Chapter 1 : Core Skills: Science, Grade 4

*Working with Sounds, Book C (Specific Skill Series) [Richard A Boning] on www.nxgvision.com *FREE* shipping on qualifying offers. There is no writing or rips pages at all in this booklet but the pages have come loose.*

Have your child hold his lips closed and then ask him to hum or turn his voice on. The mouth should not open at all during this sound, all of the air should come out of the nose. Bite your bottom lip use a mirror to help your child see what she is doing Hold your lip there and blow You may need to have your child use her finger to keep her lip in the right place. If your child is struggling with this, try having him hum a tune while biting his bottom lip with his top teeth. If your child is struggling to hold his lip with his teeth, have him use his finger to keep it in place. If your child is having trouble figuring out where to put her tongue, use these techniques to show her the right place: Touch the spot right behind the top, front teeth with a popsicle stick or sucker. Then tell her to put her tongue in the same spot. Put a sticky food, like peanut butter or marshmallow cream, on the spot right behind her top, front teeth. Then, have her lick it off. When you are describing that spot again, call it the sticky spot. Tell him this is the loud one. This time though, your child will hold the tongue in that spot while she hums or turns her voice on. If she is having trouble turning her voice on, have her hum a tune while holding her tongue in that position. We call this the snake sound! If your child is sticking his tongue out too far, look in a mirror and tell him to keep his tongue behind his teeth. You can practice smiling so that his teeth are touching and there is no place for the tongue to peak out. To make this sound, have your child form her lips into a little circle and blow. There are actually two different ways of producing this sound, one with the tongue scooped like a bowl and one with it curved like a mountain. What you have to do instead is figure out which way they do it best. If your child is having trouble finding the right place for his tongue, use some of these placement cues: Get a small sucker like a dum-dum or a popsicle stick. Have your child lay on his back while saying this sound. Gravity may help him drop his tongue back. This may get the tongue back to the right position. Have your child pretend to pant like a dog to make this sound. Where to Find More Info: To get my complete guide of how to do this, along with all of the visuals and cards you will need to make it happen, check out my All-In-On Articulation Program and Materials Kit.
