## Chapter 1 : Garlic & Grass :: A Grassroots Journal of America's Political Soul

*The Bush brothers kick Katherine Harris to the curb. Harris' maneuvering helped George W. Bush carry Florida, and with it the presidency. whatever Jeb Bush and the White House do. And if.*

To an objective observer, two facts are clear: Gore won the nationwide popular vote, and according to a recent Miami Herald analysis, he was also in all likelihood the favorite of Florida voters as well. The Florida race, or even the national race, was a statistical dead heat — a tie. There was no clear winner. Factor in the bizarre antiquated 19th century vote tabulating technology used in much of the US and the wide margin of error inherent with these machines, and the difficulty of determining a winner was clear. For most Americans, and for much of the global television audience, however, Bush was always either the presumed "winner" or at the very least, the likely winner. Al Gore was always seen as trying to either "catch-up" to Bush, or "overturn" the Bush victory. The Bush claim to victory always had the veneer of legitimacy while the Gore claim effused a certain stench. This perceived Bush victory, the perception that the horse race finally boiled down to one stallion breaking through the finish gate, was a network news fabrication. We saw it on TV. The networks called the election for George W. Bush, projecting him the winner — in effect declaring him the President Elect. Bush is the next president of the United States. The genesis of this call, and in particular the chronology of the ensuing echos are telling. The story began on election night at 2: Fox News projected George W. Bush as winner of the Florida primary and the Presidential election. The telling part of this story is that the call was made by John Ellis, a freelance political advisor contracted by Fox News to head their election night "decision desk. More than just a cousin in name, Ellis maintains close contact with the Bush brothers. A former colleague of his at The Boston Globe reports how he stays in regular email contact with his cousin Jeb. Hence it was not surprise, recently, when Ellis proclaimed, "I am loyal to my cousin I put that loyalty ahead of my loyalty to anyone else. With a constitutional crisis looming on the horizon, pundits called for Gore, and not Bush, to be a "patriot" and concede. In a fair count, without shenanigans or election irregularities, the Miami Herald estimated Gore would have won Florida by 23, votes. The Bush strategy all along was to prevent a recount and run out the clock — which he succeeded in doing, eventually winning the state and the presidency by a few hundred votes. The strategy only worked because Ellis coronated him the winner. Bush on election night prior to his making the election call. Even Kovach admitted this was improper. President, to end up in a position to call the election for the U. The puzzle comes together quickly. Ellis works for Roger Ailes, the director of Fox News. Ailes also served a stint as producer of the Rush Limbaugh radio show. Murdoch, whose media empire spans 52 countries with primary investments in Canada, the United States, Britain and Australia, is one of the largest contributors to the Republican party. The specter of the Ellis, Ailes, Murdoch team bearing responsibility for the miscall that set in motion a Bush team victory script with George W. It is not, however, out of place, given recent events in Florida. It was Harris who used her position to stifle a hand recount and who eventually certified an allegedly incomplete vote count. Add to this the specter of bizarre "butterfly" ballots and imprecise 19th century vote tabulating technology with older counting machines amassed in minority communities , allegations of police officers harassing Black voters, and the fact that, under Florida law one third of the adult African-American male population is barred from voting because of felony convictions resulting from previous run-ins with the aforementioned police, and what we see is an electoral system more reminiscent of a corrupt third world fiefdom, than a supposed industrial democracy. If such an election transpired in any other country, the world would condemn it. An earlier article by Dr. Niman concerning the , African American males disenfranchised from voting in the Florida presidential election was published in The Challenger. It is available on-line at mediastudy.

But more disturbing are the scolds from tepid moderate mainstream journalists who often fail to read their own newspapers. New York Times columnist Nicholas D. Kristof attacks the film because "Moore hints that the real reason Bush invaded Afghanistan was to give his cronies a chance to profit by building an oil pipeline there. Perhaps Kristof, like President Bush, refuses to read. The book *Forbidden Truth*: Kristof also ignores the fact that the U. Special Forces as his praetorian guard. Article VI of the Nuremberg Charter defines "Crimes Against Peace" as "planning, preparation, initiation or waging of war of aggression or war in violation of international treaties. No other Governor of Florida has ever held that title. Therefore, it has to be removed. I love the US. You are confusing my critique of the leaders of the US with hate and you are branding it as un-patriotic. A Governor, in the United States, is not a political leader of a party, he is a fiduciary or trustee. In any case, the issue of "honourable" is pretty trivial, and surely not what all the above posturing and bad rhetoric is about. I see that the current favourite as it were is "The formal style of address should always be provided in the introductory paragraph of the article, but only after the name is provided, and not otherwise prefixed". I prefer the focus on substance of the discussion. Truely, this is typically American. Kindest regards Nobs Nobs01 1 July The votes were officially left uncounted and the Florida courts were cut out of the picture altogether. This has been reworded to: In the context of this paragraph is seem irrelevant at best or completely out of place at worse. In its presentl wording it sounds like an accomplishment, not a criticism. If there is more to this story that justifies its presence, please expand on it and add it back to the main article. The Tiburon team added a little surprise in the video demonstration: Jeb burst into laughter because the video shows Jeb tackling George and then Jeb went for touchdown. The video of the Bush brothers is not available in the retail version. Jeb is a big fan of football and video games. Am I missing some deeper significance? Reportedly participating in these schemes has been Porter J. Goss, more recently a Congressman R. Also interwoven with these fraudulent enterprises has been Henry Hyde, Congressman from Chicago suburbs. In violation of the U. Hyde has reportedly assisted the Bush family in laundering illicit funds through the Paradise Island Bahamas gambling casino. The Majority Staff Director of the Select Committee, John Millis, was murdered, and typical of an intelligence "hit", was disguised as an alleged "suicide". Just prior to being murdered, disgruntled for various reasons, Millis arranged to leak to a certain outspoken independent minded journalist, lists of CIA proprietary firms, used to disguise CIA dirty tricks. Some of these CIA adjuncts, privatized for "cover", have been owned, in turn, by Caribbean and European tax havens, where local laws guarantee absolute secrecy, and where financial enterprises and "shell companies" launder the illicit proceeds from the dope traffic, weapons smuggling, gold covert traffic, and the sale of nuclear bomb triggers. These stories, under a Rome dateline, early in December, , mentioned for example, that the Archbishop of Barcelona, Spain, was accused by Italian authorities of being a kingpin in using the Vatican Bank for these illicit doings, including the sale of osmium nuclear bomb triggers. Reportedly acting as "laundry lady" and surrogate for these funds, through Credit Lyonnais, has been Katherine Harris, in recent years Florida Secretary of State. In her position, she controls and supervises the filing, or reportedly on occasion concealing, corporate data and corporate charters and annual reports, on the basis of corporations considered domestic to Florida or listed as "foreign" corporations, actually meaning corporations domiciled elsewhere in the United States. In that capacity, she has reportedly sought to keep secret records, known however to John Millis, relating to the "shell" companies operated as part of the massive swindling of her boss, Governor Jeb Bush, his two brothers, and their father. Katherine Harris also reportedly played "laundry lady" and surrogate for her boss Florida Governor Jeb Bush, and the Bush family, in huge amounts of illicit funds laundered through another French bank, Banque Paribas. Katherine Harris has played a key role in the year presidential election mess centered around Florida. Long-time sources in retirement in the intelligence community, have contended for some time prior to the year presidential election that it would be orchestrated on a mammoth scale from a prior historical example as a blueprint. A recent book of Gore Vidal, entitled "", is a reconstructed discussion of the presidential election mess involving Florida and two contenders for the White House, Samuel J. Tilden and Rutherford B. Because of complications with the Electoral College and an extremely tight race, a compromise was necessary by which Hayes became a highly-damaged U. President, called various names of fraud during his term. Some contend the fine hand of the American CIA is evident in the year election ruckus. Through a reported computer "glitch", upwards of 65, presidential election ballots "disappeared" in Tennessee, causing presidential candidate Albert Gore, Jr. Clinton for months prior to the election contended to confidants that he expected to remain in the White House after the Election and such, by some kind of an emergency? Did Clinton, early in his career being a CIA darling, have inside information or was he just hallucinating? One of the major news networks, despite having corroborated much of the foregoing details, has covered up the role of Florida Secretary of State Katherine Harris in respect to Jeb Bush and his reputed fraudulent enterprises, and her role in seeking to apparently block counting of questioned election ballots. There is more to this story.

