

Chapter 1 : Brandon Flowers - Wikipedia

*The Killer's Wife: A Novel [Bill Floyd] on www.nxgvision.com *FREE* shipping on qualifying offers. Six years after her courageous testimony helped put her husband on death row for a string of gruesome murders.*

The Swede is soon revealed to be Ole Andreson. Philadelphia police Lieutenant Sam Lubinsky Sam Levene , a close, longtime friend of the Swede, is particularly helpful. Through flashbacks, it is revealed that the Swede was a professional boxer whose career was cut short by an injury to his right hand. When Lubinsky catches Kitty wearing stolen jewelry, the Swede "confesses" to the crime and serves three years in prison. When their rendezvous place supposedly burns down, all of the gang members but the Swede are notified of where to meet. Kitty then informs the Swede that he is being double-crossed. The Swede takes all of the money at gunpoint and flees. Kitty meets him later in Atlantic City, then disappears with the money herself. Back in the present, Reardon watches the boarding house where the Swede lived. Sure enough, Dum-Dum shows up, searching for a clue as to the whereabouts of the loot. Reardon gets some information from the robber, but Dum-Dum gets away before the police can arrest him. When Reardon gets confirmation of one particular detail, he is certain he knows what happened. He goes to see Big Jim, now a very successful building contractor in Pittsburgh. Reardon lies, telling Big Jim that he has enough evidence to convict Kitty. He suggests that Kitty contact him. She agrees to meet him, and they go to a nightclub at her suggestion. He and Lubinsky are ready for them, and the two hitmen are slain instead. Reardon explains that when he discovered that the fire that destroyed the rendezvous point had been set hours after Kitty was sent to notify everyone of the new meeting place, he realized that Kitty and Big Jim, her husband, had been setting up the Swede. Dum-Dum finally figured out the truth, as well. When Lubinsky asks the dying Big Jim why he had the Swede killed, Big Jim tells him he could not take the chance that another member of the gang might find the Swede, as he had. Kitty begs her husband to exonerate her in a deathbed confession , but he dies first.

Chapter 2 : The Killers (film) - Wikipedia

The Killer's Wife by Bill Floyd is his debut novel and a good one it is. Leigh's husband Randy was a serial killer who was arrested based on her testimony. Six years later she is still trying to find a new life for herself and her young son, Hayden.

In some cases it just seems a little far-fetched. Read what these 10 serial killer wives put up with and decide for yourself. Were they ignorant, accomplices, or victims? During that time she admits he often did some peculiar and shady things, and while she suspected him of infidelity, apparently she never fathomed he was a murderer—even after finding a blood-soaked seat in the back of their family van. Supposedly, Robert explained the blood was from a dog he had accidentally hit and then taken to the vet. If it was just the one incident, her ignorance might be understandable, but there were other signs too. Also, in an interview, Linda said she found it strange when her husband suddenly took an interest in their credit card statements, since she always paid their bills. Robert excused the charges by saying he went there to relax his muscles after long shifts at work. Okay, even if all the other stuff just led her to assume he was cheating and she chose to stay with him for the kids, or money, or whatever—peeping on the neighbors should have been a deal breaker. When the police called and told her they found a body in her backyard. How do you explain away amputated body parts lying about the house? Of course, he did cast it in resin, so maybe she thought it was. While Jerome was certifiably crazy, Darcie undoubtedly had some mental problems of her own. She obeyed his every command, including when he ordered her to stay in the house and wear nothing except her birthday suit and a pair of high heels. Obviously, Darcie knew something was going on or was in complete denial. The authorities must have thought she was in on it, because they arrested and tried her as an accomplice. They originally met at a bar and Judith described Gary as a perfect suitor who was polite, handsome, had a good job, and treated her well. Before getting married, they dated for two years and lived together for another year, which seems like a fair amount of time to notice if your boyfriend is a nut job. But, Gary gave no indication of his murderous habits. Once married, Judith said they had a completely ordinary life—he went to work and on the weekends they liked to have yard sales or camp, and they were always very affectionate to each other. On the rare occasions when Gary left the house early or came home late, he always had work related excuses. He explained that his tenants had destroyed the carpets and an ex-girlfriend had taken the bed back. When she found out the truth about her husband, Judith claims she experienced a rapid downward spiral where she drowned her grief in alcohol and pills. However, those were three hellish years. Despite his mental and physical violence towards her and his habit of bringing home prostitutes, roughing them up, and making Cathy watch it all, she never thought he would kill anyone, except maybe herself. He was 20 years older than Cathy and treated her worse than garbage. Peter would do everything from throw his dinner at her to tossing her against the wall and nearly strangling her. She threatened to leave him, and he responded by not letting Cathy leave his sight and warning he would kill their toddler son if she went anywhere he even dangled the child over the banister to make his point. Like other serial killers, Peter pulled the old ban the wife from the basement routine. He was sentenced to 14 years for those crimes yet was only made to serve Within days of his release he had already killed another victim. Cathy finally became aware she was married to a serial killer when she saw his face on the news. To be fair, he was a well-respected colonel in the Canadian Armed Forces and had an entire military base fooled, but still, she lived with the man. The couple owned two houses and both were filled with mementos of his crimes. Like a true military man, he was detailed oriented and kept meticulous records of his crimes, complete with newspaper clippings, photos of his victims, and news videos, which he hid in places like the basement, the piano, and a duffle bag. Hidden or not, surely after 19 years a thorough bout of spring cleaning would have uncovered something. But, perhaps maybe she did know something. She married him in , which was right around the time he progressed from deranged boy rapist to a full blown serial killer. Of course, the terrible smell came from the many dead bodies John continuously stashed under the house, but he told her it came from mice. Surprisingly, she saw no problems with that excuse. She just went on breathing in the scent of dead corpses for years and years. Besides the stink, local

