Sold Manufactured Submit your solar cooking data by filling out the simple form on the Solar Cookers International website or email info solarcookers. Please submit to SCI by 1 June Kakuma refugee camp setting the pace in use of renewable energy April On April 29, , a solar cooking festival for schoolchildren was held at Kakuma Refugee Camp in Kenya. At the Gujarat conference, Godfrey presented the results of his study showing that in October, , solar cooking was the second-most preferred method of cooking at the Kakuma Refugee Camp, even though very few solar cookers were available. The cookers were made in Kakuma by refugees from materials donated by Haines Solar Cookers, and should last 10 years with proper care. Ritesh and his colleague, Vivek Kabra , provided expertise and leadership for the festival. Godfrey put together a team of experts, including Mwenda Wilkinson, who handled the logistical, financial, and personnel details. Odaba had been one of the trainers in when SCI first introduced solar cookers in Kakuma. Before the festival, 50 refugee women were trained to use the cookers, and they in turn trained the children. The children sat in neat rows as trainers handed out the cookers, cooking pots , food and water. Each child assembled their own cooker, and successfully cooked delicious noodles before an enthusiastic crowd of family members and relatives. The children were elated and proudly showed off their new cookers. Add an image February Odhiambo made a number of solar box cookers. He then proceeded to demonstrate the solar boxes together with a CookKit , Improved combustion stoves , and heat-retention cookers borrowed from the local Ministry of Energy in his village and vicinity. Faustine Odaba hosting a workshop in Lordariak, Kenya in November Faustine Odaba conducted a workshop about solar and heat-retention cooking cooking in Lordariak, Kajiado County, located between Nairobi and the Tanzanian border, for participants. Renewed solar cooking workshops at Kenyan refugee camps - Solar cooking advocate, Faustine Odaba , and her daughter have been conducting solar cooking and fireless cooking workshops at the Kakuma and Dadaab refugee camps in Kenya. The has been an enthusiastic response to thee workshops as participants prepare for the time when Kenya closes the camps. Benefits of solar cooking explained to Rotary members - Camily Wedende recently presented to fellow members of Rotary Club of Eldoret, Kenya. Camily is the group leader of the Eldoret Student Projects program. Camily Wedende leads a training for future trainers. A new fuel efficient wood stove cooks school lunches in Kamin Oningo, Kenya - Photo: John Geddes April Local woman from Kingston provides school lunches and solar cookers - For the past year, Gabriella Zamojski and her family have been providing school lunches to the school in Kamin Oningo, a fishing community across the bay. Midday cooking of the rice and beans was done over open fires. Firewood however, was growing ever more scarce and increasingly expensive. Wanting to do more to help families, she also organized instruction and a supply of solar cookers. Approximately people were served a solar meal at a community gathering and 21 families left with new solar cookers. A micro-financing program is planned to asset other families obtain solar cookers. Students in Eldoret, Kenya make paper mache bowl shaped bases for solar panel cookers. Sharon Cousins has worked with Camily Wedende in Eldoret, Kenya for a number of years, helping to find ways to promote solar cooking to the local community on a shoestring budget. Sharon has experimented with a number of simple solar panel cooker designs, and her latest effort uses a large reflective bowl as a cooker base with an adjustable curved back reflector. After a recent visit, she sent Camily home with a large stainless bowl that is being used as a form to lay up paper mache copies of the shape using old newspapers. When dry and covered with aluminum foil, it becomes the base for a panel cooker. To cook Posho ugali.