Strangely mellow[ edit ] As is, the article is neutral, but strangely lacking in information at certain key places. Its stated mission was to influence public policy at the grassroots level. This pattern reappears throughout the article. This article [9] states that he was not involved Green caterpillar In the same election year, his brother unseated the incumbent Ann Richards to become governor of Texas. In , having tried to make amends with black voters and casting himself as more moderate, Bush ran again, in more disciplined fashion, and won handily. A short comment should be enough. Gov[ edit ] I agree with the hidden note in the article about the section on lieutenant governors being too long for an article on J. Bush, but if it is left as is, could someone who actually knows something about the history of Florida politics please clarify " Brogan was reelected to a second term in with Bush and then resigned If so, that could be stated. Or that he made up his mind after election but before inauguration? In which case the sentences are out of order, as they imply a chronology. Or that he changed his mind after inauguration? Also out of order. In any case, can someone provide a reference to this? I removed that from the article, and broke up that section into two. The section was headed Florida Cabinet but dealt with other things, also. This is not an article where I want to make changes to content without discussion. Please reference an article written by Howard L. The significance of her incarcerations is that they caused her no harm. Prosecutorial deployment of prison snitch Clarence Zacke cost Mr. Dedge 22 years of his life, but cost Gerald Stano his very life. Please reference articles on Jeb Bush allowing the FBI and municipal police departments to target peace protestors as potential terrorists. Please reference articles that balance your biography. Was it some PR company working for Jeb? This section is awfull someone should unlock it and rewrite it. You can see some of his environmental "achievements" on this site: Someone needs to seriously rewrite this. It is a pure joke in the state in which it is now. The starting line is a serious killer "Bush signed legislation to protect the Everglades and opposed federal plans to drill for oil off the coast of Florida. In early October " LOL oh please give me a break! Maybe it was not written by PR company, maybe internt of his has his hand in this "Preceding unsigned comment added by Is the only thing notable about these persons related to their infractions of the law? I think it is best that we remove these sections because they have little relation to Jed Bush. What did he do about them etc. Do we include personal information about the children of most politicians? These are little more than attacks that should be removed. Many people consider him unintelligent and satirize the opinion see Lil Bush for an example. Perhaps an "In Popular Culture" section? I think there needs to be a section on criticism or alternative points of view. It is hard to see how it could be reworded in a less controversial manner. Miguel Recarey[ edit ] I agree with the comment below; there seems to be a missing paragraph. The paragraph included about Mr. Recarey seems to have been lifted - without accreditation - from a Guardian UK article. Recarey online; perhaps a paragraph could be added with inforamtion, either from the Guardian UK article, or another source, such as the Wall Street Journal, which covered it, too. No introduction is given as to who he is, and why it is a controversy. Bush and Amar Bajpai are the only officers. The two also formed Britton Hill Partners. Both companies are based on Coral Gables.

### Chapter 6 : PrimeTime Exclusive: Katherine Harris Interview - ABC News

*PRESIDENT BUSH was in Florida yesterday trying one last time to cut the political legs out from under the woman who helped put him in the White House in Rep. Katherine Harris met the.*

