The 7 Habits of Highly Effective People Summary I could only go so long, on a blog devoted to books about self-improvement and personal effectiveness, without covering the quintessential modern tome on the subject. I found myself oddly embarrassed to be seen reading this book on the subway lest someone attribute that same character to me. In truth, this book is more worthy of its acclaim than of its infamy. If you can push past the BuzzFeed-style clickbait titles to understand the truths behind them that were the impetus for people to later turn them into buzzwords, you will find enormous value in these pages. The 7 Habits In the pursuit of personal effectiveness, most people try to change one of two things: To sum up the seven habits at a high level, an effective person has learned to make the paradigm shift from outside-in to inside-out, progressing along the growth continuum from dependence to independence to interdependence. He has found the balance of being able to produce while also increasing his capacity to further produce. That may sound like a bunch of gobbledygook, but it will become clear as you progress through the habits and make the paradigm shift the author writes about. The first three habits are habits of self-mastery, or private victories. These habits must come first, after which come the second three habits of public victories. The last habit is one that is key to the proper functioning and renewal of the first six. The best way to understand what a paradigm is, as well as which paradigm an effective person possesses, is to first understand the three widely accepted paradigms that most people use to explain human behavior: While there is certainly some truth to this, Covey quotes psychiatrist and Holocaust victim Victor Frankl: The author defines proactivity and the paradigm shift that comes with it as exercising your freedom to choose self-awareness, imagination, conscience, or independent will in between stimulus and response. This is not to minimize the effect that genetics, upbringing, or environment have on who a person is; however, being an effective person requires that you recognize your responsibility to shape your response to those things. This is not just positive thinking; being proactive means understanding the reality of a situation, but understanding the reality of a situation also means understanding the reality that you can choose your response to your circumstance. The more you focus on things outside your control, i. Your circle of influence will shrink. In contrast, by focusing only on those things within your control, you will find that your circle of influence will grow. Begin with the End in Mind Everything is created twice: Beginning with the end in mind means approaching any role you have in life with your values and directions clear. Whatever is at the center of your life will be the source of your security your sense of worth , guidance your source of direction in life , wisdom your perspective on life , and power your capacity to act and accomplish. Most people never take the time to align their values with their center. As a result, they have one or more of many possible alternative centers. People can be spouse centered, family centered, money centered, work centered, pleasure centered, friend or enemy centered, church centered, or self centered. The principle center will put all these other centers in perspective. Covey puts it this way: This principle is the same for families or organizations; as hokey as it might sound, an authentic mission statement is the first step in the process of being effective. You need to put in the time, thought, and effort in order to gain the right perspective, and in order to set yourself up for the next habit. You can click here for some examples of personal mission statements, starting with a few from Ben Franklin. Covey describes four levels of time management: Most people never get beyond this level. This fourth level is where the author asks us to operate. He borrows the tool for this categorization from none other than Dwight Eisenhower:
