While there is much to love about the hustle and bustle of modern life and the excitement of the city, sometimes it gets to be a bit much. It reminds us of a slower pace of life, and helps us to relax and feel at home. On top of that, it is often an affordable choice for decorating, and a great way to reclaim old wood, crates, and other supplies which might otherwise go to waste. These rustic DIY storage ideas are easy and fun, and will lend your home a touch of nostalgia and whimsy. Modular shoe storage cubbies These cubbies look amazing! Just look how organized those shoes and boots are, and how there is a space for everything and everything in its space. The baskets add a great rustic touch as well. These free printable plans from Shanty 2 Chic will walk you through it step-by-step. You can make cubbies to the dimensions that you need, and stack them up in any fashion you choose. You can paint the wood any color you want, or even leave the grain unpainted for an extra-rustic look. Even though these are quite obviously old crates, somehow it is hard to believe they started their lives so humbly! More rustic crate shelves These rustic shelves also are made of old crates, but instead of being bracketed together and screwed into the wall, they are simply stacked on top of one another. The wood has been left unfinished, which gives them a rough, unfinished look which is quite charming. Sometimes the simplest designs are the most amazing. These free woodworking plans will teach you how to make a desk or nightstand with a door that opens for internal storage space. The design is very simple with few embellishments, and has a very old-fashioned look. You can of course stain the wood any way you choose for a different look. Wood pallet shelves A similar idea comes from the Thriving Home blog. This is a simple and easy project that will allow you to take a wood pallet and turn it into a shelf. This is mostly a matter of doing a nice job with the paint and tacking it up to the wall. I like how they added those knobs across the bottom to hang the aprons. Very smart and very cute! Have a look at this hall tree, which also doubles as a bench. The hangers are perfect for coats, scarves, and hats, which the bench provides a nice resting place. Underneath, the cubbies are perfect for bins which you can use for boots, outdoor equipment, and more. How much would this cost if you bought it from the store? DIY is a great way to save money while staying eco-friendly! Apothecary cabinet The transformation of this project from its start point to its end point just blows me away. The cabinet started as some rather bland Idea shelves: The entire project has been documented step-by-step with photos so that you can follow along. This really is remarkable workmanship. Pottery Barn-inspired bookcase This project for a bookcase was inspired by a bookcase from the Pottery Barn. They are not very tall, and are designed specifically for children, who will be able to reach the shelves without trouble. They look delightfully old-fashioned, and the planks across the bottom shelf keep toys or books from knocked out. A very nice design! Bathroom cabinet with mirror Need some more storage space in your bathroom? Have a wall free? I just love this project for a tall bathroom cabinet! With a mirror installed on the outside of the door, it doubles as a full-length mirror, perfect for getting ready in the morning. Open it up, and you have a ton of storage space for bath products, hair products, medicines, cleaning supplies, and more. You can set the shelves as close together or far apart as you want. I like the way that the creators decided to make some shelves larger and some smaller, so that they are ideal for different items. Wine rack made of a log If you want a really natural look, this wine rack is totally awesome! The top works as a small table. This would not be a particularly challenging or complicated project if you wanted to try something similar at home with a dead log. Floor standing Curvy Wine Rack Download them to learn how to make a simple console table which can go great in your living room or any other room in your house where you want to keep some odds and ends. The bottom shelf provides extra storage space, and the cross beams give it that old-fashioned, homespun look and feel. The openness of the design keeps it lightweight and easy to move, and also saves wood. Apple crate shelves This project was created by an internist for a retail shop, but it would work just as well in your home. The crates are simply stained and stacked one on top of the other, and she has strung some lights through the boxes to draw the eye and illuminate the products. The shelves look great in the store and

really provide a homely look and feel which is very welcoming. The same look would do wonders in any room in your house! Quick and easy storage crate This project from Shanty 2 Chic is one of the quickest and cheapest Ashley says she has done to date. You build this one from the ground up starting with the planks of wood and the brackets. There are step by step instructions, and Ashley tells you exactly what she purchased so you can follow along. This would be a great woodworking project for a beginner, and you can use the crate to store anything! Tilt-out trash cabinet This is a lovely and very handy design which allows you to conceal your trash bin, but still access it quickly and easily when you need it. It is a great way to beautify your kitchen and also contain odor. If you visit the blog, there is an overhead shot which allows you to get a look at the inner workings. The crafter used an authentic wine barrel and added in shelves