It was accomplished in a small county under cover of darkness-or at least beneath the cloak of confusion that the clash over votes in the larger counties afforded. You might have overlooked it; references to it were buried in the midst of a long piece on a jump page in the Saturday, Nov. There were no hand-count or hanging-chad issues here; this was the automatic re-count every Florida county was required to perform the day after the election because of the closeness of the vote. Gore a nine-vote lead, his lawyers claimed. And why this sudden last-minute decision to ignore the re-count total? King she could certify either countâ€œ. If it feels good, do it. Does anyone doubt that if the county board had wanted to add votes for Al Gore, Ms. Harris would have laughed at a last- minute switch? The late Lars-Erik Nelson characterized the post-election tactics used by Ms. If you want to know the truth, I blame the Bush campaign for the death of Nelson, one of the best journalists in America, someone who deserves a posthumous Pulitzer not just for his powerful, skeptical reporting on the Wen Ho Lee case, but for his consistently brilliant and iconoclastic commentary over the course of a career. A few hours later, he was found in front of his television set, dead of a stroke. No one will convince me it was unrelated. And, as the Nassau County episode demonstrates, their willingness to countenance outright theft. The decks are stacked against a Gore lawsuit to contest the election. Too many statesmen and their pundit lackeys and nannies will urge Mr. I say pursue the facts, pursue the truth to the bitter end. Some might say that the more urgent, egregious issue-the one that sealed the Big Steal-was the mob intimidation of the Miami-Dade counting board. The ignorant army whipped to a frenzy by the demagoguery of the pinstriped thug, James Baker, and the Austin pinhead in chief, the mob that invaded the Miami re-count site and engaged in the kind of threatening behavior that may well have changed American history by denying Gore the legally mandated hand re-count there. House whip Tom DeLay. So yes, the story has moved on from Katherine Harris-although she briefly returned to center stage on Nov. And perhaps a new phenomenon-makeup-ist. As if a failure to be styled by Kevin Aucoin disqualifies one from being taken seriously when often the opposite is true. If the makeup matter is a red herring- and I believe it is-the question of Ms. Because it has been so excessive and self-destructive, and did so much damage initially to her own cause, it has given rise to some wild theories to explain it. Media and Media Consumers. Almost everyone in the media I know has heard The Rumor, and yet only one paragraph about it has appeared in print. Think of all the rumors about Hillary and Bill the right-wing press has rushed into print without corroboration, up to and including murder. If it were a rumor about Hillary, you know Matt Drudge would have rushed into print with it. I wonder, why his sudden attack of reticence? Personally, I think reporting on rumors and the agendas behind them can be a legitimate subject of journalism, or at least of cultural history. The kind of rumors that fly about in times of national crisis, true or not, are often valuable clues to deeper currents in the national psyche. Someday after someone else prints The Rumor, I may have more to say on the matter. For the moment, I will merely quote one paragraph from a New York Times story on Katherine Harris which, a source at The Times told me, was an oblique and laundered reference to The Rumor-and part of a paragraph from the New York Post. Harris has been relentlessly maneuvering for every advantage behind the scenes. Have I become too much of a partisan? Am I seeing only one side of this amazing story? Have I lost my skeptical Mysterian detachment? The Day of the Big Steal. One of the late-night comics said that George W. Um, excuse me, George W. This is not Athens under the Greek colonels.

*Re "Castro Must Yield to U.S., Bush Says," May Having traveled to Cuba legally and heard from the Miami-based opposition to Fidel Castro as well as from his supporters, I hope your readers are as bored as I am by the rhetoric from the Bush brothers (George W. and Jeb) and the Castro brothers.*

