Chapter 1 : Free Study Guides for OSHA 10 & OSHA 30 Hour Courses |

Start studying OSHA Study Guide. Learn vocabulary, terms, and more with flashcards, games, and other study tools.

I completed 8 years of school and practiced for awhile, then quit my office job to work on a pipeline as an oiler. I did this for a few months and I fell in love with the environment and the industry. It has recently been suggested that I look into becoming a safety instructor for a gas and oil company. Upon researching the prerequisites for the OSHA course, I realize that years of safety experience in the construction field is required. My question is whether you know if exceptions have or could be made, that is, would a doctorate and a few months of construction work potentially qualify me to take the OSHA course? If there is someone with whom you could get me in contact to figure this out I would be very grateful. Thank you for the helpful information! They are the only ones who offer the course and who authorize Outreach Trainers. Thanks for your question! Thanks for following me on my blog! I am looking to also do safety inspection for pipeline and believe I need the OSHA course for that. Is this course online at all I cant seem to find it or do I need actual classroom time? Any information you can give me would be greatly appreciated. Thank you 9 months ago Pennie, Sorry for the week delay in responding! The one in New England is: Do you have any guidance on other certifications that will help me move into a different career field and be able to utilize my industry experience as a foundation? I missed it until today. Regarding preparing yourself for a safety career; there is lots to say! An OSHA 10 is a baseline for safety for anyone and focuses on identifying hazards and remediating them. An OSHA 30 focuses on the same thing and is often thought of as a baseline for safety for a supervisor. There is no pre-requisite for the OSHA In my area of the country New England , we have an awesome Ed Center! Check them out at <http://>
