Financial Aid scholarships study abroad Many colleges and universities offer programs where you can study abroad for a semester or more. Sometimes this is a part of a specific degree program, such as a foreign language, archeology or cultural anthropology, where visiting a specific area of the world can help you advance that particular program. If you are considering studying abroad, here are some considerations: Studying abroad for a semester can come with a hefty price tag. Your semester abroad may indeed be the most expensive semester of your college career, but the cost needs to be weighed against the opportunity. For many the ability to travel and live in a foreign country for period of time is worth the extra cost. Often studying abroad will be less expensive than staying abroad for the same length of time later in life, and there are often unique scholarships for studying abroad. Personal and Professional Growth: Your college years are a time of considerable growth and personal development. You are challenged in your classes and exposed to new ideas and experiences outside of class. Living and going to school overseas can be an utterly transformative experience. Being exposed to a different culture can open your eyes to new ideas and different ways of doing things. This experience can help you personally and professionally. Personally, new and different experiences under your belt, you may end up learning a lot about yourself, and your abilities. Professionally, studying abroad has widened your perspective on the world, which can often make you more well-rounded in your career. Practice a Foreign Language: If part of your high school or college career included learning a foreign language, then traveling to a country that speaks that language is a great way to deepen your understanding of it. Several weeks in the country will allow you to further master a language. The bottom line is, traveling abroad is a once-in-a-lifetime experience. Start Your College Search Now. Summer Learning Program Online Avoid summer learning loss with K5 Learning Kids deserve a break from the classroom, but not from learning. Countless research shows that students who stop all studying during the summer suffer a significant loss in knowledge and academic skills. We encourage parents to establish a regular summer study routine. An award-winning summer learning program Thousands of students have had success with K5 and its 3, reading and math activities. Our award winning lessons are research based and aligned with national education standards. Our animated, highly interactive lessons build reading, math and study skills. The program is structured to encourage independent study and to minimize time requirements for parents. We start with free assessments We recommend that students complete our free online reading and math assessments. Each child is then placed in the lessons according to their skills, not their grade levels. A child may be placed at an early grade 3 level in phonics and a mid-grade 1 level in geometry, or vice versa.

Summer reading program Our summer reading program covers 5 key skill areas: Phonemic Awareness – identifying and working with individual sounds in spoken words. Phonics – understanding the relationships between written letters and spoken sounds. Sight Words – recognizing high frequency words to increase reading fluency. Reading Comprehension – developing a variety of reading strategies with the larger goal of strong comprehension. Summer math program Our summer math program covers the 5 key skill areas: Numbers and Operations – elementary school arithmetic from simple counting through fractions and beyond. Measurement – measurement concepts, including telling time and counting money. Geometry – characteristics and properties of geometric shapes. Algebra - patterns, relations, functions, use of models and algebraic symbols. Data Analysis - collecting, organizing, displaying and analyzing data Students work independently Our summer learning program minimizes the burden on parents. Point and click interfaces and repeated spoken instructions allow kids as young as 4 to use K5 Learning independently. A summer learning program with full instruction, not just quizzes A summer learning program should allow kids to learn new materials, not just practice what they have learned elsewhere. All of our lessons start with a full interactive tutorial followed by practice sessions and finally a quiz. Feedback is immediate K5 Learning lets your child know right away when they get something right or wrong. Kids remember better and are more motivated when they receive immediate feedback. Bite-sized lessons provide flexibility Lessons are broken into minute segments so that study sessions can be short and flexible. Kids learn better with short but frequent study sessions. K5 Learning offers reading and math worksheets, workbooks and an online reading and math program for kids in kindergarten to grade 5. In our online program, kids work at their own level and their own pace through a personalized curriculum of reading and math lessons; each lesson is accompanied by customized printable worksheets for further study. K5 helps your children build good study habits and excel in school. Free trial We offer a day free trial of our online program. The free trial includes free reading and math assessments.
