh. There are no clear cut sources for the presence of cavalry, but it is safe to assume that Edward had roughly horse under his command. In July, while planning a return to Edinburgh for supplies, Edward received intelligence that the Scots were encamped nearby at Falkirk, and he moved quickly to engage them in the pitched battle he had long hoped for. Wallace arranged his spearmen in four schiltrons â€”circular, defensive hedgehog formations, probably surrounded by wooden stakes connected with ropes, to keep the infantry in formation. The English, however, employed Welsh longbowmen , who swung strategic superiority in their favour. The English proceeded to attack with cavalry and put the Scottish archers to flight. The Scottish cavalry withdrew as well, due to its inferiority to the English heavy horse. Gaps in the schiltrons soon

appeared, and the English exploited these to crush the remaining resistance. The Scots lost many men, including John de Graham. Wallace escaped, though his military reputation suffered badly. There is a surviving letter from the French king dated 7 November to his envoys in Rome demanding that they should help Sir William. The site is commemorated by a small monument in the form of a Celtic cross. He responded to the treason charge, "I could not be a traitor to Edward, for I was never his subject. His preserved head dipped in tar was placed on a pike atop London Bridge. It was later joined by the heads of the brothers, John and Simon Fraser. His limbs were displayed, separately, in Newcastle , Berwick , Stirling , and Perth. A plaque stands in a wall of St. In the Wallace Monument was erected, very close to the site of his victory at Stirling Bridge. The Wallace Sword , which supposedly belonged to Wallace, although some parts were made at least years later, was held for many years in Dumbarton Castle and is now in the Wallace Monument. Historiography of Wallace The Wallace Monument , near Stirling Bridge Although there are problems with writing a satisfactory biography of many medieval people, the problems with Wallace are greater than usual. Not much is known about him beyond his military campaign of "â€", and the last few weeks of his life in A Story of Wallace and Bruce Beer A number of beers are named for Wallace.

Chapter 4 : Fraser of that Ilk

Norman, Andrew, and Selkirk Bruce emigrated from Edinburgh, Scotland to Maryland in the second half of the eighteenth century. They were all children of Charles Bruce and Helen Cleland.

Fraser of that Ilk The first of the Scottish family of Fraser appeared in the Borders during the 12th century. Their origins before this have been disputed, but not their power, for they held the most extensive lands in Peebleshire, their names appear regularly on the rolls of the royal councils, and they became regular benefactors of the religious foundations at Kelso, Newbattle and Coldingham. Simon died before , leaving a daughter and heiress Eda who married Hugh Lorens and left a daughter who married Philip de Keith, Marischal of Scotland. The lines of descent from Oliver and Adam are uncertain, but the power of the Frasers exerted from Oliver Castle was continued through Sir Bernard Fraser and Sir Gilbert Fraser, who held in their turn the hereditary office of Sheriff of Tweeddale. Bernard was Sheriff of Stirling in and thereafter is designated in charters as Dominus Bernardus Fraser miles. He married a sister of Nesius de London and died about Laurence, the only known child of his probable brother Adam, was his heir, but as no children of Laurence are recorded as such, this line, also, disappears. The third brother, Gilbert, had four sons, and although from this point the line of descent becomes clearer, the period until Hugh Fraser of Lovat was created Lord Fraser of Lovat in remains to some extent speculative. Urdar Fraser, shown in the charters of Newbattle Abbey to be living in the second half of the 12th century, married a sister of Oliver Fraser of Oliver Castle, the son of Kylvert Fraser, and had issue: A1 Bernard Fraser, Knight, Sheriff of Stirling in and thereafter designated in charters as Dominus Bernardus Fraser miles, married a sister of Nesius de London and died about without known issue. A2 Adam Fraser, succeeded his maternal uncle in his lands of Hales and by his wife Constantia left issue a son: He had no known issue, but in November Sir William Fraser of Drumelzier, whose unknown relationship to Laurence was probably either that of son or nephew, resigned Drumelzier into the hands of King Robert I. B1 Richard, his heir [see below] B2 Alexander Fraser of Cornton. Cornton is in co. Although Alexander is traditionally listed as the second son, the royal insistence that the 17th-century Lord Fraser should not use a territorial designation - as, for example, Fraser of Lovat - together with the authorised use of the undifferenced arms proclaiming the Chiefship of the Fraser Clan, suggest that a good case for seniority had been made and had received royal approval. He was captured in , taken to London and there hanged, drawn and quartered. He left two dtrs, co-heiresses: C2 Thomas Fraser, of whom it is known only that in , in reference to his lands, then demanded by Thomas de Gray, he is described as the brother of Symon Fraser. Richard Fraser of Touchfraser, Knight, succeeded his grandfather, Sheriff of Berwick , d probably after when he was declared still to be a rebel and was apparently the father of an only child: B2 Andrew Fraser, k at the battle of Halidon Hill B3 Simon Fraser of Brotherton, Knight, Sheriff of Kincardine , 1st Fraser Lord of Lovat the feudal title , m Margaret dtr of John, Earl of Orkney and Caithness, whose wife may have been the dtr and was the eventual heiress of Sir David Grahame, Lord of Lovat, and with two of his brothers was k at the battle of Halidon Hill, having had issue [see separate article] C1 James Fraser of Frenndraught, knight, left issue a dtr: John did not succeed to the earldom as Burke implies, but received it as a new creation from Robert II, whose daughter Marjorie he married.