Background[ edit ] The controversy began on election night, when the national television networks, using information provided to them by the Voter News Service , an organization formed by the Associated Press to help determine the outcome of the election through early result tallies and exit polling , first called Florida for Gore in the hour after polls closed in the peninsula but about ten minutes before they closed in the heavily Republican counties of the panhandle in the Central time zone. Later in the evening, the networks reversed their call, moving to "too close to call", then later giving it to Bush; then they retracted that call as well, finally indicating the state was "too close to call". The small margin produced an automatic recount under Florida state law, which began the day after the election. The Palm Beach County recount attracted protestors and media. Due to the narrow margin of the original vote count, Florida Election Code On November 9, the Bush campaign announced they had hired George H. Following the statewide machine recount, the Gore campaign requested a manual recount in four counties. Florida state law at the time allowed a candidate to request a manual recount by protesting the results of at least three precincts. Volusia County started its recount on November Florida statutes also required that all counties certify and report their returns, including any recounts, by 5: The manual recounts were time-consuming, and it soon became clear that some counties would not complete their recounts before the deadline. On November 11, it joined a group of Florida voters in suing in federal district court for a preemptive injunction to stop all manual recounting of votes in Florida. On November 14, the original deadline for reporting results, with the Volusia County recount complete, Bush held a vote lead. The same day, a state judge upheld that deadline but ruled that further recounts could be considered later. The next day, the Florida Supreme Court allowed manual recounts in Palm Beach and Broward Counties to continue but left it to a state judge to decide whether Harris must include those votes in the final tally. Miami-Dade County decided on November 17 to conduct a recount but suspended it on November The Gore campaign sued to force Miami-Dade County to continue its recount, but the Florida Supreme Court refused to consider the request. As the manual recounts continued, the battle to certify the results intensified. On November 17, Judge Terry Lewis of Leon County Circuit Court permitted Harris to certify the election results without the manual recounts, but on the same day the Florida Supreme Court stayed that decision until it could consider an appeal by Gore. After that decision, the Bush campaign appealed to the U. Supreme Court, arguing that the state court effectively rewrote state election statutes after the vote. On November 28, Judge N. Gore appealed that decision to the Florida Supreme Court. On December 8, the Florida justices, by a vote, rejected the selective use of manual recounts in just four counties and ordered immediate manual recounts of all ballots in the state where no vote for president had been machine-recorded, also known as undervotes. On December 4, the Court ordered the Florida Supreme Court to clarify its ruling that had extended the certification date. On December 9, the Court suspended the manual recount, in progress for only several hours, on the grounds that irreparable harm could befall Bush, according to the order written by Justice Antonin Scalia see U. Supreme Court proceedings below. Meanwhile, on December 6 the Republican-controlled Florida legislature convened a special session to appoint a slate of electors pledged to Bush, as the U. On December 12, the same day as the U. On December 13, Gore conceded the election to Bush in a nationally televised address. During the recount, controversy ensued with the discovery of various irregularities that had occurred in the voting process in several counties. Among these was the Palm Beach "butterfly ballot", which resulted in an unusually high number of votes for Reform Party candidate Pat Buchanan. Conservatives claimed that the same ballot had been successfully used in the election; [14] [15] in fact, it had never been used in a Palm Beach County election among rival candidates for office. Democrats

claimed that many of these were not felons and should have been eligible to vote under Florida law. Unlike the much-discussed Palm Beach County butterfly ballot, the Duval County ballot spread choices for president over two non-facing pages. Alternately, Republicans charged that Democrats had registered non-citizens to vote, fought to exclude overseas military ballots, and arbitrarily changed vote-counting criteria after the election. On the other hand, he said, Democrats talked like referees with a fear of pushing too hard, not wanting to be seen as sore losers. For all the furor over Palm Beach, it was black precincts where voters had been turned away, denied a ballot because some had been mislabeled as felons, blocked from voting because of bureaucratic bungles, or because the huge increase in black turnout had overwhelmed local officials. For those with memories going back four decades, all this was no accident. It was instead a painful reminder of the days when the battle for the ballot was, literally, a life-and-death matter. At an NAACP-sponsored hearing in Miami four days after the election, prospective voters told of police cars blocking the way to the polls, of voters harassed by election workers. It was anecdotal evidence at best, and local authorities argued persuasively that the police presence near a polling place was pure coincidence. Such explanations did little to lessen the sense of anger among black Democrats. All five major U. No call in a state with two different poll-closing times had ever turned out wrong. EST, as they are in the Central time zone. The network calls were made about ten minutes before the polls in the Central time zone closed, based on the Voter News Service calling the state of Florida for Gore at 7: This region of the state traditionally voted mostly Republican. Democratic State Senator Daryl Jones said that there had to have been an order to set up roadblocks in heavily Democratic regions of the state on the day of the election. Department of Justice later investigated reports from the Tallahassee and Tampa areas and concluded that there was no evidence that roadblocks were related to the election or had occurred in close proximity to voting places. It was never released. The Herron memo gave postmark and "point of origin" criteria that Herron maintained could be used to challenge overseas ballots. It was in line with a letter sent out by Harris stating that if a postmark was not present on an overseas ballot, it had to be thrown out. Meanwhile, Republicans relied on their own page manual for the same purpose. Lieberman appeared on Meet the Press and said that election officials should give the "benefit of the doubt" to military voters rather than disqualifying any overseas ballots that lacked required postmarks or witness signatures. Florida Attorney General Bob Butterworth, a Gore supporter, later told the counties to reconsider those ballots without a postmark. The instructions on the sample ballots said "Vote every page". Further, counties and precincts with large black populations disproportionately had technologies where ballots would predictably go uncounted. In punchcard counties, 1 in 25 ballots had uncountable presidential votes. In comparison, counties that used paper ballots scanned by computers at voting places in order to give voters a chance to correct their ballot if it had an error had just 1 in uncountable ballots. In a May list, over 57, voters were identified as felons, with all counties being ordered to remove all listed names from their voting rolls. Democrats claimed that many simply had names similar to actual felons, some listed "felonies" were dated years in the future, and some were random. Some counties refused to use the list, finding it error-ridden. In other counties, supervisors of elections notified those at risk of being scrubbed, giving them a chance to prove they were not felons, which a small number chose to do. Though Jeb Bush recused himself from involvement in the recount, Democrats alleged there was still an appearance of possible impropriety. Florida Department of State held that Florida could not prevent a man convicted of a felony in Connecticut, where his civil rights had not been lost, from exercising his civil rights. The Brooks Brothers riot: A raucous demonstration by several dozen paid activists, mostly Republican House aides from Washington, flown in at Republican Party expense to oppose the manual recount in Miami-Dade County. The demonstration, which took place in view of multiple national network television cameras, resulted in the election board reversing their earlier decision to recount ballots, after determining that it could not be completed by the court-issued deadline. Several websites sprang up to match Nader supporters in swing states like Florida with Gore supporters in non-swing states like Texas. For example, the Nader supporters in Florida would vote for Gore, and the Gore supporters in Texas would vote for Nader. This would have allowed Nader