boys and young men were turning up dead or missing on a regular basis, and several of the victims were people Gacy new personally one guy even lived in their house for a while. Still, Carol never made the connection. While John was jovial and charitable to outsiders, he was moody and bad-tempered towards his wife. By , he flatly told her he was bisexual and the two of them would never have sex together again. After that, he stayed out late, brought teenage boys to the house, and kept homosexual pornography lying around. Had the woman never seen a Lifetime Television movie? Obviously Dennis was an expert at living a double life, but he most definitely left a few hints for Paula through the years. The most unbelievable was when she discovered a rough draft of a poem he had written about killing Shirley Vian Relford. The murder of Shirley was all over the news, and when Paula questioned him about the poem Dennis explained it was an assignment for a class he was taking at Wichita State University Sadistic Poetry , perhaps. Granted this was and before the age of out of control political correctness, but even then no sane professor would ask students to write about a recent, horrific murder. Yet, Paula let the incident go. She was given a smoking gun, or more accurately a human skull, yet still believed her husband, Herb Baumeister , when he said it belonged to a medical school skeleton owned by his anesthesiologist father. Julie says the bones quickly disappeared after her son unearthed them and she simply assumed animals had carried them off. Why would anyone think twice about human remains in their yard? He told his wife the authorities were falsely accusing him for theft and ordered her not to let them search their house. Later, the police talked to Julie alone and told her the real reason they wanted to search the home her husband was a suspected serial killer , and she still staunchly refused to let them enter. Although they found remains of 11 men, they could never arrest Herb because he committed suicide before they could apprehend him. Harvey beat Alice and her two kids, and apparently her year-old son was the smartest of all, because he grew tired of the abuse after a mere two months and left to go live with his real father. She is truly lucky she got out with her life intact as his next girlfriend was found dead in the woods with multiple hammer blows to the head. In fact, authorities think the Russian serial killer, Andrei Chikatilo , may have raped, murdered, and snacked on as many as people, yet his wife Fayina still contends she never had a clue. For instance, she recalled the long business trips, nights away from home, repeated blood stains on his clothes, him getting fired from his teaching job for molesting children, and, oh yeah, the pesky police continually bringing him in for murder-related questioning. But hey, those things could happen to anybody. Instead of thinking Andrei was going around having his way with kids, Fayina took his word for it when he told her he was sexually impotent and the two of them could not be intimate. For example, on one occasion she gave him an iron-clad alibi when he was accused of killing a nine-year-old girl. Once the trial started and Andrei confessed to the murder, the alibi his wife provided started to look a bit fishy.

Chapter 3 : The Killer's Wife by James Patterson
