Patterns II includes ten scholarly essays on a variety of science fiction themes and topics, as presented at ConStellation, the Forty-First World SF Convention, held at Baltimore, Maryland, from September ,

Previous purchases do count in this bundle. If you wish to buy the eBook app for iDevices , please do so before you buy the eBook subscription here! If you are interested in purchasing the app: If you want the app plus the PDF in your Ravelry library, you should follow these steps: Download it to your device. The code is IN the app. About this pattern and the series: Amy is a member of my Ravelry group. When I was designing pieces for this special edition eBook, I knew her namesake shawl needed to be lacy. Amy, the shawl, begins with a cast on across the top edge, and then is shaped into a crescent using short rows. Once the top garter stitch portion is finished, the shawl is bound off using a knitted on edging. Welcome to year four of my subscription series! The idea for my first ebook subscription year one: I decided to design and knit 10 shawls that year, and at the time I released my first subscription, I had 7 left to do. I reached my goal that year, and the next year I was back for more challenge. After that, I realized that I simply love doing these subscriptions. I am so looking forward to getting to know the winners a little bit more and coming up with the perfect design for each of them! The patterns for this eBook will be delivered to subscribers within a subscription period ending March 30, delayed. There is no specific delivery time for each pattern. Patterns will have charts and written instructions, and you will be able to make them out of one skein of sock yarn or an amount of sock yarn comparable to that needed for a pair of socks. Some will be two colors, and maybe even three! There will be a few little extras sprinkled throughout and all patterns will be available to purchase separately! The App As in the past 3 years of subscriptions, the patterns will be sold as an eBook here on Ravelry with the PDF files delivered throughout the year as I release them. But this year, we have an exciting new way to knit the 7 Small Shawls! Please note that you will still be able to purchase the eBook here exactly as in years past if you do not wish to use the new app. The Y4 app is a separate stand alone app from knitCompanion. Since this is a living app, patterns will be added all year as I release each new offering in the Y4 series. All patterns will use the knitCompanion capabilities so you never need to lose your spot, and patterns are easy to follow. Patterns will be set up and ready to knit, with options like charts, sizes, etc as appropriate. No setup work on your part required! Video by me Romi , offered only through the app for special techniques required by each design. Video will be linked in the pattern right where it is needed. And is is indexed for easy access as well. The app will work with any iDevice that is iOS 6 or later i-Pad and i-Pad mini preferable so you can see the charts. Find out more here! Note that purchasing the eBook represents a significant discount over purchasing each pattern separately. No refunds can be given for buying the patterns separately and then, at a later date, purchasing the complete eBook. If you have made a single pattern purchase in error and wished to purchase the book instead, please contact me within a week to resolve the issue.

They look complicated, but they are actually pretty easy. Take a look at my embroidery stitches guide for videos that will show you every stitch you need. The leaves are all done in a satin stitch or fishbone stitch. These can be a little more advanced stitches, so if you are a beginner, feel free to just outline them. To customize the name on the hoop, first make sure you have downloaded and installed the Herschel Script font, which is part of The Fantastic Font Bundle II. Instructions to install the fonts are included on FontBundles. You will also need to download a free program called Inkscape. Open the free pattern file I provided in Inkscape. This will bring up a toolbar on the right. Click black arrow on the top left of the screen, click the words once to select them, and then click and drag to move them around. You should be able to print it separately, type the Herschel Script font in a word document, and add it that way. The font size I used was

Eastern styles[edit] The influence of Scythian art: Scythian art Scythian art makes great use of animal motifs, one component of the " Scythian triad" of weapons, horse-harness, and Scythian-style wild animal art. The cultures referred to as Scythian-style included the Cimmerian and Sarmatian cultures in European Sarmatia and stretched across the Eurasian steppe north of the Near East to the Ordos culture of China. These cultures were extremely influential in spreading many local versions of the style. Steppe jewellery features various animals including stags, cats, birds, horses, bears, wolves and mythical beasts. The gold figures of stags in a crouching position with legs tucked beneath its body, head upright and muscles tight to give the impression of speed, are particularly impressive. The "looped" antlers of most figures are a distinctive feature, not found in Chinese images of deer. The species represented has seemed to many scholars to be the reindeer , which was not found in the regions inhabited by the steppes peoples at this period. The largest of these were the central ornaments for shields, while others were smaller plaques probably attached to clothing. The stag appears to have had a special significance for the steppes peoples, perhaps as a clan totem. The most notable of these figures include the examples from: Later large Greek-made pieces often include a zone showing Scythian men apparently going about their daily business, in scenes more typical of Greek art than nomad-made pieces. Some scholars have attempted to attach narrative meanings to such scenes, but this remains speculative. Bronze idol of a bear found in the Perm Krai , 6th or 7th century. The use of the animal form went further than just ornament, these seemingly imbuing the owner of the item with similar prowess and powers of the animal which was depicted. Thus the use of these forms extended onto the accoutrements of warfare, be they swords, daggers, scabbards, or axes. A distinct Permian style of bronze or copper alloy objects from around the 5thâ€”10th centuries AD are found near the Ural mountains and the Volga and Kama rivers in Russia. The origins of these different phases remain the subject of debate; developing trends in late-Roman popular provincial art was an element, as were proceeding traditions of the nomadic Asiatic steppe peoples. First appearing in northwest Europe, first expressed with the introduction of the chip carving technique applied to bronze and silver in the 5th century. It is characterized by animals whose bodies are divided into sections, and typically appear at the fringes of designs whose main emphasis is on abstract patterns. After about â€” Style I, declining, began to be supplanted. The animals of Style II are whole beasts, their bodies elongated into "ribbons" which intertwined into symmetrical shapes with no pretense of naturalismâ€”rarely with legsâ€”tending to be described as serpents, though heads often have characteristics of other animals. The animals become subsumed into ornamental patterns, typically interlace. After about localised styles develop, and it is no longer very useful to talk of a general Germanic style. Interlace, where it occurs, becomes less regular and more complex, and if not three-dimensional animals are usually seen in profile but twisted, exaggerated, surreal, with fragmented body parts filling every available space, creating an intense detailed energetic feel. Animal style was one component, along with Celtic art and late classical elements, in the formation of style of Insular art and Anglo-Saxon art in the British Isles, and through these routes and others on the Continent, left a considerable legacy in later Medieval art. Other names are sometimes used:
