Every time I came to it thinking it was time for me to read it I would see so many mixed ratings that I thought, "maybe not right now". Obviously by me having read the book the 5 star review won me over and I am so glad it did. This just reminded me that we are all very different and we are not going to love or even like the same books. That, I personally, just need to read the damn book for myself and see what happens. Now with saying that, I really loved this book. The characters are all very flawed and most importantly to me, very much real. The struggles within these men, these families, and even in these women are very much a reality to a lot of people who are either feeling this way or living this very life being told in this story. Sue Brown has created a story that is very well written with well developed characters. I loved the rollercoaster she put me on and that this book had my feelings all over the map. Like I said, this book was a rollercoaster of emotions with so many ups and downs that I never knew where I would end up. One moment I was loving Nate and Drew and the next moment I was yelling at my kindle for what they were doing to each other, themselves, and their families. I like being able to connect to the characters and go through the emotions with them. It makes them and their situations that more real. I think what I loved most about this book was how honestly written it is. There is no sugar coating and no excuses made for the actions made by these characters. I know people in other reviews have stated this is a HEA but I disagree to a point. It was one of the most honest realist endings I have ever read. I loved that even though some things worked out some things were still being worked through. I loved the imperfections of it all. I look forward to reading more from this author.

## Chapter 2 : NOTHING EVER HAPPENS CHORDS (ver 5) by Del Amitri @ www.nxgvision.com

*"Nothing Ever Happens" is a song by the Scottish rock band Del Amitri. Released as a single between late and early , it reached #11 in the UK charts (it was the band's biggest hit in the UK), and was a top hit in Ireland, peaking at #4.*

Find out more and read all about their hit Nothing Ever Happens. The band were formed in by former chef Justin Currie, an appropriate name for a chef, in Glasgow. My dad was a classical musician, but that was all a bit too intellectual for me. I really got into MOR stuff when I was eight or nine years old. But at that point I was into punk rock, so I played basslines on the bottom two strings and started writing little punk songs on it. They farmed a few copies around and it make Single of the Week in Sounds which, in turn, led to a John Peel session on Radio 1. They took a little break and Currie spent time honing his songwriting skills. Their first hit, Kiss This Thing Goodbye reached number 59 in August , but it got them on the chart map. The accompanying album, Waking Hours, did much better reaching number six and spending 10 months on the chart. At the time, we were basically playing the same places we were playing when we were blagging gigs. The secretaries who type all day and are glad to switch off their machines. Janitors, or caretakers, as we call them, going around locking up buildings just so a night security guard can keep an eye on them all night. Then how everything is silent at night. He even suggests that martians could land in the car park and no one would bat an eyelid. On the news, we hear terrible stories but just carry on as we do. Then the next day, the same thing happens. In other words, nothing ever happens, nothing really different happens and so the world remains as it did before. The band have never actually split up but Harvie began concentrating on production and Currie began a solo career. Both failed to make the chart, but in , Lower Reaches did just that, when it made number 46 and just last month came his latest, This Is My Kingdom Now spent just one week at number Roll to Me, a single, did really well in the States and the royalties have kept him comfortable.

*Nothing Ever Happens was an emotionally charged read that had me wrung out by the end. It had the perfect amount of wit and humor infused with the heartbreak and Pain. The characters were well developed and I at least at one point throughout either hated or loved Drew and Nate.*