for wine bottles and glasses. The top of it of course can function as a table. The wood is all birch and oak, with a gorgeous stain for a nice finished look. Not only is it amazingly functional, but it would be an excellent conversation piece if you have your friends over for tastings. Wine Barrel Bottle Cabinet Simple rustic shelves These thick rustic shelves are basically just slabs of wood that are bolted to the walls. Free plans are available right on the sight. They are actually a bit more complicated than you might think. They are not actually solid blocks of wood: That means they weigh a lot less than they look like they do. Custom shelving This page actually has a lot of amazing ideas for rustic design. The applicable storage idea, however, is these custom shelving units. Originally this was a guest bedroom, but the designer tore out the closet and built the shelves and cabinets from scratch, sticking with a stark white look which contrasts beautifully with the rustic wood items on the shelves. Be sure to scroll through the entire entry to see more great rustic design ideas. Vintage crate boot rack Earlier I shared a shoe and boot rack made out of crates, and here is another one! While the idea is similar, there are some key differences. Note the helpful wheels on the bottom of the lower crates, which make it easy to move the whole assembly. I love that the original labels on the sides of the crates are still on there too. It just makes them look even more rustic! Wine rack towel holder Here is a cute, clever, and easy way to add a homespun touch to your bathroom. Install a wine rack as a towel holder! It turns out that a wine rack functions perfectly in the bathroom if you just roll up your towels. Mason jar organizer I am seeing Mason jars everywhere these days! There is something about a Mason jar that just transports you back in time. There are step-by-step instructions, and even a video, so check it out. Toy organizer Here we have a toy organizer which uses plastic bins and chalkboard labels. The labels are great, because you can always erase them and write a new label if something changes. You can get free plans right on the page for the wood frame. I imagine this idea would look even cooler if something were done to decorate those plastic bins and make them fit in better with the old-style look of the frame itself. There is plenty of room for towels, bath soaps, and whatever else you want to store. You could use this anywhere in your house, though. The shelves are nice and deep, but the open design prevents it from being too heavy or hard to move around. Bread tin wall bins I love ideas like this that repurpose a common household item in a way I would never expect. Have some old bread bins lying around unused? One cool way to put them to a completely different use is to turn them into wall bins! I love the old patina on these bins. With the old wood plank, there are some very interesting textures and colors interacting here. They stand out nicely against the white siding. They are being used here to store decorative old items, but they would also be great for functional use gardening supplies, etc.

Step 1 Prepare the workplace by laying old newspapers where you will work. Start by spraying the tin can with the color spray. Slowly rotate the can carefully to even out surfaces. Protective gloves are recommended. Step 2 Next apply the primer on the wall of some boxes and follow with the pink craft paint. Small paint brushes should be used to finish the edges and ensure the quality of the end product. Step 3 To avoid drilling unnecessary holes into the wall you can unify smaller boxes into a bigger piece. Brush the front side with wood glue and press them together by making use of a clap or two. Fix the template with double sided tape on the drawer front and with care dab the black craft paint with the stippler. Here the brush will be dipped with a little color. Step 5 Now in the top third of the can drill a hole with the cordless drill and metal drill bit and with the wood bit drill holes for the knobs in some drawers. Attach the can with a screw, nut and washer. Furniture Knobs usually have a long thread and if it should be definitely sewn of with a hacksaw. Stick the knobs inside through the drilled hole to see exactly how much you have to saw off. Step 6 Now simply arrange the boxes in a graphic composition on the wall and screw them. Small boxes can be planted easily above or on the side. By placing them above you enhance the versatility. You can simply take them down when you need them somewhere else. This homemade shelf exudes creativity. From simple wooden boxes you can obtain extraordinary results with little to no effort. Delicate pastel tones will highlight the vintage apparel exuded by the wooden textures. You can also extend the space if you need more storage. This solves far little storage than the previous methods but is still a graphic furnishing worth considering. Required items to materialized the creativity display. Step 1 Start by applying the primer on the MDF board after you prepare the workplace. Paint the board in a color that you love. Step 2 Carefully sand the picture frames so that the paint will look and hold better. Step 3 Next paint the picture ledges in the desired color, do not rush. Step 4 Create a template with a inspiring or loving quote that will simply boost your moral upon reading. Lay it down on the MDF board and dab the color with a stippling brush. You can either buy one or make it on your own. Step 6 Enjoy the new addition now and arrange your favorite pieces in the perfect composition. What do you think about these DIY wall storage ideas?
