*The Automatic Millionaire is a practical and smart guide to mastering your relationship with money." - Barbara De Angelis, Ph.D. author of What Women Want Men to Know "More people will become millionaires in the years ahead than in all the previous years of human history.*

I was in my mid-twenties and was teaching an investment class at a local adult-education program. Jim McIntyre, a middle-aged middle manager for a local utility company, was one of my students. The request surprised me. My Grandma Rose Bach had taught me never to judge a book by its cover. Maybe Jim had just inherited a lot of money. For his sake, I hoped so. What has stuck in my mind about Jim is that he was wearing a short-sleeved dress shirt with a plastic pocket protector in his breast pocket. His wife, Sue, had a little more flair, with some seriously blond highlights. She was a beautician, a couple of years younger than Jim. They were holding hands like two high school kids on a first date, bubbling with excitement. Before I could ask how I could help them, Jim started talking about his plans and what he would do with his free time. What makes you so certain you can afford to? Then Jim turned back to me. He gazed back at me serenely. I looked first at their tax returns. Not rich, to be sure, but a decent income. How much did they owe? I scanned their financial statements. There were two homes listed: And there was more. Talk about a substantial asset base. By any standard, the McIntyres were rich. In fact, it was completely realistic. More than realistic--it was exciting! But there was something about the McIntyres that impressed me. To the contrary, they seemed perfectly ordinary--your average, nice, hardworking couple. How could they have possibly amassed such wealth at such a relatively young age? To put it mildly, I was confused. But I was also hooked. I was in my mid-twenties at the time, and even though I was making good money, I was still basically living paycheck to paycheck. Many months it seemed that instead of getting ahead, I was falling behind, working harder and harder to make ends meet. It was embarrassing, really, and frustrating. Here I was, a financial advisor teaching others how to invest, and I was often struggling myself. Even worse, here were the McIntyres, who probably in their best year barely made half of what I was making, and yet they were millionaires, while I was falling further and further into debt. Clearly, they knew something about taking action with their money that I needed to learn. And I was determined to find out what it was. How could such regular people have amassed such wealth? Eager to know their secret but not knowing where to begin, I finally asked them, "Did you inherit any of this? Our parents taught us a few commonsense rules about handling money. We just did what they said, and sure enough it worked. The same is true for a lot of people we know. In fact, in our neighborhood, about half our friends are going to retire this year, and many of them are even better off than we are. The McIntyres had come to interview me about how I could help them, but now I wanted to interview them. I mean, they look rich, but when you get into the details of what they really have, it often turns out that they are not only not rich but broke. Just this morning, I met with a man who drove up in a brand-new Porsche, wearing a gold Rolex watch. He looked loaded, but when I went through his statements I found he was actually leveraged to the hilt. Plus he was paying alimony to two ex-wives. We all began to laugh. He handled his finances just like he drove his Porsche: Then you guys come in. You drive up in a Ford Taurus. Jim here is wearing a ten-year-old Timex--" "Nope," Jim interrupted with a smile. So please tell me--what was your secret? You must have one, right? Sue looked at Jim. You teach it every day. We just lived it.

If they stayed at the company for thirty or forty years, they retired with a gold watch, a pension, and lived happily ever after. Unfortunately, today that Canadian Dream is on life support. Companies are outsourcing and downsizing, the company pension is one of those things we talk about by saying, "Remember when?
