The owner asked if I had ever considered getting a Simplicity and I told him I had never even heard of them. When he came back out he encouraged me to try one. He had fixed my Hoover and plugged it in. He threw some dirt and debris on the floor and had me sweep it up with my vacuum. He then had me use the Simplicity - a lower end model at that. The difference was remarkable. What I had gone over many times with mine and missed this sweeper picked up easily. It pushed with only a gentle nudge and did a very impressive job. He told me that they had a model that was being replaced with a newer one and offered it to me at a great price. I have never regretted the choice. VS Not what I was promised! The model at the store worked great, but the vacuum that we brought home was a different story. The suction is just ok, not any better than our Kirby, and the attachments are junk! To use the long pole with the broom attachment, there are 3 separate pieces, and they all come apart very easily. Trying to get under the bed or the couch, it is constantly coming apart at the different sections. I really want to like it since it is American made, but the unit is making it very difficult for me to like it. Maneuverability It is a little difficult to manage, but it is lighter weight than my Kirby was. The bag was pretty easy to change. Suction Performance I am a little disappointed with the suction power. When demonstrated in the store, it did very well, but at home, I have to go over even the smallest pieces of debris over and over to pick it up. Versatility I like how easy it is to use the attachments, I just wish they would stay connected while using them. Reviewed by 18 customers.