to get his fair share of the vote and perhaps to cross the nationwide total vote threshold to allow the Green Party to participate in the presidential debates in the election, while helping Gore to carry swing states. Six Republican state secretaries of state, led by Bill Jones of California, threatened the websites with criminal prosecution and caused some of them to reluctantly shut down. The vote-pairing sites allegedly tallied 1, Nader supporters in Florida who voted for Gore. These manual counts garnered Bush a net gain of votes. The ballot displayed the list of presidential running-mate pairs alternately across two adjacent pages, with a column of punch spaces down the middle. About 19, ballots were spoiled because of overvotes two votes in the same race, compared to in Asked how many votes he would guess Buchanan legitimately received in Palm Beach County, he said, "I think 1, would be generous. Do I believe that these people inadvertently cast their votes for Pat Buchanan? We have to believe that based on the vote totals elsewhere. Palm Beach County Canvassing Board v. Harris Harris I and Gore v. Katherine Harris was a lawsuit about whether county canvassing boards had authority to extend manual recounts in order to inspect ballots for which the machine counter did not register a vote. The court ruled that counties had that authority and to allow time for these efforts, extended the statutory deadline for the manual recounts. It also stayed the state certification to November Numerous local court rulings went both ways, some ordering recounts because the vote was so close and others declaring that a selective manual recount in a few heavily Democratic counties would be unfair. Eventually, the Gore campaign appealed to the Florida Supreme Court, which ordered the recount to proceed. On December 4, the U. Supreme Court returned this matter to the Florida Supreme Court with an order vacating its earlier decision. In its opinion, the Supreme Court cited several areas where the Florida Supreme Court had violated both the federal and Florida constitutions. The Court further held that it had "considerable uncertainty" as to the reasons given by the Florida Supreme Court for its decision. The results of this tally were to be added to the November 26 tally. Supreme Court proceedings[ edit ] Main article: Supporters for the Gore-Lieberman ticket outside the U. Supreme Court on December 11 About 10 p. By a 5â€”4 vote the justices reversed and remanded the case to the Florida Supreme Court "for further proceedings not inconsistent with this opinion", prior to the optional "safe harbor" deadline which the Florida court had said the state intended to meet. Gore should not set precedent but should be "limited to the present circumstances". As the state has moved toward electronic voting, nothing in this evolution has diminished the standards first articulated in such [judicial] decisions The Florida Statutes contemplate that where electronic or electromechanical voting systems are used, no vote is to be declared invalid or void if there is a clear indication of the intent of the voter as determined by the county canvassing board.

