Chapter 2 : Social-Historical Construction of Sexuality: Bibliography - Make Him Desire You

The quote comes from Carol Vance's essay "Social Construction Theory: Problems in the History of Sexuality". It's a really interesting read about how sexuality is a construction of society and I really recommend it!

Heineman University of Iowa The history of sexuality in Nazi Germany unites two subjects vulnerable to sensationalist coverage: Film scholars have observed a tendency to eroticize National Socialism in that medium, a phenomenon that reflects and perhaps perpetuates the dangerous allure of fascism. Perhaps more startling is the persistent misrepresentation of sexuality under Nazism in outlets that allegedly produce nonfiction. In a recent front-page story, the Los Angeles Times characterized Lebensborn as a place where "11, children were born to women who mated with elite SS officers," although all serious investigations describe Lebensborn as a home for pregnant women who could demonstrate the racial acceptability of their offspring-to-be. Three major developments can account for this sea change. One is a growing interest in the scientific bases of Nazi racism, specifically, the science of eugenics. The third is the lowering of taboos about studying sexuality and, particularly, sexual minorities. As a result, some subfields within the history of sexuality in Nazi Germany are now well developed. One strength of this literature is its integration of the history of sexuality into the study of Nazi racial ideologies and practices. Another is its pursuit of larger issues of change and continuity. Historians of sexuality have carefully explored the balance between those aspects of Nazi policy and practice that were innovative and those that evolved from preexisting social mores and scientific ambitions. Nevertheless, enormous gaps in the literature remain. One reason is the uneven nature of the sources. It is easier, for example, to formulate a research project on the persecution of homosexual men than on that of heterosexually "promiscuous" women. The former violated easily identified paragraphs of the criminal code Paragraphs and a and, if sent to concentration camps, had their own label the pink triangle. While a study of convictions under Paragraph or of pink triangles hardly exhausts the history of gay men in Nazi Germany, it is an indispensable beginning and a relatively straightforward research task. There is no comparable, easily defined set of records on heterosexually "promiscuous" women as distinct from those legally categorized as prostitutes, making it difficult for a researcher to identify and isolate women persecuted on the basis of "sexual promiscuity. A political climate, both inside and outside the academy, that considered sexuality trivial in comparison to other fields of study long made it difficult for scholars to get such research funded. We are in the habit of inquiring into groups persecuted by the Nazis, and we recognize You are not currently authenticated. View freely available titles:

Chapter 3 : Social Perspectives in Lesbian and Gay Studies: A Reader - Google Books

Unformatted text preview: Article SOCIAL CONSTRUCTION THEORY: PROBLEMS IN THE HISTORY OF SEXUALITY Carole S. Vance Social construction theory in the field of sexuality proposed an extremely outrageous idea. It suggested that one of the last remaining outposts of the natural' in our thinking was i-,uid and changeable, the product of human.

Chapter 4 : Carole Vance - Wikiquote

As Carole Vance underscores in her piece, "Social Construction Theory: Problems in the History of Sexuality," a careful engagement with the vicissitudes of social constructionism entails taking note of the fact that understanding that sexuality is constituted differently in different times and places opened the door to a range of different.