One of the most active of the family has been Jeb Bush, at the time of this posting, Governor of Florida. He and his two brothers, and their cronies, have reportedly committed a series of real estate frauds, bank swindles, and other reputed massive rip-offs, for which they should have been prosecuted and imprisoned, and which have caused the taxpayers and innocent parties billions and billions of dollars. Katherine Harris has played a key role in the year presidential election mess centered around Florida. Long-time sources in retirement in the intelligence community, have contended for some time prior to the year presidential election that it would be orchestrated on a mammoth scale from a prior historical example as a blueprint. A recent book of Gore Vidal, entitled "", is a reconstructed discussion of the presidential election mess involving Florida and two contenders for the White House, Samuel J. Tilden and Rutherford B. Because of complications with the Electoral College and an extremely tight race, a compromise was necessary by which Hayes became a highly-damaged U. President, called various names of fraud during his term. Some contend the fine hand of the American CIA is evident in the year election ruckus. Through a reported computer "glitch", upwards of 65, presidential election ballots "disappeared" in Tennessee, causing presidential candidate Albert Gore, Jr. Clinton for months prior to the election contended to confidants that he expected to remain in the White House after the Election and such, by some kind of an emergency? Did Clinton, early in his career being a CIA darling, have inside information or

Gadsden County can justifiably claim to have played a critical role in determining the result of the presidential election. The feat was not accomplished by counting ballots marked by an unprecedented outpouring of voters but rather by discarding 1, votes"12 percent of all those cast in this majority African-American and overwhelmingly Democratic county. Bush in Florida and win the presidency. That pile of discarded ballots formed a heartbreaking footnote to the great lost political story of Florida in News organizations that could not see beyond dimpled chads, and a Gore legal team that failed to recognize where and how most Democratic votes were lost, generally missed that story. Grassroots organizing and get-out-the-vote efforts pushed the turnout up from just 49 percent in , the year in which Jeb Bush was elected, to 70 percent in African-American voter registration jumped 9 percent in the months prior to the election, compared with a 1 percent increase in white voter registration. On November 7, , this coalition-without-a-name brought to the polls enough Democratic voters to secure the state for Gore. But getting enough voters to the polls did not guarantee victory. And we learned something in If we can just get the votes counted, there are enough of us to beat the Bushes. Bush the winner, are positioned to win open Congressional seats. But no figure from features so prominently as Jeb Bush. And the First Brother is running scared. At the start of the year, polls had Bush leading McBride by thirty-one points. One percent backed gay-rights activist Bob Kunst, who complains that Democrats have not been aggressive enough in taking on Bush; 7 percent remain undecided. Both have politicized government institutions, policy-making and judicial appointments. Both have strained relations with minority communities. Reno had high name recognition and bases of support, but she also carried high negatives. So enthusiastic was the Bush camp about facing Reno that Republicans bought television ads attacking her chief primary opponent, McBride. In his successful campaign, Bush pitched himself as someone who would manage the state by building bipartisan consensus. Instead, the stubborn, easy-to-anger and highly partisan governor has proven to be a divisive figure who has been accused of politicizing state government. They remain skeptical about compromise legislation recently agreed upon by Congress, however; they worry that it allows states to erect new barriers to participation. Activists see the fight over the One Florida plan, which Bush proposed shortly after taking office, as the starting point for the organizing that threatens his re-election. Voter registration among union members is up 23 percent so far this year, and could yet see a 30 percent increase. The forms are fed into a computerized database that will power a massive get-out-the-vote drive. It appears that serious efforts are now being made to fix the problems that were not resolved on Primary Day, although activists remain wary. They know there will still be problems. Up in Gadsden County, for instance, the new elections supervisor, Shirley Knight, the first African-American to hold that post, could not convince the majority-white county commission to increase the number of polling places. But voters who make it to the polls should have an easier time of it; Knight has used state grants to purchase new equipment while simplifying the ballot design, developing voter-education programs and personally delivering absentee ballots to the homes of voters. While Gadsden County discarded almost 2, spoiled ballots two years ago, only four were discarded September Knight still reflects on how things might have been different if she had been in charge in Just the opposite"I think people are more determined to vote. But if we can get these people out and get their votes counted, and I think we can,
